Tech Intell United States. Army. Ordnance Department, 1995 The Last Nazis Perry Biddiscombe, 2004-06-30 The history of the shadowy Werewolf guerrilla bands formed at end of the Second World War as the last desperate defence of Nazis Founded by Heinrich Himmler in 1944 when it became clear Germany would be invaded the Werewolf guerrilla movement was given the task of slowing down the Allied advance to allow time for the success of negotiations or wonder weapons Staying behind in territory occupied by the Allies its mission was to carry out acts of sabotage arson and assassination both of enemy troops and of defeatist Germans Perry Biddiscombe has researched the movement exhaustively and details Werewolf operations against the British Russians and fellow Germans on the Eastern and Western Fronts and in the post war chaos of Berlin Giving the lie to the established story of a cowed German population meekly submitting to defeat this is a fascinating insight into what has been described as the death scream of the Nazi regime **Books In Print**

Department of the Army, 1966

U.S. Army Signals Intelligence in World War II James Gilbert, John P. Finnegan, 2015-09-07 This book is part of the Army historical community's commemoration of the fiftieth anniversary of World War II American victory in that conflict was brought about not only by the valor of our fighting men and the immensity of our productive capacity but also by the availability of superb military intelligence Much of this intelligence came from the ability of our armed forces to intercept and decipher the most secret communications of their adversaries For many years security considerations prevented any public mention of these successes in the office histories Now much of the story can be told To preserve the memory of the Army's role in this intelligence war a collection of documents on Army signals intelligence in World War II Signal II were published This book is intended both for an Army audience and for the general public including those World War II veterans who participated in the signals intelligence war and who for so many years were constrained to keep their contributions secret The security barriers have now been lifted and the Army is proud to acknowledge those contributions Eyes on the Enemy Chris McNab, 2025-08-05 a comprehensive reprint of the Intelligence doctrine that supported the American drive to victory on numerous fronts against a wide range of enemies and environments It is worth the read to reinforce the basics of what we still do today The Vanguard Journal of the Military Intelligence Corps Association On December 7 1941 an imperial Japanese carrier strike force attacked the US Pacific Fleet at Pearl Harbor taking advantage of what was one of the most profound intelligence failures in US history Galvanized into action the branches of the U S military subsequently developed one of the greatest albeit imperfect intelligence gathering and analysis networks of the combatant nations opening an invaluable window onto the intentions of their enemies The picture of U S military intelligence during World War II is a complex one It

was divided between the fields of signal intelligence SIGINT and human intelligence HUMINT combat intelligence and War Department intelligence and between numerous different organizations including the Military Intelligence Division MID Military Intelligence Service MIS the Office of Naval Intelligence ONI the Counter Intelligence Corps CIC the Office of Strategic Services OSS and the many intelligence units organic to Army Navy Army Air Forces and Marine Corps The documents collected in this book reveal the theoretical and practical principles behind wartime intelligence gathering and analysis from the frontline intelligence officer to the Washington based code breaker They explain fundamentals such as how to observe and record enemy activity and intercept enemy radio traffic through to specialist activities such as cryptanalysis photoreconnaissance prisoner interrogation and undercover agent operations The painstaking work of an intelligence operator required a sharp attentive mind whether working behind a desk or under fire on the frontlines The outputs from these men and women could ultimately make the difference between victory and defeat in battle
