Techniques for Reducing Pesticide Use David Pimentel, 1997-04-03 Around 25 million tons of pesticide are used every year. This volume outlines techniques for reducing pesticide use internationally and assesses the environmental and economic benefits of such a reduction.

Integrated Pest Management David Pimentel, Rajinder Peshin, 2014-04-10 The book deals with the present state and problems of integrated pest management as relating to stakeholder acceptance of IPM and how integrated pest management can become a sustainable practice. The discussions include using less pesticides and the possibility of eliminating pesticides from agricultural practice.

Encyclopedia of Pest Management, Volume II David Pimentel, Ph.D., 2007-07-17 With contributions from more than 200 esteemed international authorities and containing approximately 200 entries, the *Encyclopedia of Pest Management Volume II* is a key reference for professionals in academia, industry, and government as well as students at all levels. Containing completely new entries, this volume is designed to be regularly consulted.

Integrated Pest Management Rajinder Peshin, Ashok K. Dhawan, 2009-04-12 The book *Silent Spring* written by Rachel Carson in 1962 is considered the landmark in changing the attitude of the scientists and the general public regarding the complete reliance on the synthetic pesticides for controlling the ravages caused by the pests in agriculture crops. For about five decades, the Integrated Pest Management (IPM) is the accepted strategy for managing crop pests. IPM was practiced in the Canet e Valley, Peru, in the 1950s even before the term IPM was coined. *Integrated Pest Management Innovation Development Process Volume 1* focuses on the recognition of the dysfunctional consequences of the pesticide use in agriculture through research and development of the Integrated Pest Management innovations. The book aims to update the information on the global scenario of IPM with respect to the use of pesticides, its dysfunctional consequences, and the concepts and advancements made in IPM systems. This book is intended as a text as well as reference material for use in teaching the advancements made in IPM. The book provides an interdisciplinary perspective of IPM by the forty-three experts from the field of entomology, plant pathology, plant breeding, plant physiology, biochemistry, and extension education. The introductory chapter, Chapter 1, gives an overview of IPM initiatives in the developed and developing countries from Asia, Africa, Australia, Europe, Latin America, and North America. IPM concepts, opportunities, and challenges are discussed in Chapter 2.

The Routledge Handbook of Environmental Economics in Asia Shunsuke Managi, 2015-02-11 Problems of climate change, biodiversity, and air pollution are clearly growing globally but more particularly in Asia because of its economic importance and richness in nature. The increasing interest in environmental and resource economics applied in regions of Asia will make this book an outstanding resource to the existing literature, particularly in the fields of environmental and resource economics and the integration of applied content in traditional and agricultural development. At present, there is no single handbook or text on the state of current knowledge in environmental economics in Asia or one which offers a comprehensive guide to students and academics on the subjects of environmental economics research.
