Came From Outer Space Wearing an RAF Blazer! Martin Mobberley,2013-07-23 To British television viewers the name Patrick Moore has been synonymous with Astronomy and Space Travel since he first appeared on *The Sky at Night* in 1957 To amateur astronomers he has been a source of inspiration joy humour and even an eccentric role model since that time Most people know that his 55 years of presenting *The Sky at Night* is a world record but what was he really like in person What did he do away from the TV cameras in his observatory and within the British Astronomical Association the organisation that inspired him as a youngster Also precisely what did he do during the War Years a subject that has always been shrouded in mystery Martin Mobberley a friend of Patrick Moore s for 30 years and a former President of the British Astronomical Association has spent ten years exhaustively researching Patrick s real life away from the TV cameras His

childhood RAF service tireless voluntary work for astronomy and charity and his endless book writing are all examined in detail His astronomical observations are also examined in unprecedented detail along with the battles he fought along the way and his hatred of bureaucracy and political correctness No fan of Sir Patrick Moore can possibly live without this work on their bookshelf The Document Alice V Todd,2024-07-19 They say that everybody has a book in them When I embarked on my retirement journey I decided to discover mine resulting in this my debut novel Amidst the ancient stones of Stonehenge on the dawn of the new millennium s first summer solstice Christopher s day takes an unexpected turn A stray piece of paper carried by the morning breeze finds its way to him But it s not just the paper that captures his attention it s the captivating stranger who appears just as mysteriously Together they unravel the cryptic foreign writings on the paper diving deep into a puzzle that leads them on a quest for understanding Is the document they ve stumbled upon a profound revelation or just an elaborate ruse Join Christopher and his newfound companion as they journey to decode The Document and in the process discover more than they ever anticipated *Guinness Book of Records* ,1983 **It's Part of What We Are - Volumes 1 and 2 - Volume 1: Richard Boyle (1566-1643) to John Tyndall (1820-1893); Volume 2: Samuel Houghton (18210-1897) to John Stewart Bell (1928-1990)** Charles Mollan,2007-11-15 Biographies of more than 100 Irish scientists or those with strong Irish connections in the disciplines of Chemistry and Physics including Astronomy Mathematics etc describing them in their Irish and international scientific social educational and political context Written in an attractive informal style for the hypothetical educated layman who does not need to have studied science Well received in Irish and international reviews **THE CREATOCRACY REPUBLIC** High King Peter K. was the Star of Bethlehem an actual astronomical event For hundreds of years astronomers as prominent as Johannes Kepler have sought an answer to this last baffling question In *The Star of Bethlehem* Mark Kidger brings all the tools of modern science years of historical research and an infectious spirit of inquiry to bear on the mystery He sifts through an astonishing variety of ideas evidence and information including Babylonian sky charts medieval paintings data from space probes and even calculations about the speed of a camel to present a graceful original and scientifically compelling account of what it may have been that illuminated the night skies two millennia ago Kidger begins with the stories of early Christians comparing Matthew's tale of the Star and the three Magi who followed it to Bethlehem with lesser known accounts excluded from the Bible Crucially Kidger follows the latest biblical scholarship in placing Christ's birth between 7 and 5 B C which leads him to reject various phenomena that other scientists have proposed as the Star In clear colorful prose he then leads us through the arguments for and against the remaining astronomical candidates Could the Star have been Venus What about a meteor or a rare type of meteor shower Could it have been Halley's Comet as featured in Giotto's famous painting of the Nativity Or as Kidger suspects was the Star a combination of events a nova recorded in ancient Chinese and Korean manuscripts preceded by a series of other events including an unusual triple conjunction of planets Originally published in 1999 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Stars and Their Purpose Werner Gitt, 2006 To my mind scientific findings and biblical affirmations are inseparable It is a tragic fact of history that these two approaches have diverged and become separated Did you know that there are 200 billion stars in our galaxy alone And that according to current data there are at least 100 million galaxies in existence The sheer number of stars in the universe attests to the awesomeness of God's creation The purpose and features of stars are discussed in this exciting and fascinating book by Dr Werner Gitt Learn about topics such as How are stars different from each other How big is the universe Why did God create the stars Surprising facts about the sun and moon How and when do solar eclipses happen Book jacket
