

THE HERPETOLOGICAL CONTRIBUTIONS OF WILHELM C. H. PETERS (1814-1896). With an Introduction, Annotated Bibliography, and Memoirs of Peter, 1986. Aaron M. Bauer, Robert Condit, and Margaret Midgett. Society for the Study of Amphibians and Reptiles in cooperation with Deutsche Gesellschaft für Herpetologie und Terrarienkunde. 714 p. \$75.00 (hardcover).—The well-known 1976 secondary German herpetological catalog (many other is known) Wilfried Pries has to turn the volume of herpetological papers, nearly all of which were written in German and most (about 90%) of them published in several Berlin journals that are hard to get in many places nowadays. The authors of the present compilation of all of Peters' herpetological papers have done a tremendous job in getting all the publications together and, in doing so, did a great service to herpetology. There is no need to go through extensive inquiries to libraries and search engines to locate a certain paper and actually get it (or an expensive Xerox copy of it) in print itself. The book is divided into two parts, the first of which consists of the original contribution by the authors and an Introduction, a dense volume, a Bibliography of Wilhelm C. H. Peters, an Annotated Herpetological Bibliography of W. C. H. Peters, a Synopsis of Herpetological Data described by W. C. H. Peters, two chapters of the mentioned and described by other authors in papers authored by Peters, and a paper presented by Peters and a section on 1 reptile cited in the accompanying chapters, not including any Peters' references. This part occupies 87 pages. The second part consists of facsimile reprints of all of Peters' herpetological papers. All papers have been reproduced in such a way that the original pages fit on one page of the reprint. There is only one exception to the rule and that is the book *Reptilien Monographien* which was restricted to 41 reptiles (mostly, with the last in ecological view, but with two pages reduced to a size as in the dimensions of the reptile. Although the volume and pages of the book were sparsely colored, the plates are reproduced here in black and white, which sometimes (p. 11, fig. 4, pl. 147, fig. 2, pl. 14, fig. 26) leads to confusion results out in some other sources (e.g., pl. 59 leads to a "lost" tract than the color original).

The biography of Peters seems to have been done rather thoroughly and quite objectively, even on the fact that he was a monarchist between 1842 and 1848. Many details are given of the places where he stayed and the periods he spent there, based on Peters' journal of the trip. The major locality "Berlin" has numerous citations,

but the authors provide some evidence that it is likely to be the place in Berlin. If not the trip, Peters published some smaller papers describing new species (mostly frogs and tadpoles) described in the field by Peters. Some of these were published when Peters still was in Moscow. In this connection, it might be worth while to mention that some of Peters' papers were written while two weeks of being present in a museum. There is no mention of any of his herpetological work and dealing with being increasing at the time, when, and no other have been papers published in a serious journal in such a short time? Maybe he was busy working on his scientific interests.

During his stay in Moscow, Peters collected 475 reptiles and amphibians but also (many?) specimens of other groups. Nevertheless, for protuberant standards, this seems to be a very low number considering the amount of time spent in the field. The explanation, probably is that Peters did not pay special attention to reptiles and amphibians and only picked them up when they came his way easily. Notwithstanding this small collection, containing 146 species descriptions of eight new genera, 55 new species and one new subgenus were based on it.

After his return to Berlin, Peters stayed working in the Anatomical Institute, and in 1866 he started his career as the Zoological Museum. After about a year, he had already become director of the museum, a position he kept till his death in 1896. During the period between 1866 and 1888, he published many papers dealing with reptiles and amphibians from all over the world. According to the authors, Peters maintained correspondence and traded and traded specimens, exchanges with herpetologists throughout Europe, and they collected a lot of them. The is they provide details is not complete. One of Peters' herpetological correspondents and only nine years his senior was the great Schlegel in Germany who had been working in the *Staatssammlung von Naturhistoria*. He was in London since 1825, first as a herpetologist and later as an ornithologist and malacologist. In 1838, he became director of the museum in London until his death in 1884. In the archives of the natural history museum in London, now named Natural History Museum, there are a number of handwritten letters from Peters to Schlegel and the greater part of the letters and a number of his writing to the latter, a rather regular exchange of letters, with place names Berlin and London. This is also evident from some descriptions of Peters, which he attributed to Schlegel (e.g., Appendix
