Encyclopaedia of Rural Sports Or Complete Account of Hunting, Shooting, Fishing, Racing Etc. A New Ed Pritchett Blaine-Delabere,1858 **The Reader** Carolyn Margaret Meyer,Bruce Meyer,2001 The Reader is aimed at though not limited to first year courses focussing on essay writing found in Ontario colleges university colleges and universities This text challenges students to think read discuss and write on a creative and critical level Organized by rhetorical mode The Reader includes more than 30 high interest readings from mainly Canadian sources and introduces readings from new voices in literature The diverse selections provide the authors intent to provide a balance of gender ethnic and cultural perspectives The authors have highlighted quality literature by both highly esteemed popular and unknown authors In addition to the essays themselves this text provides effective essay writing strategies and many interesting discussion points to engage student interest *An Encyclopædia of Rural Sports* Delabere Pritchett BLAINE,1852 *The Smart Money* Michael Konik,2006-11-14 A riveting inside look at the lucrative world of professional high stakes sports betting by a journalist who lived a secret life as a key operative in the world's most successful sports gambling ring When journalist Michael Konik landed an interview with Rick Big Daddy Matthews the largest bet he'd placed on a sporting event was 200 Konik an expert blackjack and poker player was no stranger to Vegas But Matthews was in a different league the man was rumored to be the world's smartest sports bettor the mastermind behind the Brain Trust a shadowy group of gamblers known for their expertise in beating the Vegas line Konik had heard the word on the street that Matthews was a snake a conniver who would do anything to gain an edge But he was also brilliant cunning and charming And when he asked Konik if he'd like to make a little money during the football season the writer found himself seduced So began Michael Konik's wild ride as an operative of the elite Brain Trust In *The Smart Money* Konik takes readers behind the veil of secrecy shrouding the most successful sports betting operation in America bypassing the myths and the rumors going all the way to its innermost sanctum He reveals how they and he got rich by beating the Vegas lines and ultimately the multimillion dollar offshore betting circuit He details the excesses and the betrayals the horse trading and the paranoia that are the perks and perils of a lifestyle in which staking inordinate sums of money on the outcome of a single event sometimes as much as 1 million on a football game is a normal part of doing business **Introduction to Criminology** Pamela J. Schram,Joseph A. Schwartz,Stephen G. Tibbetts,2023-10-24 If you are considering a career in any aspect of criminal justice and you want to

know more about the motivations and socio psychological makeup of serious offenders then this book is for you Introduction to Criminology Why Do They Do It applies the dominant theories in the existing criminological literature as to why people commit crimes In addition we examine many recent as well as many hypothetical examples of serious crimes and we demonstrate applications of theory as to why the offenders did what they did While other textbooks do a decent job in discussing the basic theories as well as exploring the various types of crime our book integrates various street crimes within each chapter and applies theories that are appropriate in explaining such criminal activity This is extremely important because most instructors never get to the latter typology chapters in a given semester or term So our approach is to incorporate them into the theoretical chapters in which they apply directly to the theories presented Our specific examples and true stories such as notable serial killings and other recent crimes in each chapter as well as our use of established theoretical models to explain the offenses is another primary distinction of this book Obviously this book is meant to be central to an introductory course in criminology but due to the emphasis on applied theoretical explanations it is also appropriate for higher level undergraduate and graduate courses in criminological theory or as a reference for anyone in the field of criminal justice In it we have integrated true crimes and some hypothetical examples both on a general level such as in the Applying Crime to Theory sections and more specifically in the Why Do They Do It sections which often involve serial killings mass murderers or other notorious examples of offenders offending The subtitle of our book Why Do They Do It relates to our theme Our goal in writing this book was to apply established theories of crime which are often seen as abstract and hypothetical to real crimes that have occurred as well as to hypothetical ones that are quite likely to occur To this end we explore the various reasons for offending or the why they do it in various cases from the first documented serial killers in the United States the Harpe Brothers in the late 18th century to California cop killer spree killer Christopher Dorner in 2013 and then Payton S Gendron who massacred 10 Black shoppers at a grocery store in Buffalo New York in 2022 Importantly throughout these discussions of actual crimes we will apply theories As you will see some of the theories that applied to the earliest crimes seem to apply to the most modern crimes as well Unlike other authors in this field we chose not to include separate chapters on violent or property crimes because we have worked those into and applied them to the theories explored in each chapter We strongly believe that by integrating discussions of such serious crimes all crimes previously identified by the FBI as Index or Part I offenses including murder rape robbery aggravated assault burglary motor vehicle theft larceny and arson as well as other crimes such as simple assault and driving under the influence into the theoretical chapters provides the best exploration of why people commit such offenses And the flip side is good as well by discussing offenses together with theories we show you how to apply theories toward explaining other instances of criminal behavior Again this goes back to our theme of why do they do it It demonstrates our goal Apply the appropriate theories for the specific crime
