User Experiences approaches design and design thinking as something distinct that needs to be better understood by both designers and the people with whom they need to work in order to achieve success with new products and systems. So while the focus is on design, the approach is holistic. Hence the book speaks to designers, usability specialists, the HCI community, product managers, and business executives. There is an emphasis on balancing the back end concern with usability and engineering excellence, getting the design right with an up front investment in sketching and ideation, getting the right design. Overall the objective is to build the notion of informed design, molding emerging technology into a form that serves our society and reflects its values. Grounded in both practice and scientific research, Bill Buxton's engaging work aims to spark the imagination while encouraging the use of new techniques, breathing new life into user experience design. Covers sketching and early prototyping, design methods suitable for dynamic product capabilities, cell phones that communicate with each other, and other embedded systems, smart appliances, and things you only imagine in your dreams. Thorough coverage of the design sketching method, which helps easily build experience prototypes without the effort of engineering prototypes, which are difficult to abandon. Reaches out to a range of designers, including user interface designers, industrial designers, software engineers, usability engineers, product managers, and others. Full of case studies, examples, exercises, and projects, and access to video clips that demonstrate the principles and methods.

This Fourth Edition has been thoroughly updated to reflect the growing influence of digital drawing. Features include: More than 1,500 drawings and photographs that demonstrate the various principles, methods, and types of architectural drawing. Examples by an impressive array of notable architects and firms, including Tadao Ando, Asymptote, Santiago Calatrava, Coop Himmelb(l)au, Norman Foster, Frank Gehry, Zaha Hadid, Steven Holl, Arata Isozaki, Toyo Ito, Gudmundur Jonsson, Kohn Pedersen Fox, Ricardo Legorreta, Morphosis, Patkau Architects, Pei Partnership Architects, LLP, Renzo Piano, Antoine Predock, SANAA, David Serero, Studio Daniel Libeskind, Studio Gang, Bing Thom, Tod Williams and Billie Tsien, and UN Studio. A new chapter on guidelines for portfolio building. Content organized in a streamlined, easy to use fashion. Supplementary online instructor resources, including PowerPoint slides, tied to the book. This volume reveals how architects approach drawing as a process, wherein ideas are given form. As a tool for teaching, these examples become important in students' understanding of the formal and technical aspects of design thought. In an age of digital technologies, this work emphasizes the intimate relationship that exists between the drawing and its maker, the process between paper, hand, and mind. LaRaine Papa
