## Studier I Svensk Grammatikhistoria:

Sixty years of Swedish computational lexicography Dana Dannélls,Kristian Blensenius,Lars Borin,2025-06-02 Swedish computational lexicography has a long history at the University of Gothenburg both in its primary role as a central aspect of the scientific study of vocabulary and also as an infrastructural component for conducting research based on language data Starting in the 1960s the Spr kdata research group pioneered corpus supported lexicography for Swedish forming the basis for successive editions of two main descriptive dictionaries of contemporary Swedish SAOL and SO Language technological lexical resources for Swedish have been developed by the research unit research infrastructure Spr kbanken Text since the turn of the millennium most recently in the framework of the Swedish FrameNet initiative After two decades of separation these two largely mutually independently developed strands of computational lexicography have now joined forces under the umbrella of Spr kbanken s lexical research infrastructure to advance the field technically methodologically and scientifically The result is a vibrant and multifaceted research environment intertwined with and supported by a closely integrated cutting edge computational infrastructure for working with lexical data

**The Written Language Bias in Linguistics** Per Linell,2004-08-02 Linguists routinely emphasise the primacy of speech

over writing Yet most linguists have analysed spoken language as well as language in general applying theories and methods that are best suited for written language Accordingly there is an extensive written language bias in traditional and present day linguistics and other language sciences In this book this point is argued with rich and convincing evidence from virtually all fields of linguistics The Nordic Languages. Volume 1 Oskar Bandle, Kurt Braunmüller, Ernst Hakon Jahr, Allan Karker, Hans-Peter Naumann, Ulf Telemann, Lennart Elmevik, Gun Widmark, 2002 The handbook is not tied to a particular methodology but keeps in principle to a pronounced methodological pluralism encompassing all aspects of actual methodology Moreover it combines diachronic with synchronic systematic aspects longitudinal sections with cross sections periods such as Old Norse transition from Old Norse to Early Modern Nordic Early Modern Nordic 1550 1800 and so on The description of Nordic language history is built upon a comprehensive collection of linguistic data it consists of more than 200 articles written by a multitude of authors from Scandinavian and German and English speaking countries The organization of the book combines a central part on the detailed chronological developments and some chapters of a more general character chapters on theory and methodology in the beginning and on overlapping spatio temporal topics in the end

*Morphosyntactic change in Late Modern Swedish* Ida Larsson, Erik M. Petzell, 2022-03-16 This volume explores morphosyntactic change in the Late Modern Swedish period from the 18th century and onwards This period is interesting for a number of reasons This is when Swedish is established as a national standard language New genres emerge and the written language becomes more generally available to all speakers We also sometimes find diverging developments in the different North Germanic languages and some of the much discussed differences between Danish Norwegian and Swedish are established during this period In addition during the 19th and 20th centuries the traditional dialects undergo more dramatic changes than ever Yet the Late Modern Swedish period has previously received fairly little attention in the syntactic literature This volume aims to remedy this with studies that cover several different grammatical domains including case and verbal syntax word order and agreement and grammaticalization in the nominal domain The study by Cecilia Falk investigates the possibility of promoting an indirect object to subject in a passive that emerges during the period A chapter by Fredrik Valdeson studies change in the use of ditransitive verbs from a constructional perspective Three chapters are concerned with word order change The study by Ida Larsson and Björn Lundquist investigates the development of a strict word order in particle constructions Adrian Sangfelt studies the possibility of having adverbials and other constituents between the separate verbal heads in complex VPs in the final stages of the shift from OV to VO order Erik M Petzell investigates embedded verb placement and agreement morphology in the Viskadalian dialect which on the surface seems to contradict the Rich Agreement Hypothesis Mikael Kalm discusses the emergence of different kinds of adverbial infinitival clauses in the standard written language compared to vðalian Finally the study by Lars Olof Delsing is concerned with a case of grammaticalization in the nominal domain specifically the development of the gradable adjectives *mycket* much and *lite*
