Over the past few decades the book series *Linguistische Arbeiten* Linguistic Studies comprising over 500 volumes has made a significant contribution to the development of linguistic theory both in Germany and internationally The series will continue to deliver new impulses for research and maintain the central insight of linguistics that progress can only be made in acquiring new knowledge about human languages both synchronically and diachronically by closely combining empirical and theoretical analyses To this end we invite submission of high quality linguistic studies from all the central areas of general linguistics and the linguistics of individual languages which address topical questions discuss new data and advance the development of linguistic theory

The Languages of Native North America Marianne Mithun, 2001-06-07 This book provides an authoritative survey of the several hundred languages indigenous to North America These languages show tremendous genetic and typological diversity and offer numerous challenges to current linguistic theory Part I of the book provides an overview of structural features of particular interest concentrating on those that are cross linguistically unusual or unusually well developed These include syllable structure vowel and consonant harmony tone and sound symbolism polysynthesis the nature of roots and affixes incorporation and morpheme order case grammatical distinctions of number gender shape control location means manner time empathy and evidence and distinctions between nouns and verbs predicates and arguments and simple and complex sentences and special speech styles Part II catalogues the languages by family listing the location of each language its genetic affiliation number of speakers major published literature and structural highlights Finally there is a catalogue of languages that have evolved in contact situations *Word Order in the Biblical Hebrew Finite Clause* Adina

Moshavi, 2010-06-30 Over the last 40 years the study of word order variation has become a prominent and fruitful field of research Researchers of linguistic typology have found that every language permits a variety of word order constructions with subject verb and objects occupying varying positions relative to each other It is frequently possible to classify one of the word orders as the basic or unmarked order and the others as marked Moshavi's study investigates word order in the finite nonsubordinate clause in classical Biblical Hebrew A common marked construction in this type of clause is the preposing construction in which a subject object or adverbial is placed before the verb In this work Moshavi formally distinguishes preposing from other marked and unmarked constructions and explores the distribution of these constructions in Biblical

Hebrew She carries out a contextual analysis of a sample the book of Genesis of preposed clauses in order to determine the pragmatic functions that preposing may express Moshavi s thesis is that the majority of preposed clauses can be classified as one of two syntactic pragmatic constructions focusing or topicalization This meticulous yet approachable study will be useful both to students of Biblical Hebrew and to persons doing general study of syntax especially those interested in the

connection between linguistic form and pragmatic meaning **Information Structure and Sentence Form** Knud Lambrecht,1996-11-13 Why do speakers of all languages use different grammatical structures under different communicative circumstances to express the same idea Professor Lambrecht explores the relationship between the structure of the sentence and the linguistic and extra linguistic context in which it is used His analysis is based on the observation that the structure of a sentence reflects a speaker s assumption about the hearer s state of knowledge and consciousness at the time of the utterance This relationship between speaker assumptions and formal sentence structure is governed by rules and conventions of grammar in a component called information structure Four independent but interrelated categories are analysed presupposition and assertion identifiability and activation topic and focus **Edge-Based Clausal Syntax** Paul M. Postal,2010-12-17 An argument that there are three kinds of English grammatical objects each with different syntactic properties In Edge Based Clausal Syntax Paul Postal rejects the notion that an English phrase of the form V DP invariably involves a grammatical relation properly characterized as a direct object He argues instead that at least three distinct relations occur in such a structure The different syntactic properties of these three kinds of objects are shown by how they behave in passives middles able forms tough movement wh movement Heavy NP Shift Ride Node Raising re prefixation and many other tests This proposal renders Postal s position sharply different from that of Chomsky who defined a direct object structurally as NP VP and with the traditional linguistics text s definition of the direct object as the DP sister of V According to Postal s framework sentence structures are complex graph structures built on nodes vertices and edges arcs The node that heads a particular edge represents a constituent that bears the grammatical relation named by the edge label to its tail node This approach allows two DPs that have very different grammatical properties to occupy what looks like identical structural positions The contrasting behaviors of direct objects which at first seem anomalous even grammatically chaotic emerge in Postal s account as nonanomalous as symptoms of hitherto ungrasped structural regularity **Studies on Semantics in**

H. van Schooneveld,2020-10-26 No detailed description available for Roman Jakobson [Native Languages of the Americas](#) Thomas Sebeok,2013-11-11 Thirteen of the chapters that comprise the contents of this first volume of Native Languages of the Americas were originally commissioned by the undersigned in his capacity as Editor of the fourteen volume series 1963 1976 Current Trends in Linguistics All appeared in 1973 under Part Three of the quadripartite Vol 10 subtitled Linguistics in North America Two additional chapters are being held over for the

volume to follow shortly devoted to Central and South American languages and linguistics where they more appropriately belong. A fourteenth chapter on the Historiography of native North American linguistics was written similarly by invitation for Vol 13 subtitled Historiography of Linguistics published in 1975. Both Volumes 10 and 13 were jointly financed by the United States National Science Foundation and National Endowment for the Humanities with an enhancing contribution to the former by the Canada Council. The generosity of these funding agencies was of course previously acknowledged in my respective Editor's Introductions to the two books mentioned but cannot be repeated too often without their welcome and timely assistance the global project could scarcely have been realized on so comprehensive a scale. The Current Trends in Linguistics series was a long term venture of Mouton Publishers of The Hague under the imaginative in house direction of Peter de Ridder. Various spin offs were foreseen and some of them happily realized. *Ibss: Anthropology: 1971*

International Committee for Social Science Information and Documentation, 1973-08-09. First published in 1973. Routledge is an imprint of Taylor Francis, an informal company. **Developing Minority Language Resources** Guadalupe Valdés, 2006-01-01. This book documents ongoing language shift to English among Latino professionals in California. It then describes current instructional practices used in the teaching of Spanish as an academic subject at the high school and university levels to heritage language students who although educated entirely in English acquired Spanish at home as a first language. It specifically examines the potential contribution of these instructional practices to the maintenance of Spanish.

A Cognitive-Functional Approach to Nominalization in English Liesbet Heyvaert, 2015-06-03. The book presents a systematic theoretical account of the fundamental constructional mechanisms that underlie deverbal nominalization in general and it makes an original descriptive contribution by discussing a number of nominalization systems in detail. The main theoretical motif is that nominalization strongly calls for a functional rather than purely structural approach. The book goes more deeply into a number of functional constructs needed to model nominalization drawn from Cognitive Grammar and Systemic Functional Grammar and it elaborates on the internal functional organization of nominal and clausal structure e.g. the notions of type specification, instantiation and grounding. Langacker 1991 are discussed in detail and shown to be crucial for the analysis of deverbal nominalization. It is argued that deverbal nominalizations are basically reclassifications of verbal predicates into nominal constructions. This reclassification either applies at word rank or it involves the rank shift Halliday 1966 of a clause-like unit with its internal structure preserved e.g. signing the contract quickly. The reclassified unit then adopts a specific nominal strategy with some form of nominal determination and quantification e.g. her signing the contract quickly. The descriptive part of the book zooms in on nominalizations that are derived at word rank: deverbal *er* nominals and on nominalizations applying to a temporal clausal head e.g. John's playing the piano and finite clauses. Of the gerundive and finite types of nominalization those that function in factive contexts are focused on. In the analysis of deverbal *er* nominals a case is made for a subject analysis of the system and an elaborate discussion of the clausal middle construction e.g. this book

reads easily which is argued to show systematic resemblances with non agentive or nominals is included Of the remaining nominalization types John's playing the piano playing the piano the fact that he plays the piano that he plays the piano especially the nominal behaviour e.g. proper name vs common noun strategy and in the case of gerundive nominals the various structural and semantic subtypes that can be distinguished among them are discussed The Syntax and Semantics of the Perfect Active in Literary Koine Greek Robert Crellin, 2016-04-18 The Syntax and Semantics of the Perfect Active in Literary Koine Greek incorporates linguistic insights from both neo Davidsonian and Chomskyan traditions to present a unified semantic description of the perfect and pluperfect in literary Koine Greek Offers a comprehensive and unified account of the Greek perfect that considers its behaviour in terms of tense and aspect as well as voice or diathesis Features insights from the neo Davidsonian and Chomskyan semantic traditions while addressing the perfect tense in Koine Greek Incorporates syntactic and semantic frameworks to provide an account of the perfect in terms of the causative alternation and aspectual classes of predicate Utilizes a large corpus of material that has not been previously discussed in a linguistic sense relating to the question of the semantics of the Greek perfect *Bilingualism Or Not* Tove Skutnabb-Kangas, 1981 This book deals with bilingualism particularly as it relates to migrants and indigenous minorities The book begins with a purely linguistic coverage of bilingualism and then deals with the prerequisites and consequences of bilingualism from the perspectives of psychology and pedagogy Type Noun Constructions in Slavic, Germanic and Romance Languages Wiltrud Mihatsch, Inga Hennecke, Anna Kisiel, Alena Kolyaseva, Kristin Davidse, Lieselotte Brems, 2023-04-27 This volume is the first dedicated to the comprehensive in depth analysis of constructions with nouns like type and sort It focuses on type noun constructions in Romance Germanic and Slavic languages integrating the different descriptive traditions that had been developed for each language family As a result a greater variety of type noun constructions is revealed than in the hitherto more fragmented literature But attention is also drawn to the cross linguistic similarity of the new pragmatic meanings such as ad hoc and approximative categorization hedging focus and filler uses and the new grammatical functions in NPs e.g. phoric uses clauses e.g. adverbial uses and complex sentences e.g. quotatives The volume offers survey chapters of type noun constructions in each language family as well as contributions focusing on specific aspects in one or two languages such as their grammar semantics and pragmatics diachronic development discursive and sociolinguistic variety These complementary methodologies elucidate the unique cross linguistic field of type noun constructions both descriptively and theoretically Hence this volume can also serve as a model for similar surveys in other functional domains *Indefinite Pronouns* Martin Haspelmath, 2000 Presents an encyclopaedic investigation of indefinite pronouns in the languages of the world This book shows that the range of variation in the functional and formal properties of indefinite pronouns is subject to a set of universal implicational constraints and proposes explanations for these universals *The Seal of Biliteracy* Amy J. Heineke, Kristin J. Davin, 2020-02-01 This edited volume examines the Seal of Biliteracy SoBL a relatively new policy initiative

that has received little attention in scholarly and practical literature. The contributions seek to expand the literature by presenting case studies of policy implementation in diverse contexts across the United States. This book is organized into four sections: 1. introduction to the SoBL including history of the policy initiative and national trends in policy design and implementation; 2. case studies of macro level policy implementation including a diverse array of contexts across the country that have approached the SoBL in unique ways e.g. legislation v. educational code prioritizing world v. home languages; 3. case studies of micro level implementation including schools and districts that award the SoBL to diverse student populations through various language programs e.g. English dominant v. linguistically diverse world language v. dual language programs; and 4. conclusions and future directions including actionable next steps for policy makers, administrators, educators, and researchers. Members of various professional organizations will benefit from this text including the National Association for Bilingual Education (NABE), Teachers of English to Speakers of Other Languages (TESOL), the American Council for Teaching of Foreign Languages (ACTFL), as well as participants in local affiliates for bilingual English as a second language (ESL) and world language education.
