Studies in International Taxation Alberto Giovannini,R. Glenn Hubbard,Joel Slemrod,2007-12-01 As a united global economy evolves economists and policymakers are forced to consider whether the current system of taxing income is inconsistent with the trend toward liberalized world financial flows and increased international competition To help assess existing tax policies and incentives this volume presents new research on how taxes affect the investment and financing decisions of multinationals today The contributors examine the effects of taxation on decisions about international financial management business investment and international income shifting They consider the influence of tax rules on dividend policy decisions within multinationals the extent to which tax incentives affect the level and location of research and development across countries and the fact that foreign controlled companies operating in the United States pay lower taxes than do domestically controlled companies The contributors to this volume are Rosanne Altshuler Alan J Auerbach Neil Bruce Timothy Goodspeed Roger H Gordon Harry Grubert Bronwyn H Hall David Harris Kevin Hassett James R Hines Jr Roy D Hogg Joosung Jun Jeffrey K Mackie Mason Jack M Mintz Randall Morck John Mutti T Scott Newlon James M Poterba Joel Slemrod Deborah Swenson G Peter Wilson and Bernard Yeung

Studies in International Taxation Alberto Giovannini,R. Glenn Hubbard,Joel Slemrod,1993-09-15 This book presents research on how taxes affect the investment and financing decisions of multinationals The contributors examine the effects of taxation on decisions about international financial management business investment and international income shifting They consider the influence of tax rules on dividend policy decisions within multinationals the extent to which tax incentives affect the level and location of research and development across countries and the fact that foreign controlled companies operating in the United States pay lower taxes than do domestically controlled companies

Issues in International Taxation International Tax Avoidance and Evasion Four Related Studies OECD,1987-04-30 The first report outlines the reasons why international tax avoidance and evasion through the use of tax havens is a concern to the tax authorities of OECD Member countries and examines measures introduced to combat such use The second report sets out the problems posed for tax administrations by the fact that their resident taxpayers make use of base companies generally subsidiary companies in tax havens to shelter there income derived from source countries which may in some cases be the residence country itself and in that way to escape tax normally payable to the country of residence The third report deals with the problems created for tax authorities in source countries by the mechanism of treaty shopping The final report deals with taxation and the abuse of bank secrecy

relating to income flows and the payment of dividends Among the topics and issues analysed in depth are the following foreign tax credits taxation in the digital economy tax incentives intellectual property group treasury companies mergers and acquisitions leasing derivatives controlled foreign corporation provisions VAT and customs tariffs free trade agreements and customs unions transfer pricing role of tax treaties hedging related accounting issues deferred tax assets and liabilities tax risk management supply chain management depreciation allowances and carry forward tax losses The book includes descriptions of 21 country tax systems and ten detailed case studies applying the analysis to specific examples Detailed up to date attention is paid to the OECD Action Plan on Base Erosion and Profit Shifting BEPS and other measures against tax avoidance As a full scale commentary and analysis of international taxation issues for multinational manufacturing groups including in depth consideration of corporate structures tax treaties transfer pricing and current developments this book is without peer It will prove of inestimable value to all accountants lawyers economists financial managers and government officials working in international trade environments **International Taxation of Cloud Computing** Alexander

Weisser,2020-10-07 Cloud computing may be borderless but taxes are territorial It is easy to imagine how the two concepts can clash Much effort has gone into harmonizing tax rules across borders with the result that many jurisdictions have very similar tax rules Even so taxation remains a basic expression of national sovereignty The goal of this thesis is to examine how international tax law applies to the cross border cloud computing business Both multinational providers and customers of cloud computing services are analyzed Reflecting three traditional areas of international tax scholarship the goal could be stated in three questions Which jurisdictions have the right to tax What kinds of cloud computing transactions can be taxed What amount of the profit is taxable In more technical terms this means enquiring into how the use of cloud computing affects the permanent establishment status of taxpayers how the different kinds of cloud computing transactions are characterized under international double taxation treaties and how the calculation of taxable cloud computing profit is affected by transfer pricing In light of the current political events the thesis also offers recommendations de lege lata through a systematic approach Its first part assesses the current taxation of cloud computing The second part evaluates whether the findings of this initial assessment conform to various superior principles of good rulemaking It identifies which of the present tax rules ought to be adapted The final part considers how the rules could be amended to become more compliant with the superior principles In this way Part I embodies the thesis Part II the antithesis and Part III seeks a synthesis **International Tax Policy and Double Tax Treaties** Kevin Holmes,2007 Explains the concepts that underlie

international tax law and double tax treaties and provides an insight into how international tax policy law and practice operate to ultimately impose tax on international business and investment **International Taxation of Banking** John Abrahamson,2020-02-20 Banking is an increasingly global business with a complex network of international transactions within multinational groups and with international customers This book provides a thorough practical analysis of

international taxation issues as they affect the banking industry Thoroughly explaining banking s significant benefits and risks and its taxable activities the book s broad scope examines such issues as the following taxation of dividends and branch profits derived from other countries transfer pricing and branch profit attribution taxation of global trading activities tax risk management provision of services and intangible property within multinational groups taxation treatment of research and development expenses availability of tax incentives such as patent box tax regimes swaps and other derivatives loan provisions and debt restructuring financial technology FinTech group treasury interest flows and thin capitalisation tax havens and controlled foreign companies and taxation policy developments and trends Case studies show how international tax analysis can be applied to specific examples The Organisation for Economic Co operation and Development Base Erosion and Profit Shifting OECD BEPS measures and how they apply to banking taxation are discussed The related provisions of the OECD Model Tax Convention are analysed in detail The banking industry is characterised by rapid change including increased diversification with new banking products and services and the increasing significance of activities such as shadow banking outside current regulatory regimes For all these reasons and more this book will prove to be an invaluable springboard for problem solving and mastering international taxation issues arising from banking The book will be welcomed by corporate counsel banking law practitioners and all professionals officials and academics concerned with finance and its tax ramifications

*Tax Havens: International Tax Avoidance and Evasion* Jane Gravelle, 2009 The first section of this report reviews what countries might be considered tax havens including a discussion of the Organization for Economic Development and Cooperation OECD initiatives and lists The next two sections discuss in turn the corporate profit shifting mechanisms and evidence on the existence and magnitude of profit shifting activity The following two sections provide the same analysis for individual tax evasion The report concludes with overviews of alternative policy options and a summary of specific legislative proposals

**International Tax Coordination** Martin Zagler, 2010-06-30 The book combines interdisciplinary teams from business economics information science law and political science to offer a unique and innovative interdisciplinary approach to the issue of international tax coordination

**Exploring the Nexus Doctrine In International Tax Law** Ajit Kumar Singh, 2021-05-14 In an age when cross border business transactions are increasingly effected without the transference of physical products revenue concerns of states have led to a multitude of tax disputes based on the concept of nexus This important and timely book is the most authoritative to date to discuss one of the major tax topics of our time the question of how taxing rights on income generated from cross border activities in the digital age should be allocated among jurisdictions Demonstrating in prodigious depth that it is the economic nexus of the tax entity or activity with the state and not the physical nexus which meets the jurisdictional requirement the author a leading authority on this area who is a Senior Commissioner of Income Tax and a Member of the Dispute Resolution Panel of the Government of India addresses such dimensions of the subject as the following whether a strict territorial nexus as a normative principle is

ingrained in source rule jurisprudence detailed scrutiny of such classical doctrines as benefit theory neutrality theory and international equity comparative critique of the Organisation for Economic Co operation and Development OECD and United Nation UN model tax treaties whether international law and customary principles mandate a strict territorial link with the source state for the assumption of tax jurisdiction whether the economic nexus based tax jurisdiction and absence of a physical presence breach the constitutional doctrine of extraterritoriality or due process and whether retrospective tax legislation breaches the principle of constitutional fairness The book offers a politically informed analysis of the nexus principle and balances the dynamics of physical presence and economic nexus standards based on an in depth survey of the historical evolution of judicial pronouncements and international practices in this regard Dr Singh s book exposes an urgently needed missing link in the international source rule literature and takes a giant step towards solving the thorny question of appropriate tax apportionment It sheds brilliant light on the policies states may adopt when signing new tax treaties so that unintended results may be foreseen and avoided Tax practitioners taxation authorities and academic researchers in the field of international tax law and policy will greatly appreciate the book s forthright enhancement of the ability to defend challenges based on the nexus doctrine
