Studies In Islamic Science And Polity:

Studies in Islamic Science and Polity Masudul Alam Choudhury, 1998 There has been a great revival of interest in recent years in the concerns of Islamic political economy after several hundred years of hiatus in its long history The independence of Muslim countries and the revival of Islamic movements around the world have been among the factors encouraging new interest among the Muslims and others in how economies and economic theory can be brought into line with the Islamic vision of a just society This text attempts to show that the contribution which Islamic political economy can make requires a study first of epistemological principles about the purpose and sources of knowledge the role of reason and the relationship between self and social interest in human affairs The conclusions which arise from this analysis about the role and limits of markets the goal of combining efficiency and equity and the means of doing so with state provision of welfare everywhere in crisis will prove illuminating all of those interested in Islamic studies and political economy as well as to other observers and analysts of contemporary society Studies in Islamic Political Science M. Choudhury, 1998-05-27 There has been a great revival of interest in recent years in the concerns of Islamic political economy after several hundred years of hiatus in its long history The independence of Muslim countries and the revival of Islamic movements around the world have been among the factors encouraging new interest among the Muslims and others in how economies and economic theory can be brought into line with the Islamic vision of a just society Masudul Alam Choudhury shows that the contribution which Islamic political economy can make requires a study first of epistemological principles about the purpose and sources of knowledge the role of reason and the relationship between self and social interest in human affairs The conclusions which arise from this analysis about the role and limits of markets the goal of combining efficiency and equity and the means of doing so with state provision of welfare everywhere in crisis will prove illuminating to all of those interested in Islamic studies and political economy as well as to other observers and analysts of contemporary society *Tawhidi Epistemology and its Applications* Masudu Alam Choudhury, 2014-03-17 This journal has been discontinued Any issues are available to purchase separately *Islamic Epistemics and Socioeconomics* Masudul Alam Choudhury, 2025-06-16 This book presents selected essays on the epistemological foundation of the Islamic world system in the light of the exegesis of the Qur'an to develop existing understandings of Islamic economics A selection of key contributions by one of the world's leading figures working at the nexus of Islamic social sciences Islamic philosophy and Islamic economics the book integrates applied foundations of Islamic economics and Islamic philosophy presenting a critical outlook on the existing state of Islamic economics and Islamic finance within a broader framework of socio-scientific enquiry philosophical perspectives on Islam and philosophy of science The author confronts the absence of epistemic groundwork upon which any fresh social and scientific enquiry is developing in Islamic economics casting the discussion within an explanatory framework of the unity of knowledge as bestowed by Islamic monotheistic law which substantively characterizes the generalization and details of everything The

present work unravels this objective methodology and its application with reference to a limited number of issues and problems in global economics Complex and multidisciplinary in its treatment this book presents the key arguments on mathematical philosophical and socio scientific modes of inquiry in deriving developing and empirically applying the Qur'anic methodology of the unity of knowledge to economic problems It is relevant to scholars and advanced students in social scientific studies of Islam Islamic theology and philosophy and Islamic economics and finance *Socio-Cybernetic Study of God and the World-System* Choudhury, Masudul Alam, 2013-10-31 In any field whether scientific business or social ethics plays a critical role in determining what is acceptable in a particular community and what is considered taboo The source of these preconditions is often a complex interweaving of tradition and rational thought Socio Cybernetic Study of God and the World System investigates morality in a socio scientific worldview examining the epistemology of existence in conjunction with Islamic monotheistic law to generate a world system that governs action and reaction in the context of a variety of cognitive and social environments Readers with backgrounds in finance and economics can utilize this book to construct a more thorough theoretical understanding of their societal and professional associations

Islamic Economics and Finance Masudul Alam Choudhury, 2011-01-27 This volume is a scholarly work on the foundations of the role that the moral and ethical law plays on human enterprise comprising economics finance society and science Divided into three parts theoretical empirical and application the study covers a vast area of socio scientific investigation and is extensively comparative in perspective

Comparative Economic Theory Masudul Alam Choudhury, 2013-03-14 Comparative Economic Theory Occidental and Islamic Perspectives seeks first to elucidate the nature and methodology of Islamic political economy as a process oriented social economy guided by its cardinal epistemology of Oneness of God Divine Unity From this premise is then derived the episteme of unification of knowledge upon which is developed the methodological content of an extremely interactive integrative and revolutionary world view of political economy and a meta theory of the socio scientific order Secondly while laying out the building blocks of Islamic political economy and its much wider methodological implication for the socio scientific order this book offers a comparative study of occidental thought in the same areas Thirdly topics of microeconomics and macroeconomic theory are covered This

book concludes with chapters on methodology and an analytical postscript to show how the interactive integrative and evolutionary world view of knowledge induced systems described by the Islamic political economy presents new visions of scientific thinking

Studies on Ottoman Science and Culture Ekmeleddin İhsanoğlu, 2020-12-29 Studies on Ottoman Science and Culture brings together eleven articles by distinguished historian Ekmeleddin İhsanoğlu. The book addresses multiple issues related to the histories of science and culture during the Ottoman era. Most of the articles contained in this volume were the first contributions to their respective topics and they continue to provoke discussion and debate amongst academics to this day. The first volume of the author's collected papers that appeared in the *Variorum Collected Studies* 2004 dispelled the negative opinions towards Ottoman science asserted by scholars of the previous generation. In this new volume the author continues to explore and develop the paradigm of scientific activities and cultural interactions both within and beyond the Ottoman Empire. One of the topics examined is the attitude of Islamic scholars towards revolutionary notions in Western science including Copernican heliocentrism and Darwin's theory of evolution. This book will appeal to scholars and students of Ottoman history as well as those interested in the history of science and cultural history. CS1098

Islam, Postmodernism and Other Futures Sohail Inayatullah, Gail Boxwell, 2003-02-20 As one of our most high profile Muslim intellectuals he has also become an increasingly important voice in the media since the events of September 11th 2001. This is the first collection of his writings of one of our most high profile Muslim intellectuals offering a comprehensive introduction to his thought. Starting with his analysis of his own position as a British Muslim and a writer it goes on to explore issues of Islam and cultural change, education, identity, post modernism and the future. Drawn from a broad range of his work in scholarly journals as well as from his many books on aspects of culture and society it includes his most frequently cited papers and makes an ideal introduction to the immense scope of his work in cultural studies.

Absolute Reality in the Qur'an Masudul Alam Choudhury, 2016-09-14 This book studies the absolute reality of the Qur'an which is signified by the struggle of truth against falsehood in the framework of monotheistic unity of knowledge and the unified world system induced by the consilience of knowledge. In such a framework the absolute reality reveals itself not by religious dogmatism. Rather the methodology precisely comprises its distinctive parts. These are namely the primal ontology as the foundational explained axiom of monotheistic unity, the secondary ontologies as explanatory replications of the law of unity in the particulars of the world system, epistemology as the operational model and phenomenology as the structural nature of events induced by the monotheistic law that is by knowledge emanating from the law. The imminent methodology remains the unique explanatory reference of all events that take place, advance and change in continuity across continuums of knowledge, space and time.

Comparative Economics in a Transforming World Economy John Barkley Rosser, 2004 The second edition of an innovative undergraduate textbook in Comparative Economic Systems that goes beyond the traditional dichotomies.

Islamic Economics, Growth and Development Mustafa Metin Başbay, 2025-09-01 The study of economic

development is inherently grounded in philosophical and ethical assumptions. In other words, to discuss economic development either at a conceptual level or as a real process necessitates an ethical and philosophical basis. The authors of this book believe that Islamic economics can serve as such a basis, one that emanates from Islamic principles and values. This book presents a distinctive ethical and philosophical framework, one that is grounded in Islamic principles and the established literature of Islamic economics and finance, to analyse and interpret the concept of economic development as well as to propose policy solutions to real world development problems and challenges. The book contains theoretical and empirical studies which connect the literature of Islamic economics with economic development. While some chapters discuss development at the conceptual philosophical level, others examine the real world issues faced by developing countries. It proposes institutional constructs as well as concrete public policies to face developmental challenges such as fighting poverty and inequality, environmental and social sustainability, industrialisation and industrial policy, and social services and human capital. Serving as both an introduction and a comprehensive resource, this book illustrates how the concepts and problems of economic development can be examined from an Islamic economics perspective and as such will equip researchers and students with a basic understanding of how Islamic economics interacts with the issues of economic development.

God, Life, and the Cosmos Ted Peters, Muzaffar Iqbal, Syed Nomanul Haq, 2017-03-02

God, Life, and the Cosmos Christian and Islamic Perspectives is the first book in which Christian and Muslim scholars explore the frontiers of science religion discourse. Leading international scholars present new work on key issues in science and religion from Christian and Islamic perspectives. Following an introduction by the editors, the book is divided into three sections: the first explores the philosophical issues in science religion discourse; the second examines cosmology; the third analyses the issues surrounding bioethics. One of the first books to explore aspects of science religion discourse from the perspective of two religious traditions, *God, Life, and the Cosmos* opens up new vistas to all interested in science and religion and those exploring contemporary issues in Christianity and Islam.

Science and Islam Muzaffar Iqbal, 2007-03-30

Science and Islam provides a detailed account of the relationship between Islam and science from the emergence of the Islamic scientific tradition in the eighth century to the present time. This relationship has gone through three distinct phases. The first phase began with the emergence of science in the Islamic civilization in the eighth century and ended with the rise of modern science in the West. The second period is characterized by the arrival of modern science in the Muslim world, most of which at that time was under colonial occupation. The third period, which began around 1950, is characterized by a more mature approach to the major questions that modern science has posed for all religious traditions. Based on primary sources, the book presents a panorama of Islamic views on some of the major issues in the current science and religion discourse. Written in accessible language, *Science and Islam* is an authentic account of the multi-faceted and complex issues that arise at the interface of Islamic intellectual tradition and science. Rich in historical details, the book is a fascinating survey of the interaction of Islamic beliefs

with the enterprise of science Islamic Studies ,2000 *Islamic Law in Practice* Mashood A. Baderin,2017-03-02 Islamic law influences the lives of Muslims today as aspects of the law are applied as part of State law in different forms in many areas of the world This volume provides a much needed collection of articles that explore the complexities involved in the application of Islamic law within the contemporary legal systems of different countries today with particular reference to Saudi Arabia Morocco Indonesia Nigeria Turkey Malaysia and Pakistan The articles identify the relevant areas of difficulties and also propose possible ways of realising a more effective and equitable application of Islamic law in the contemporary world The volume features an introductory overview of the subject as well as a comprehensive bibliography to aid further research *Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures* Helaine Selin,2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa **American Journal of Islamic Social Sciences 12:1** Yasien Mohamed,Najib Ghadbian,Basit B.
