Renaissance Theories of Vision Charles H. Carman, 2016-12-05 How are processes of vision perception and sensation conceived in the Renaissance How are those conceptions made manifest in the arts The essays in this volume address these and similar questions to establish important theoretical and philosophical bases for artistic production in the Renaissance and beyond The essays also attend to the views of historically significant writers from the ancient classical period to the eighteenth century including Plato Aristotle Plotinus St Augustine Ibn Sina Avicenna Ibn al Haytham Alhazen Ibn Sahl Marsilio Ficino Nicholas of Cusa Leon Battista Alberti Gian Paolo Lomazzo Gregorio Comanini John Davies Rene Descartes Samuel van Hoogstraten and George Berkeley Contributors carefully scrutinize and illustrate the effect of changing and evolving ideas of intellectual and physical vision on artistic practice in Florence Rome Venice England Austria and the Netherlands The artists whose work and practices are discussed include Fra Angelico Donatello Leonardo da Vinci Filippino Lippi Giovanni Bellini Raphael Parmigianino Titian Bronzino Johannes Gump and Rembrandt van Rijn Taken together the essays provide the reader with a fresh perspective on the intellectual confluence between art science philosophy and literature across Renaissance Europe

Perspectiva David C. Lindberg, 1996 David Lindberg presents the first critical edition of the text of Roger Bacon's classic work *Perspectiva* prepared from Latin manuscripts accompanied by a facing page English translation critical notes and a full study of the text Also included is an analysis of Bacon's sources influence and role in the emergence of the discipline of perspectiva About Roger Bacon Roger Bacon c 1220 c 1292 is one of the most renowned thinkers of the Middle Ages a philosopher scientist praised and mythologized for his attack on authority and his promotion of what he called experimental science He was a leading figure in the intellectual life of the thirteenth century a campaigner for educational reform and a major disseminator of Greek and Arabic natural philosophy and mathematical science About *Perspectiva* The science that Roger Bacon most fully mastered was perspectiva the study of light and vision what would later become the science of optics His great treatment of the subject the *Perspectiva* written in about 1260 was the first book by a European to display a full mastery of Greek and Arabic treatises on the subject and through it Bacon was instrumental in defining this scientific discipline for the next 350 years

The Metaphysics of Light in the Hexaemeral Literature Isidoros C. Katsos, 2023-02-14 This volume critically re evaluates the received interpretation of the nature of light in the ancient sources Isidoros C Katsos contests the prevalent view in the history of optics according to which pre modernity theorized light as subordinate to sight oculocentrism by examining in depth the contrary textual evidence found in early Christian texts It shows that from Philo of Alexandria and Origen to Basil of Caesarea and Gregory of Nyssa the Jewish Christian commentary tradition on the hexaemeral literature the biblical creation narrative reflected deeply on the nature and physicality of light for the purposes of understanding the structure and purpose of material creation Contemplation of

nature allowed early Christian thinkers to conceptualize light as the explanatory principle of vision rather than subordinated to it. Contrary to the prevalent view, the hexaemeral literature necessitates a luminocentric interpretation of the theory of light of Plato's *Timaeus* in its reception history in the context of late antique cosmology. Hexaemeral luminocentrism invites the reader of Scripture to grasp not only the sensible properties of light but also their causal principle as the first manifestation of the divine Logos in creation. The hexaemeral metaphysics thus provides the missing ground of meaning of the early Christian language of light. *The Routledge Companion to Art and Disability* Keri Watson, Timothy W.

Hiles, 2022-03-30 *The Routledge Companion to Art and Disability* explores disability in visual culture to uncover the ways in which bodily and cognitive differences are articulated physically and theoretically and to demonstrate the ways in which disability is culturally constructed. This companion is organized thematically and includes artists from across historical periods and cultures in order to demonstrate the ways in which disability is historically and culturally contingent. The book engages with questions such as: How are people with disabilities represented in art? How are notions of disability articulated in relation to ideas of normality, hybridity, and anomaly? How do artists use visual culture to affirm or subvert notions of the normative body? Contributors consider the changing role of disability in visual culture, the place of representations in society, and the ways in which disability studies engages with and critiques intersectional notions of gender, race, ethnicity, class, and sexuality. This book will be particularly useful for scholars in art history, disability studies, visual culture, and museum studies.

Scientific Controversies Dominique Raynaud, 2017-07-05 In *Scientific Controversies* Dominique Raynaud shows how organized debates in the sciences help us establish or verify our knowledge of the world. If debates focus on form, scientific controversies are akin to public debates that can be understood within the framework of theories of conflict. If they focus on content, then such controversies have to do with a specific activity and address the nature of science itself. Understanding the major focus of a scientific controversy is a first step toward understanding these debates and assessing their merits. Controversies of unique socio-historic context, disciplines, and characteristics are examined: Pasteur's germ theory and Pouchet's theory of spontaneous generation; vitalism advocated at Montpellier versus experimental medicine in Paris; the science of optics about the propagation of visual rays; the origins of relativism; the Duhem-Quine problem; Touching on the work of Boudon, Popper, and others, Raynaud puts forward an incrementalist theory about the advancement of science through scientific controversies. The debates Raynaud has selected share in common their pivotal importance to the history of the sciences. By understanding the role of controversy, we better understand the functioning of science and the stakes of the contemporary scientific debates. *Aufstieg und Niedergang der römischen Welt: Principat.* v Hildegard

Temporini, Wolfgang Haase, 1994 **The Judgment of Sense** David Summers, 1990-02-23 With the rise of naturalism in the art of the late Middle Ages and the Renaissance, there developed an extensive and diverse literature about art which helped to explain, justify, and shape its new aims. In this book, David Summers provides an investigation of the philosophical and

psychological notions invoked in this new theory and criticism From a thorough examination of the sources he shows how the medieval language of mental discourse derived from an understanding of classical thought **Writing Signs** Irene A. Bierman,1998-12-16 Bierman considers how the Fatimid rulers used public writing to present their own ideology to different members of society in Cairo in the 10th to 12th centuries and the ways in which it was received *Theophrastus Against the Presocratics and Plato* H. Baltussen,2000 This study of Theophrastus much neglected *De sensibus* offers a new interpretation of the treatment of the Presocratic and Platonic views on sense perception and provides new insight into Theophrastus exegetical procedure by using Peripatetic dialectic as a heuristic tool *Medieval Science, Technology, and Medicine* Thomas F. Glick,Steven Livesey,Faith Wallis,2014-01-27 Medieval Science Technology and Medicine details the whole scope of scientific knowledge in the medieval period in more than 300 A to Z entries This resource discusses the research application of knowledge cultural and technology exchanges experimentation and achievements in the many disciplines related to science and technology Coverage includes inventions discoveries concepts places and fields of study regions and significant contributors to various fields of science There are also entries on South Central and East Asian science This reference work provides an examination of medieval scientific tradition as well as an appreciation for the relationship between medieval science and the traditions it supplanted and those that replaced it For a full list of entries contributors and more visit the Routledge Encyclopedias of the Middle Ages website *The Enlightened Joseph Priestley* Robert E. Schofield,2010-11 Joseph Priestley 1733 1804 is one of the major figures of the English Enlightenment A contemporary and friend of Benjamin Franklin and Thomas Jefferson he exceeded even these polymaths in the breadth of his curiosity and learning Yet no one has attempted an all inclusive biography of Priestley probably because he was simply too many persons for anyone easily to comprehend in a single study Robert Schofield has devoted a lifetime of scholarship to this task The result is a magisterial book covering the life and works of Priestley during the critical first forty years of his life Although Priestley is best known as a chemist this book is considerably more than a study in the history of science As any good biographer must Schofield has thoroughly studied the many activities in which Priestley was engaged Among them are theology electricity chemistry politics English grammar rhetoric and educational philosophy Schofield situates Priestley the provincial dissenter within the social political and intellectual contexts of his day and examines all the works Priestley wrote and published during this period Schofield singles out the first forty years of Priestley s life because these were the years of preparation and trial during which Priestley qualified for the achievements that were to make him famous The discovery of oxygen the defenses of Unitarianism and the political liberalism that characterize the mature Priestley all are foreshadowed in the young Priestley A brief epilogue looks ahead to the next thirty years when Priestley was forced out of England and settled in Pennsylvania the subject of Schofield s next book But this volume stands alone as the definitive study of the making of Joseph Priestley *The Innate Mind* Peter Carruthers,Stephen Laurence,Stephen Stich,2005-07-14 This is the first

volume of a projected three volume set on the subject of innateness The extent to which the mind is innate is one of the central questions in the human sciences with important implications for many surrounding debates By bringing together the top nativist scholars in philosophy psychology and allied disciplines these volumes provide a comprehensive assessment of nativist thought and a definitive reference point for future nativist inquiry The Innate Mind Structure and Content concerns the fundamental architecture of the mind addressing such question as What capacities processes representations biases and connections are innate How do these innate elements feed into a story about the development of our mature cognitive capacities and which of them are shared with other members of the animal kingdom The editors have provided an introduction giving some of the background to debates about innateness and introducing each of the subsequent essays as well as a consolidated bibliography that will be a valuable reference resource for all those interested in this area The volume will be of great importance to all researchers and students interested in the fundamental nature and powers of the human mind Together the three volumes in the series will provide the most intensive and richly cross disciplinary investigation of nativism ever undertaken They point the way toward a synthesis of nativist work that promises to provide a new understanding of our minds and their place in the natural order

Baghdad and Isfahan Elaheh Kheirandish,2021-04-22 Renowned as great centres of learning the cities of Baghdad and Isfahan were at the heart of the Islamic civilization as rich capital cities and centres of intellectual thought Their distinct cultural voices inspired a unique historical dialogue which finds new expression in Baghdad and Isfahan the story of how knowledge was transmitted and transformed within Islamic lands and then spread across Europe Capturing the history of Baghdad and Isfahan from 750 to 1750 Elaheh Kheirandish draws on the voices of court astronomers mathematicians scientists mystics jurists statesmen and Arabic and Persian translators and scholars to document the extensive and lasting contribution of sciences from Islamic lands to the history of science Kheirandish bases her narrative on a unique medieval manuscript and other historical sources and the result is more than a thousand year tale of two cities it is a city by city and century by century look at what it took to change the world In a feat of travelogue and time travel this unique book creates parallel stories with modern and historical characters crossing cities worldwide and capturing changes through time

Interweaving multiple narratives histories and futures she charts the possible paths formalized and serendipitous lost and recovered by which knowledge itself is translated and transmitted across time and cultures

Lucretius and the End of Masculinity Michael Pope,2023-05-25 From beginning to end the De rerum natura upsets expectations This book s premise is that Lucretius intentionally provokes his imagined male audience playfully and forcefully proving to them that they are not the men they suppose themselves to be From astral bodies to the magnetic draw of human sexuality to the social bonds linking parents to children Lucretius shows that everything is compounded material both a source of atomic issue and receptacle of atomic ingress The universe as Lucretius presents it is a never ending cycle of material interpenetration connectivity and dissolution Roman men in the vastness of it all are only exceptional in their self defeating fantasies Close analysis of Lucretius poetics reveals an unrelenting assault upon the fictions that comprise Roman masculinity from seminal conception in utero to existential decomposition in the grave Nevertheless Lucretius offers an Epicurean vision of masculinity that just might save the Republic

The Corinthian Body Dale B. Martin,1999-01-01 Annotation In this intriguing discussion of Paul s first letter to the Corinthians Dale Martin contends that Paul s various disagreements with the Corinthians were the result of a fundamental conflict over the ideological construction of the human body and hence the church as the body of Christ This led to differing opinions on a variety of theological viewpoints including the role of rhetoric and philosophy in a hierarchical society the eating of meat sacrificed to idols prostitution sexual desire and marriage and the resurrection of the body Book jacket

Robert Kilwardby on the Human Soul José Filipe Silva,2012-06-07 Robert Kilwardby on the Human Soul

is the first in depth study on Kilwardby s contribution to the thirteenth century philosophical and theological debate on the nature of the soul and its relation with the body The book examines his innovative approach to the plurality of substantial forms in the human person and argues against the traditional interpretation of the Prohibitions of 1277 in Oxford as being directed to Thomas Aquinas The investigation into Kilwardby s theory of knowledge provides new insight on his project to integrate Aristotelian and Augustinian doctrines The originality of his account of the active nature of perception and his role in shaping standard views on truth universals and intentions bespeaks of his relevance for understanding later medieval philosophical thought

Medieval Islamic Civilization Josef W. Meri, 2005-10-31 Medieval Islamic Civilization examines the socio cultural history of the regions where Islam took hold between the seventh and sixteenth century This important two volume work contains over 700 alphabetically arranged entries contributed and signed by international scholars and experts in fields such as Arabic languages Arabic literature architecture art history history of science Islamic arts Islamic studies Middle Eastern studies Near Eastern studies politics religion Semitic studies theology and more This reference provides an exhaustive and vivid portrait of Islamic civilization including the many scientific artistic and religious developments as well as all aspects of daily life and culture For a full list of entries contributors and more visit www.routledge.com/middleages/islamic

Mirrors of the Divine Emily R. Cain, 2023-01-30 Mirrors of the Divine examines four early Christian authors Tertullian of Carthage Clement of Alexandria Gregory of Nyssa and Augustine of Hippo and analyzes their writings on vision and knowledge of God to show how they envisioned one s relationship to the world and how they imagined the unknown Emily R Cain explores how contradictory theories of sight shaped their cosmologies theologies subjectivities genders and discursive worlds and shows that early Christian arguments about the phenomenon of visual perception are deeply intertwined with broader debates about identity agency and epistemology
