International Law, Human Rights and Public Opinion Heping Dang, 2017-03-16 This book explores situations in which public opinion presents itself as an obstacle to the protection and promotion of human rights Taking an international law perspective it primarily deals with two questions first whether international law requires States to take an independent stance on human rights issues second whether international law encourages States to inform and mobilise public opinion with regard to core human rights standards The discussion is mainly organised within the framework of the UN system The work is particularly relevant to situations in which public opinion appears as discriminatory attitudes based on race gender age health sexual orientation and other factors It is also pertinent to circumstances in which public opinion is responsible for the existence of certain harmful customs and practices such as female genital mutilation and capital punishment Noting that the death penalty is increasingly recognised as an infringement of human rights this study further challenges States argument that capital punishment cannot be abolished because of public opinion The book also discusses the role that education bears under international law in moulding favourable attitudes towards human rights Finally the book challenges States acceptance that public opinion cannot be confronted in this respect

question What are the electoral consequences of social policy performance and retrenchment More specifically the following questions are addressed in order to provide a systematic test of the topic Is retrenchment indeed completely unpopular Do people punish the government for bad performance in the field of social policy And what are the political implications of such a punishment reaction does it affect the government composition It shows empirically that the risks of welfare state retrenchment to incumbent governments may be lower than previously thought and presents a theoretical framework for re examining the impact of retrenchment initiatives on election outcome Making an important contribution to studies in political economy and welfare by questioning the assumption that social policy is an inherently controversial policy field in times of elections The Risk of Social Policy will be of interest to scholars and students concerned with the interplay between government and citizens social policy and voting behaviour and the political economy of welfare *The ^AOxford Handbook of Electoral Persuasion* Elizabeth Suhay, Bernard Grofman, Alexander H. Saxton, 2020-07-28 Today social media offers an alternative broadcast and communication medium for nonprofit advocacy organizations At the same time social media ushers in a noisy information era that renders it more difficult for nonprofits to make their voices heard This book seeks to unpack the prevalence mechanisms and ramifications of a new model for nonprofit advocacy in a social media age The keyword for this new model is attention Advocacy always starts with attention when an organization speaks out on a cause it must ensure that it has an audience and that its voice is heard by that audience it must ensure that current and potential supporters are paying attention to what it has to say before expecting more tangible outcomes Yet the organization must also ensure that advocacy does not end with attention attention should serve as a springboard to something greater The authors elaborate how attention fits into contemporary organizations advocacy work and explain the key features of social media that are driving the quest for attention Developing conceptual models they explain why some organizations and messages gain attention while others do not Lastly the book explores how organizations are weaving together online and offline efforts to deliver strategic advocacy outcomes Governing for the Long Term Alan M. Jacobs, 2011-03-28 In *Governing for the Long Term* Alan M Jacobs investigates the conditions under which elected governments invest in long term social benefits at short term social cost Jacobs contends that along the path to adoption investment oriented policies must surmount three distinct hurdles to future oriented state action a problem of electoral risk rooted in the scarcity of voter attention a problem of prediction deriving from

the complexity of long term policy effects and a problem of institutional capacity arising from interest groups preferences for distributive gains over intertemporal bargains Testing this argument through a four country historical analysis of pension policymaking the book illuminates crucial differences between the causal logics of distributive and intertemporal politics and makes a case for bringing trade offs over time to the center of the study of policymaking

Improving Survey Response Ineke A. L. Stoop, Jaak Billiet, Achim Koch, Rory Fitzgerald, 2010-03-09 High response rates have traditionally been considered as one of the main indicators of survey quality Obtaining high response rates is sometimes difficult and expensive but clearly plays a beneficial role in terms of improving data quality It is becoming increasingly clear however that simply boosting response to achieve a higher response rate will not in itself eradicate nonresponse bias In this book the authors argue that high response rates should not be seen as a goal in themselves but rather as part of an overall survey quality strategy based on random probability sampling and aimed at minimising nonresponse bias Key features of *Improving Survey Response* A detailed coverage of nonresponse issues including a unique examination of cross national survey nonresponse processes and outcomes A discussion of the potential causes of nonresponse and practical strategies to combat it A detailed examination of the impact of nonresponse and of techniques for adjusting for it once it has occurred Examples of best practices and experiments drawn from 25 European countries Supplemented by the European Social Survey ESS websites containing

materials for the measurement and analysis of nonresponse based on detailed country level response process datasets The book is designed to help survey researchers and those commissioning surveys by explaining how to prioritise the reduction of nonresponse bias rather than focusing on increasing the overall response rate It shows substantive researchers how nonresponse can impact on substantive outcomes
