Studies on Japanese Ostracoda Tetsurō Hanai, 1982 *Evolutionary Biology of Ostracoda* N. Ikeya, K. Ishizaki, T. Hanai, 2011-10-10 There are many competitive works on the market concerning evolutionary biology but this volume is quite distinctive in its idiographic aspect focusing on Ostracoda viewed from a wide range of disciplines ages and environments The book deals with various lines of idiographic biology and palaeontology of Ostracoda and nomothetic trials focusing strongly on evolutionary biology Particular themes are morphology biology evolution speciation ecology palaeoecology deep sea fauna biogeography palaeobiogeography biostratigraphy and exploration all concerning Ostracoda The last decade has witnessed a spectacular renewal of interest in the study of Ostracoda particularly in the evolutionary biology of Ostracoda including speciation Ostracoda are unique ranging in age from the Cambrian period to modern times with carapaces ready to be preserved as fossils providing various lines of invaluable evidence regarding evolutionary processes More than 120 participants from 20 countries assembled at the Ninth International Symposium on Ostracoda and this book is a collection of all the papers presented at the Symposium plus selected papers submitted by non attending members It presents an outstanding record of much pioneering research and will be of interest to specialists in Ostracoda as well as all earth and life scientists concerned with evolution Its value is further enhanced by easy to use indexes of authors localities and taxa

History of Geomorphology and Quaternary Geology R. H. Grapes, 2008 These papers deal with various aspects of the histories of geomorphology and Quaternary geology in different parts of the world They include the origin of the term Quaternary histories of ideas and debates relating to aspects of fluvial geomorphology glacial geomorphology and glaciation desert dunes and the geology of Australia peneplains in China a palaeo Tokyo Bay in Japan together with biographies of Charles Cotton Valerija epulyt and eslovas Pakuckas that highlight their respective contributions to the disciplines of geomorphology and Quaternary geology **The Science Reports of the Tōhoku University, Sendai, Japan** Tōhoku

Martens, Michael Schudack, 2007-12-14 The great diversity of ostracod applications in biology and palaeontology is clearly illustrated by eighteen papers from the 15th International Symposium on Ostracoda Collectively the contributions provide a comprehensive update of ongoing research and the latest findings in ostracod sciences You ll learn how ostracods are used as model groups in a variety of research studies ranging from evolutionary biology to climate change *Japanese Journal of Geology and Geography*, 1922 Vol 19 1944 includes a separately paged special number dated Oct 1943 **Evolutionary Biology and Ecology of Ostracoda** David J. Horne, Koen Martens, 2013-11-11 Ostracoda Crustacea are potentially excellent

model organisms for evolutionary studies because they combine an extensive fossil record with a wide recent distribution and therefore allow studies on both patterns and processes leading to extant diversity The main scientific domains contributing theories concepts and data to evolutionary biology are morphology including ontogeny palaeontology genetics and ecology and to all of these aspects ostracods can contribute This is clearly illustrated by the fifteen papers presented under Theme 3 of the 13th International Symposium on Ostracoda Chatham UK in 1997 which are grouped in the present proceedings one of three volumes resulting from this meeting The contributions deal with the evolution of both extant and fossil forms including most of the Phanerozoic ecology of both marine and freshwater taxa and developmental morphology of both soft parts and valves Although the canvas is wide each paper clearly shows how studies on Ostracoda can be relevant to general theory on evolutionary biology and ecology
