Modern Era Anik Waldow, 2018-02-02 Sensibility in the Early Modern Era investigates how the early modern characterisation of sensibility as a natural property of the body could give way to complex considerations about the importance of affect in morality What underlies this understanding of sensibility is the attempt to fuse Lockean sensationism

with Scottish sentimentalism being able to have experiences of objects in the world is here seen as being grounded in the same principle that also enables us to feel moral sentiments Moral and epistemic ways of relating to the world thus blend into one another as both can be traced to the same capacity that enables us to affectively respond to stimuli that impinge on our perceptual apparatus This collection focuses on these connections by offering reflections on the role of sensibility in the early modern attempt to think of the human being as a special kind of sensitive machine and affectively responsive animal Humans as they are understood in this context relate to themselves by sensing themselves and perpetually refining their intellectual and moral capacities in response to the way the world affects them Responding to the world here refers to the manner in which both natural and man made influences impact on our ability to conceptualise the animate and inanimate world and our place within that world This book was originally published as a special issue of the Intellectual History Review

Human Nature, Cultural Diversity, and the French Enlightenment Henry Vyverberg, 1989-08-17 In this work Henry Vyverberg traces the evolution and consequences of a crucial idea in French Enlightenment thought the idea of human nature Human nature was commonly seen as a broadly universal unchanging entity though perhaps modifiable by geographical social and historical factors Enlightenment empiricism suggested a degree of cultural diversity that has often been underestimated in studies of the age Evidence here is drawn from Diderot's celebrated Encyclopedia and from a vast range of writing by such Enlightenment notables as Voltaire Rousseau and d'Holbach Vyverberg explains not only the age's undoubted fascination with uniformity in human nature but also its acknowledgment of significant limitations on that uniformity He shows that although the Enlightenment's historical sense was often blinkered by its notions of a uniform human nature there were also cracks in this concept that developed during the Enlightenment itself

The World of the Salons Antoine Lilti,2014-12-01 The world of the eighteenth century salon has long been lauded as a meritocratic setting where writers philosophers and women created the Enlightenment In *The World of the Salons* historian Antoine Lilti proposes a fresh interpretation of salons in eighteenth century Paris Drawing on cultural history social history and the history of literature he challenges the commonly accepted vision of salons as literary circles that were part of the Republic of Letters Lilti argues instead that salons were institutions of worldly sociability that helped shape the world *le monde* and high society They were essential places where the aristocratic elites of the capital met and interacted with literary figures Attending them required a mastery of the codes of polite conversation There news circulated and personal reputations were made and lost As opposed to the salon being a realm separate from the court at Versailles it was a site where elites gained enough influence to forge marital alliances secure government appointments or pensions and win over royal censors These discussion circles were part of refined society not public opinion and those writers who gained mass appeal were shunned by salon goers For those who think they know what the salon meant in early modern European culture politics and intellectual circles Antoine Lilti s *The World of the Salons* offers an important corrective of what went on behind the closed doors of the French salons

Architecture, Print Culture and the Public Sphere in Eighteenth-Century France Richard Wittman, 2007 This book focuses on the complex ways in which architectural practice theory patronage and experience became modern with the rise of a mass public and a reconfigured public sphere between the end of the seventeenth century and the French Revolution Presenting a fresh theoretical orientation and a large body of new primary research this book offers a new cultural history of virtually all the major monuments of eighteenth century Parisian architecture with detailed analyses of the public debates that erupted around such Parisian monuments as the east facade of the Louvre the Place Louis XV the Place de la Concorde and the church of Sainte Genevieve the Pantheon Depicting the passage of architecture into a mediatized public culture as a turning point and interrogating it as a symptom of the distinctly modern configuration of individual society and space that emerged during this period this study will interest readers well beyond the discipline of architectural history America Through

Classical Learning in Britain, France, and the Dutch Republic, 1690-1750 Floris Verhaart, 2020-06-10 For much of western history the achievements of classical antiquity were seen as unsurpassable and works by Latin and Greek authors were viewed as treasure troves of information still useful for contemporary society By the late seventeenth century however the progress of scientific discoveries and the new paradigms of rationalism and empiricism meant the authority of the ancients was called into question Those working on the classical past and its literature debated new ways of defending their relevance for society The different approaches to classical literature defended in these debates explain how the writings of ancient Greece and Rome could become a vital part of eighteenth century culture and political thinking Floris Verhaart analyses these eighteenth century debates about the value of classics arguing that the Enlightenment though often seen as an age of reason and modernity in fact continuously sought inspiration from preceding traditions and ages such as Renaissance humanism and classical antiquity The volume offers an interesting parallel with the modern day in which the relationship between experts and the general public has become the topic of debate and many academics especially in the humanities face pressure to explain how their work benefits society at large
