Sensibility in the Early Modern Era Anik Waldow, 2018-02-02 Sensibility in the Early Modern Era investigates how the early modern characterisation of sensibility as a natural property of the body could give way to complex considerations about the importance of affect in morality What underlies this understanding of sensibility is the attempt to fuse Lockean sensationism with Scottish sentimentalism being able to have experiences of objects in the world is here seen as being grounded in the same principle that also enables us to feel moral sentiments Moral and epistemic ways of relating to the world thus blend into one another as both can be traced to the same capacity that enables us to affectively respond to stimuli that impinge on our perceptual apparatus This collection focuses on these connections by offering reflections on the role of sensibility in the early modern attempt to think of the human being as a special kind of sensitive machine and affectively responsive animal Humans as they are understood in this context relate to themselves by sensing themselves and perpetually refining their intellectual and moral capacities in response to the way the world affects them Responding to the world here refers to the manner in which both natural and man made influences impact on our ability to conceptualise the animate and inanimate world and our place within that world This book was originally published as a special issue of the Intellectual History Review

The Cambridge Companion to Muhammad Jonathan E. Brockopp, 2010-04-19 A collection of essays by some of the most accomplished scholars in the field exploring the life and legacy of the Prophet

The World of Mr Casaubon Colin Kidd, 2016-10-31 The World of Mr Casaubon takes as its point of departure a fictional character Mr Casaubon in George Eliot's classic novel Middlemarch The author of an unfinished Key to All Mythologies Casaubon has become an icon of obscurantism irrelevance and futility

Crossing conventional disciplinary boundaries Colin Kidd excavates Casaubon's hinterland and illuminates the fierce ideological war which raged over the use of pagan myths to defend Christianity from the existential threat posed by radical Enlightenment criticism. Notwithstanding Eliot's portrayal of Casaubon, Anglican mythographers were far from unworldly and actively rebutted the radical freethinking associated with the Enlightenment and French Revolution. Orientalism was a major theatre in this ideological conflict and mythography also played an indirect but influential role in framing the new science of anthropology. The World of Mr Casaubon is rich in interdisciplinary twists and ironies and paints a vivid picture of the intellectual world of eighteenth and nineteenth century Britain.

The Propriety of Liberty Duncan Kelly, 2010-10-18 In this book Duncan Kelly excavates from the history of modern political thought a largely forgotten claim about liberty as a form of propriety. By rethinking the intellectual and historical foundations of modern accounts of freedom, he brings into focus how this major vision of liberty developed between the seventeenth and the nineteenth centuries. In his framework, celebrated political writers including John Locke, Montesquieu, Adam Smith, John Stuart Mill, and Thomas Hill Green pursue the claim that freedom is best understood as a form of responsible agency or propriety, and they do so by reconciling key moral and philosophical claims with classical and contemporary political theory. Their approach broadly assumes that only those persons who appropriately regulate their conduct can be thought of as free and responsible. At the same time, however, they recognize that such internal forms of self-propriety must be judged within the wider context of social and political life. Kelly shows how the intellectual and practical demands of such a synthesis require these great writers to consider freedom as part of a broader set of arguments about the nature of personhood, the potentially

irrational impact of the passions and the obstinate problems of individual and political judgement By exploring these relationships *The Propriety of Liberty* not only revises the intellectual history of modern political thought but also sheds light on contemporary debates about freedom and agency

History of Pedlars in Europe Laurence Fontaine, 1996 The profession of peddling has until now received only slight and fragmentary scholarly attention Usually treated in an anecdotal fashion the pedlar has generally been thought of as a marginal figure closer in character to a vagabond than a trader In this first sustained account of the profession in Europe Laurence Fontaine argues that peddling particularly as a means of distributing new commodities such as books watches and

tobacco played a crucial role in the formation of the modern European economy Focusing primarily on the fifteenth through eighteenth centuries Fontaine traces the origins and development of peddling and the establishment of trading networks She analyzes the changing social construction of the practice and the effect of encounters between traders of different regions Following the pedlars trade routes across Europe from Spain to Sweden and Scotland to the upper Rhine she examines their importance as channels of communication as well as of goods and raises such issues as the impact of pedlars on the values and cultural practices of the communities they visited and the ways in which being merchants changed the lives of these migrants History of Pedlars in Europe separates the mythology that surrounds peddling from the historically reliable and integrates existing studies with new archival research to illuminate one of the most remote areas of the social and economic history of early modern Europe A means of trade based on mobility uncertainty and interdependence peddling is rediscovered as a dynamic force involved in nothing less than the creation of a modern consumer society

Shaffer, 1987-10-29 The ninth volume of this annual journal continues the consideration of the relations of European with non European literatures begun in volume 8 It brings the series of special bibliographies on the history of comparative literary studies in the UK up to 1965 and contains the annual bibliography of comparative literature covering 1984

Encyclopaedic Visions Richard Yeo, 2001-03-29 The eighteenth century English dictionaries of arts and sciences claimed to contain all knowledge that a person of education should possess These early encyclopaedias responded to the explosion of information by reducing knowledge to essentials stressing the need for a coherent account of the sciences and for some time excluding biography and history Richard Yeo places these scientific dictionaries in a rich cultural framework of debate that includes the arrangement of knowledge the Republic of Letters the Enlightenment public sphere copyright issues and the specialisation of science He discusses dilemmas involved in the quest for knowledge to be both organised and readily available examining assumptions about the organisation communication and control of knowledge in these works Elegantly illustrated and accessibly written

Encyclopaedic Visions provides a major contribution to Enlightenment studies and the history of ideas in general

Human Nature, Cultural Diversity, and the French Enlightenment Henry Vyverberg, 1989 In this work Henry Vyverberg traces the evolution and consequences of a crucial idea in French Enlightenment thought the idea of human nature Human nature was commonly seen as a broadly universal unchanging entity though perhaps modifiable by geographical social and historical factors Enlightenment empiricism suggested a degree of cultural diversity that has often been underestimated in studies of the age Evidence here is drawn from Diderot s celebrated Encyclopedia and from a vast range of writing by such Enlightenment notables as Voltaire Rousseau and d Holbach Vyverberg explains not only the age s undoubted fascination with uniformity in human nature but also its acknowledgment of significant limitations on that uniformity He shows that although the Enlightenment s historical sense was often blinkered by its notions of a uniform human nature there were also

cracks in this concept that developed during the Enlightenment itself *Satire Newsletter* ,1964 **New Essays on the Political Thought of the Huguenots of the Refuge** John Christian Laursen,1995 After the Revocation of the Edict of Nantes in 1685 the Huguenot refugees who spread throughout Protestant Europe contributed greatly to the development of new political ideas and realities ranging from the theory and practice of freedom of the press through religious toleration and early modern economic discourse The essays in this volume throw new light on their work
