Studies Voltaire 18th Century Volume 337:

The Life of Wisdom in Rousseau's "Reveries of the Solitary Walker" Thomas L. Pangle, 2023-04-15 The Life of Wisdom in Rousseau's Reveries of the Solitary Walker is the first complete exegesis and interpretation of Rousseau's final and culminating work showing its full philosophic and moral teaching. The Reveries has been celebrated as a work of literature that is an acknowledged acme of French prose writing. Thomas L. Pangle argues that this aesthetic appreciation necessitates an in-depth interpretation of the writing's complex and multileveled intended teaching about the normatively best way of life and how essential this is for a work that was initially bewildering. Rousseau stands out among modern political philosophers in that he restored to political philosophy what Socrates and his students from Plato and Xenophon through Aristotle and the Stoics and Cicero had made central and that the previous modern Enlightenment philosophers had eclipsed the study of the life and soul of the exemplary independent sage as possessor of human wisdom. Rousseau made this again the supreme theme and source of norms for political philosophy and for humanity's moral as well as civic existence. In his analysis of The Reveries, Pangle uncovers Rousseau's most profound exploration and articulation of his own life, personality, soul, and thought as the man of nature enlightened by reason. He describes in Rousseau's final work the fullest embodiment of the experiential wisdom from which flows and to which points Rousseau's political and moral philosophy, his theology, and his musical and literary art.

French Theatre in the Neo-classical Era, 1550-1789 William D. Howarth, 1997-06-05 This 1997 book covers the period which saw the establishment in France of a centralized official theatre, not only the Comédie Française, the first national theatre, but an Italian theatre and a state opera. The often subversive independent theatres are also discussed. Nearly 1,000 documents deal with censorship and other aspects of external control, company management, the acting profession, dramatic theory and criticism, theatre architecture, settings and costumes, audience composition and behaviour. Over 120 pictorial documents, architectural drawings, technical engravings, frontispieces, portraits, etc., provide a visual dimension where relevant. A full linking narrative and a copious bibliography help to make this an important reference work and a valuable research tool.

Human Nature, Cultural Diversity, and the French Enlightenment Henry Vyverberg, 1989-08-17 In this work Henry Vyverberg traces the evolution and consequences of a crucial idea in French Enlightenment thought: the idea of human nature. Human nature was commonly seen as a broadly universal, unchanging entity, though perhaps modifiable by geographical, social, and historical factors. Enlightenment empiricism suggested a degree of cultural diversity that has often been underestimated in studies of the age. Evidence here is drawn from Diderot's celebrated Encyclopédie and from a vast range of writing by such Enlightenment notables as Voltaire, Rousseau, and d'Holbach. Vyverberg explains not only the age's undoubted fascination with uniformity in human nature but also its acknowledgment of significant limitations on that uniformity. He shows that although the Enlightenment's historical sense was often blinkered by its notions of a uniform human nature, there were also cracks in this concept that developed during

the Enlightenment itself **Publications and Titles of Theses** University of Leeds,1970 *Travellers in Eighteenth Century Europe* Julie Peakman,2025-01-16 Travellers in Eighteenth Century Europe is an edited collection with contributions by leading scholars brought together by a prolific author with expertise in eighteenth century culture The Grand Tour was considered a part of the education of a young gentleman Travellers included blossoming scholars poets writers and scientists Visits were made to Greece and Italy via France and Switzerland often taking in Turkey But women also traveled extensively though these accounts have been under explored The book will examine first hand accounts of the impact of foreign travel on both women and men seen through their letters travel diaries journals and their creative response in poems music and art Its originality is seen in its exploration of a comparison between the views of women and men abroad and the differences in what they deemed interesting and worthy of comment The book is especially relevant in light of the many past and current xenophobic views of the foreigner Here we more often see travellers viewing their experience of otherness and exoticism in a positive light a cultural appreciation rather than a cultural appropriation This book examines how men and women saw these new worlds opening up before them what delighted them what influenced them and their interaction with others in the light of domesticity antiquity politics work science sex and friendships **Textual Studies and the Enlarged Eighteenth Century** Kevin L. Cope,Robert C. Leitz,2012-05-18 Textual Studies and the Enlarged Eighteenth Century scrutinizes the culture and sometimes the cult of electronic and other technology assisted scholarship with respect to eighteenth century studies **The Catholic Reformation** Michael A. Mullett,2023-03-08 The Catholic Reformation 1999 provides a dynamic and original history of this crucial movement in early modern Europe Starting from the late middle ages it clearly traces the continuous transformation of Catholicism in its structure bodies and doctrine Charting the gain in momentum of Catholic renewal from the time of the Council of Trent it also considers the ambiguous effect of the Protestant Reformation in accelerating the renovation of the Catholic Church It explores how and why the Catholic Reformation occurred stressing that many moves towards restoration were underway well before the Protestant Reformation The huge impact the Catholic renewal had not only on the papacy Church leaders and religious ritual and practice but also on the lives of ordinary people their culture arts attitudes and relationships is shown in colourful detail *Citizens for the Fatherland* Joseph Laurence Black,1979 The book features the ideas of individuals and groups of people who made direct contributions to projects initiated by their monarchs above all those of Catherine the Great A special theme of the book is attention given to the theory and practice of educating young women in Russia *Publications and Abstracts of Theses* University of Leeds,1964

Principle and Propensity Kelsey L. Bennett,2014-09-01 Reimagining the coming of age literary tradition in the U S and U K within dynamic theological contexts Scholars have traditionally relied upon the assumption that the nineteenth century bildungsroman in the Goethean tradition is an intrinsically secular genre exclusive to Europe incompatible with the literature of a democratically based culture By combining intellectual history with genre criticism Principle and Propensity provides a

critical reassessment of the bildungsroman beginning with its largely overlooked theological premises bildung as formation of the self in the image of God Kelsey L Bennett examines the dynamic differences tensions and possibilities that arise as interest in spiritual growth or self formation collides with the democratic and quasi democratic culture in the nineteenth century British and American bildungsroman Beginning with the idea that interest in an individual s moral and psychological growth or bildung originated as a religious exercise in the context of Protestant theological traditions Bennett shows how these traditions found ways into the bildungsroman the literary genre most closely concerned with the relationship between individual experience and self formation Part 1 of Principle and Propensity examines the attributes of parallel national traditions of spiritual self formation as they convened under the auspices of the international revival movements the Evangelical Revival the Great Awakening and the renewal of Pietism in Germany led respectively by John Wesley Jonathan Edwards and Count Nikolaus Ludwig Zinzendorf Further it reveals the ways in which spiritual self formation and the international revival movements coalesce in the bildungsroman prototype Johann Wolfgang von Goethe s Wilhelm Meisters Lehrjahre Wilhelm Meister s Apprenticeship Part 2 in turn explores the ways these traditions manifest themselves in the nineteenth century bildungsroman in England and the United States through Jane Eyre David Copperfield Pierre and Portrait of a Lady Though Wilhelm Meisters Lehrjahre was a library staple for most serious writers in nineteenth century England and in the United States Bennett shows how writers such as Charlotte Bront Charles Dickens Herman Melville and Henry James also drew on their own religious traditions of self formation adding richness and distinction to the received genre

Women, Gender and Enlightenment B. Taylor,S. Knott,2005-05-27 Did women have an Enlightenment This path breaking volume of interdisciplinary essays by forty leading scholars provides a detailed picture of the controversial innovative role played by women and gender issues in the age of light *Jean-Jacques Rousseau* Timothy O'Hagan,2017-05-15 Jean Jacques Rousseau 1712 1778 was hailed by Claude L vi Strauss as the founder of the sciences of man This collection of fourteen classic papers devoted to his work addresses the points of intersection between the moral and the political the personal and the social The volume is divided into five parts The Critique of Progress and the Speculative Anthropology The Naturalizing of Natural Law The General Will and Totalitarianism Anticipations of Game Theory and Strategies of Redemption The articles are accompanied by an extensive detailed introduction by the editor along with a selective bibliography **Barbary and Enlightenment** Ann Thomson,1987-06-01 This book based on a wide range of eighteenth century works concerns European attitude towards North Africa in the century preceding the French conquest of Algiers in 1830 It studies the radical transformation of perceptions of Barbary during the period essentially by placing them in the context of the different eighteenth century systems of classification of the world We see that uncertainty as to how to classify this region its inhabitants its form of government and social evolution which led to its absence from most contemporary anthropological discussions was resolved in the early nineteenth century with the appearance of what were to

become colonial stereotypes Picturing Animals in Britain, 1750-1850 Diana Donald, 2007-01-01 From fine art paintings by such artists as Stubbs and Landseer to zoological illustrations and popular prints a vast array of animal images was created in Britain during the century from 1750 to 1850 This highly original book investigates the rich meanings of these visual representations as well as the ways in which animals were actually used and abused What Diana Donald discovers in this fascinating study is a deep and unresolved ambivalence that lies at the heart of human attitudes toward animals The author brings to light dichotomies in human thinking about animals throughout this key period awestruck with the beauty and spirit of wild animals people nevertheless desired to capture and tame them the belief that other species are inferior was firmly held yet at the same time animals in stories and fables were given human attributes though laws against animal cruelty were introduced the overworking of horses and the allure of sport hunting persisted Animals are central in cultural history Donald concludes and compelling questions about them then and now remain unanswered New Essays on the Political Thought of the Huguenots of the Refuge John Christian Laursen, 1995 After the Revocation of the Edict of Nantes in 1685 the Huguenot refugees who spread throughout Protestant Europe contributed greatly to the development of new political ideas and realities ranging from the theory and practice of freedom of the press through religious toleration and early modern economic discourse The essays in this volume throw new light on their work **Hogarth** Frédéric Ogée, David Bindman, Peter Wagner, 2001 By focusing on the artist's most famous works this collection of essays applies studies of science and philosophy from the period to give a more accurate sense of the meanings in Hogarth's art **What Does it Mean to be an Empiricist?** Siegfried Bodenmann, Anne-Lise Rey, 2018-06-11 This book begins with an observation At the time when empiricism arose and slowly established itself the word itself had not yet been coined Hence the central question of this volume What does it mean to conduct empirical science in early modern Europe How can we catch the elusive figure of the empiricist Our answer focuses on the practices established by representative scholars This approach allows us to demonstrate two things First that empiricism is not a monolith but exists in a plurality of forms Today's understanding of the empirical sciences was gradually shaped by the exchanges among scholars combining different traditions world views and experimental settings Second the long proclaimed antagonism between empiricism and rationalism is not the whole story Our case studies show that a very fruitful exchange between both systems of thought occurred It is a story of integration appropriation and transformation more than one of mere opposition We asked twelve authors to explore these fascinating new facets of empiricisms The plurality of their voices mirrors the multiple faces of the concept itself Every contribution can be understood as a piece of a much larger puzzle Together they help us better understand the emergence of empiricism and the inventiveness of the scientific enterprise The Problem of the Earth's Shape from Newton to Clairaut John L. Greenberg, 1995-07-28 This book investigates through the problem of the earth's shape part of the development of post Newtonian mechanics by the Parisian scientific community during the first half of the eighteenth century In the Principia

Newton first raised the question of the earth's shape John Greenberg shows how continental scholars outside France influenced efforts in Paris to solve the problem and he also demonstrates that Parisian scholars including Bouguer and Fontaine did work that Alexis Claude Clairaut used in developing his mature theory of the earth's shape The evolution of Parisian mechanics proved not to be the replacement of a Cartesian paradigm by a Newtonian one a replacement that might be expected from Thomas Kuhn's formulations about scientific revolutions but a complex process instead involving many areas of research and contributions of different kinds from the entire scientific world Greenberg both explores the myriad of technical problems that underlie the historical development of part of post Newtonian mechanics which have only been rarely analyzed by Western scholars and embeds his technical discussion in a framework that involves social and institutional history politics and biography Instead of focusing exclusively on the historiographical problem Greenberg shows as well that international scientific communication was as much a vital part of the scientific progress of individual nations during the first half of the eighteenth century as it is today

Revolutionary Contagion and International Politics Chad E. Nelson, 2022 A unique theory of what happens when leaders fear a revolution abroad will spread to their own country and how that affects international relations When do leaders fear that a revolution elsewhere will spread to their own politics and what are the international effects of this fear In *Revolutionary Contagion* Chad E Nelson develops and tests a theory that explains how states react to ideological driven revolutions that have occurred in other nations To do this he analyzes four key revolutionary movements over two centuries liberalism communism fascism and Islamism He further explains that the key to understanding the response to revolutions lies in focusing on the extent to which leaders fear upheaval in their own countries According to the theory Nelson argues fear of contagion is driven more by the characteristics of the host rather than the activities of the infecting agents In other words leaders will fear revolutionary contagion when they have significant revolutionary opposition movements that have an ideological affinity with the revolutionary state A powerful theory of the profound effects revolutions have on international relations this book shows why one simply cannot make sense of international politics including patterns of alliances and wars in certain situations without considering the fear of contagion

Emperor and Author Nicholas J. Baker-Brian, Shaun Tougher, 2012-12-31 This volume offers the first comprehensive analysis in English of all the writings of Julian r AD 361-363 the last pagan emperor of Rome noted for his frontal and self-conscious challenge to Christianity The book also contains treatments of Julian's laws inscriptions coinage as well as his artistic programme Across nineteen papers international specialists in the field of Late Antique Studies offer original interpretations of an extraordinary figure emperor and philosopher soldier and accomplished writer Julian his life and writings are here considered as parts of the tumult in politics culture and religion during the Fourth Century AD New light is shed on Julian's distinctive literary style and imperial agenda The volume also includes an up to date consolidated bibliography
