American exceptionalism Moody contends that high levels of internal migration during the late 1800s created instability in the union and political organizations of workers Because of the tumultuous conditions brought on by the uneven industrialization of early American capitalism millions of workers became migrants moving from state to state and city to city The organizational weakness that resulted undermined efforts by American workers to build independent labor based parties in the 1880s and 1890s Using detailed research and primary sources Moody traces how it was that pure and simple unionism would triumph by the end of the century despite the existence of a significant socialist minority in organized labor at that time Terrific An entirely original take on why American labor was virtually unique in failing to build its own political party But there s much more in investigating labor migration and the tramp phenomenon in the Gilded Age he discovers fascinating parallels with today s struggles of immigrant workers Mike Davis author of *Prisoners of the American Dream*
