A Companion to Old and Middle English Literature Laura Lambdin, Robert Thomas Lambdin, 2002-06-30 Old and Middle English literature can be obscure and challenging So too can the vast body of criticism it has elicited Yet the masters of medieval literature often drew on similar texts since imitation was admired For this reason recent scholarship has often focused on the importance of genre The genre in which a work was written can illuminate the author's intentions and the text's meaning Read in light of a genre's parameters a given work can be considered in relation to other works within the same category This reference is a comprehensive overview of Old and Middle English literature Chapters focus on particular genres such as Allegorical Verse Balladry Beast Fable Chronicle Debate Poetry Epic and Heroic Lyric Middle English Parody Burlesque Religious and Allegorical Verse and Romance Expert contributors define the primary characteristics of each genre and discuss relevant literary works Chapters provide extensive reviews of scholarship and close with detailed bibliographies A more thorough bibliography of major scholarly studies closes the book **Chaucer and Fame** Isabel Davis, Catherine Nall, 2015 Fama or fame is a central concern of late medieval literature Where fame came from who deserved it whether it was desirable how it was acquired and kept were significant inquiries for a culture that relied extensively on personal credit and reputation An interest in fame was not new being inherited from the classical world but was renewed and rethought within the vernacular revolutions of the later Middle Ages The work of Geoffrey Chaucer shows a preoccupation with ideas on the subject of fama not only those received from the classical world but also those of his near contemporaries via an engagement with their texts he aimed to negotiate a place for his own work in the literary canon establishing fame as the subject site at which literary theory was contested and writerly reputation won Chaucer's place in these negotiations was

readily recognized in his aftermath as later writers adopted and reworked postures which Chaucer had struck in their own bids for literary place This volume considers the debates on fama which were past present and future to Chaucer using his work as a centre point to investigate canon formation in European literature from the late Middle Ages and into the Early Modern period Isabel Davis is Senior Lecturer in Medieval Literature at Birkbeck University of London Catherine Nall is Senior Lecturer in Medieval Literature at Royal Holloway University of London Contributors Joanna Bellis Alcuin Blamires Julia Boffey Isabel Davis Stephanie Downes A S G Edwards Jamie C Fumo Andrew Galloway Nick Havely Thomas A Prendergast Mike Rodman Jones William T Rossiter Elizaveta Strakhov

Chaucer and the Subversion of Form Thomas A. Prendergast, Jessica Rosenfeld, 2018-05-31 Responding to the lively resurgence of literary formalism this volume delivers a timely and fresh exploration of the works of Geoffrey Chaucer Advancing new formalist approaches medieval scholars have begun to ask what happens when structure fails to yield meaning probing the very limits of poetic organization While Chaucer is acknowledged as a master of form his work also foregrounds troubling questions about formal agency the disparate forces of narrative and poetic practice readerly reception intertextuality genre scribal attention patronage and historical change This definitive collection of essays offers diverse perspectives on Chaucer and a varied analysis of these problems asking what happens when form is resisted by author or reader when it fails by accident or by design and how it can be misleading errant or even dangerous

and the Making of Optical Space Peter Brown, 2007 The author links Chaucer's writings with the medieval optical tradition in its various forms: scholastic texts, encyclopedias, exempla, vernacular poetry, both in general cultural terms and through the discussion of specific examples. He shows how the science of optics or perspectiva provides an account of spatial perception including visual error and demonstrates how these aspects of optical theory impact on Chaucer's poetry. He provides detailed and sustained analysis of the spatial content of narratives across the range of Chaucer's works relating them to optical ideas and making use of Lefebvre's theory of the production of space. The texts discussed include the Book of the Duchess, House of Fame, Knight's Tale, Miller's Tale, Reeve's Tale, Merchant's Tale, Squire's Tale, and Troilus and Criseyde. Word of Mouth Gianni Guastella, 2017-02-10 The concept expressed by the Roman term fama, although strictly linked to the activity of speaking, recalls a more complex form of collective communication that puts diverse information and opinions into circulation by word of mouth, covering the spreading of rumours, expression of common anxieties, and sharing of opinions about peers, contemporaries, or long dead personages within both small and large communities of people. This hearsay method of information propagation, of chain-like transmission across a complex network of transfers of uncertain order and origin, often rapid and elusive, has been described by some ancient writers as like the flight of a winged word, provoking interesting contrasts with more recent theories that anthropologists and sociologists have produced about the same phenomenon. This volume proceeds from a brief discussion of the ancient concept to a detailed examination of the way in which fama has been personified in ancient and medieval literature and in European figurative art between the end of the fourteenth and the beginning of the sixteenth centuries. Commenting on examples ranging from Virgil's Fama in Book 4 of the Aeneid to Chaucer's House of Fame, it addresses areas of anthropological, sociological, literary, and historical artistic interest, charting the evolving depiction of fama from a truly interdisciplinary perspective. Following this theme, it is revealed that although the most important personifications were originally created to represent the invisible but pervasive diffusion of talk which circulates information about others, these then began to give way to embodiments of the abstract idea of the glory of illustrious men. By the end of the medieval period, these two different representations of rumour and glory were variously combined to create the modern icon of Fame with which we are more familiar today. *Chaucer Reads "The Divine Comedy"* Karla Taylor, 1989 A Stanford University Press classic. Images of Language in Middle English Vernacular Writings Kathy Cawsey, 2020 An exploration of the use of images in Middle English texts, tracing out what can be deduced of a theory of language.
