Historical Phonology of Chinese Dong Tonghe, 2023-07-21 As an important introduction to the phonological history of Chinese this title explores the phonological systems of the Chinese language and explains basic concepts materials and methodologies Unlike many historical accounts this book adopts a reverse chronological sequence starting with the phonology of Modern Mandarin and modern Chinese dialects then looking back on Early Mandarin and Middle Chinese and ultimately ending with Old Chinese phonology This arrangement makes the book reasonably approachable to both professionals and general readers building up knowledge along an ascending order of difficulty from familiar observable facts to theoretical speculative hypotheses Based on the extant studies and two essential types of rhyme materials the book reconstructs the speech sounds of Middle and Old Chinese in terms of initials finals and tones It also analyses the transition and evolution of phonological systems of the Chinese language in different periods Marking the beginning of historical Chinese phonological studies and drawing on modern Western linguistics this book will serve as an essential read for students and researchers of Chinese language Chinese linguistics and especially historical Chinese phonology **Chinese Phonology in Generative Grammar** De Bao Xu, 2021-11-15 In the 1990 s the focus of phonological studies has changed from rule based analysis to constraint based analysis The study of Chinese phonology has also undergone such a change as have other area studies in Generative Phonology Why and how this change has occurred the difference between the two kinds of analyses and what has really happened in phonology after the change are the primary concerns of linguists and anyone interested in the study of Generative Phonology or other area studies in Generative Linguistics To answer these questions one must review the developing process of the change compare the two kinds of analyses in terms of their different frameworks and research focuses and profile the studies in phonology in any area studies in recent years Chinese Phonology in Generative Grammar is intended to offer such a review and comparison while outlining the studies in Chinese phonology Eight unpublished papers written by seven authors are selected to cover the areas of field work dialectology and synchronic studies of segmental and tonal systems of the Chinese language family These papers are directly related to the theoretical issues in the SPE Model Lexical Phonology and Morphology Autosegmental Phonology Metrical Phonology and Optimality Theory By putting the study of Chinese phonology into the generative perspective this collection provides useful data for further theoretical work and draw significant feedback to the theory of Generative Phonology It reviews the theoretical

development from rule based analysis to constraint based analysis in the study of Generative Phonology over the last three decades It compares the two kinds of analyses with respect to their different frameworks and research focuses and their relations with each other in Generative Phonology It profiles the study of Chinese phonology in recent years by putting it into the generative perspective **European Studies on Chinese Phonology, the First Phase** Edwin G. Pulleyblank,1992

T. James Huang,Y. H. Audrey Li,Andrew Simpson,2018-03-20 The Handbook of Chinese Linguistics is the first comprehensive introduction to Chinese linguistics from the perspective of modern theoretical and formal linguistics Containing twenty five chapters the book offers a balanced accessible and thoughtfully organized introduction to some of the most important results of research into Chinese linguistics carried out by theoretical linguists during the last thirty years Presenting critical overviews of a wide range of major topics it is the first to meet the great demand for an overview volume on core areas of Chinese linguistics Authoritative contributions describe and assess the major achievements and controversies of research undertaken in each area and provide bibliographies for further reading The contributors refer both to their own work in relevant fields and objectively present a range of competitor theories and analyses resulting in a volume that is fully comprehensive in its coverage of theoretical research into Chinese linguistics in recent years This unique Handbook is suitable both as a primary reader for structured taught courses on Chinese linguistics at university level and for individual study by graduates and other professional linguists *Current Issues in Chinese Linguistics* Hooi Ling Soh,Liang Tao,Yun Xiao,2011-07-12 Chinese is the most commonly spoken language in the world and one of the very few contemporary languages whose history is documented in an unbroken tradition extending back to the second millennium Compared with Western languages Chinese has a typology with distinguished features in sound system syntax and discourse that have a strong impact on Chinese linguistics studies

and language learning Drawing on theoretical models from formal and functional linguistics discourse analysis computer assisted corpus studies language socialization and second language acquisition this volume presents new advances and addresses a broad range of current issues in the study of Chinese linguistics with research studies that originated from the proceedings of the 21st North American Conference on Chinese Linguistics NACCL 21 As globalization presses on more and more people are interested in Chinese its history structure research and new developments This volume aims to be instrumental Written in a coherent and structured style each section is concentrated on a particular linguistic area and each chapter is self contained with a clear focus and theoretical framework It will be valuable to linguists educators administrators specialists teachers and students of Chinese as a native second heritage or foreign language

Research on the Dialects of Myanmar Danian Wang,Xiangyang Cai,2025-01-31 This book provides a detailed description and a cross dialectal comparison of the major dialects of Myanmar The fieldwork was carried out under very difficult conditions in Myanmar which makes this material all the more valuable Chapter 1 provides phonological and grammatical sketches of 8 major Burmese dialects while Chapter 2 describes in detail the particular features of their repertoire of initial consonants rhymes and tones and remarks on their systems of particles The Appendices are devoted to detailed lexicons of the dialects largely based on the first author s personal fieldwork Each dialect is exemplified with approximately 1800 forms Comprising by far the largest corpora of such data ever assembled in one place the research on tonal systems presented in this book contributes significantly to the tone study of the world s languages

Classroom Research on Chinese as a Second Language Fangyuan Yuan,Shuai Li,2019-04-24 This collection brings together a series of empirical studies on topics surrounding classrooms of Chinese as a second language L2 by drawing on a range of theoretical frameworks methodological strategies and pedagogical perspectives Over the past two decades research on classroom based second language acquisition SLA has emerged and expanded as one of the most important sub domains in the general field of SLA In Chinese SLA however scarce attention has been devoted to this line of research With chapters written by scholars in the field of SLA many of whom are experienced in classroom teaching teacher education or program administration in Chinese as a second language this book helps disentangle the complicated relationships among linguistic targets pedagogical conditions assessment tools learner individual differences and teacher variables that exist in the so called black box classrooms of L2 Chinese

Integrating Chinese Linguistic Research and Language Teaching and Learning Hongyin Tao,2016-10-03 Linguistic research and language teaching have generally been viewed as two separate types of academic endeavor While linguists have been preoccupied with pattern finding and theory building language teachers often encounter issues that are not readily addressed by theoretical linguistic research This collection with eleven papers touching upon a wide range of issues stands out as one of the rare concerted efforts toward a meaningful integration of the two endeavors Subject matters include tone stress word structure grammatical categories e g classifiers syntactic structures including argument structure discourse

particles implicit and explicit knowledge conversational repair and learner corpus With a diverse range of theoretical orientations this collection serves to showcase some of the productive ways to create synergy between Chinese linguistic research and language education

Beyond Indigenization: Christianity and Chinese History in a Global Context

Feiya Tao,2022-11-28 The volume edited by Tao Feiya and featuring recent Chinese scholarly articles translated into English for the first time by Max L Bohnenkamp traces the history of Christianity in China and explores the dynamics of Christian practices in Chinese society Its twenty chapters written by Chinese scholars of the history of religion span the development of Christianity in China from the era of the Tang Dynasty to the twentieth century The four parts of the volume explore the Sinicization of Christian texts and thought the conflicts within China between Christianity and Chinese institutions relations between religious groups and societal and political issues beyond religion Taken together this volume places the practice of Christianity in China into the context of world history while investigating the particular and localized challenges of

Christianity s spread in China

Research in Chinese as a Second Language Istvan Kecskes,2013-05-28 The book aims to address one of the main problems of Chinese language teaching lack of research base The rapidly growing interest in Chinese language teaching has not resulted in the development of a strong research background This book attempts to change the current situation The volume consists of three chapters Chapter I Research Base for Practice contains three papers each of which uses research findings as a basis for solving issues connected with practical language teaching Chapter II Integrating Culture and Language is about one of the most intriguing topics of current language oriented research how to integrate culture into the process of language teaching Chapter III Acquisition of Language Structures consists of studies that investigate the acquisition of certain grammatical structures in Chinese There are only a few papers in the literature on this issue so the articles in this chapter are especially important for further research One of the most important features of the volume is that each paper makes an attempt to bring together theory and practice by focusing on theory building based on practice or theory application in practice Thus the book can be recommended to both researchers and practitioners

The Chinese Rhyme Tables Pan Wenguo,2023-04-11 As the first volume of a two volume set that studies Chinese rhyme tables this book focuses on their emergence development structure and patterns Rhyme tables are a tabulated tool constituted by phonological properties which help indicate the pronunciation of sinograms or Chinese characters marking a precise and systematic account of the Chinese phonological system This volume first discusses the emergence of the model and factors that determined its formation and evolution including the Chinese tradition of the rhyme dictionary and the introduction of Buddhist scripts The second part analyzes the structure and arrangement patterns of rhyme tables in detail giving insights into the nature of division deng the classification and differentiation of speech sounds of vital significance in the reconstruction of middle Chinese The author argues that deng has nothing to do with vowel aperture or other phonetic features but is a natural result of rhyme table arrangement He also reexamines the principles for irregular cases menfa rules

and categorizes the 20 rules into three types The book will appeal to scholars and students who are studying linguistics Chinese phonology and Sinology **The Oxford Handbook of Chinese Linguistics** William S.-Y. Wang, Chaofen Sun, 2015

The Oxford Handbook of Chinese Linguistics offers a broad and comprehensive coverage of the entire field from a multi disciplinary perspective All chapters are contributed by leading scholars in their respective areas This Handbook contains eight sections history languages and dialects language contact morphology syntax phonetics and phonology socio cultural aspects and neuro psychological aspects It provides not only a diachronic view of how languages evolve but also a synchronic view of how languages in contact enrich each other by borrowing new words calquing loan translation and even developing new syntactic structures It also accompanies traditional linguistic studies of grammar and phonology with empirical evidence from psychology and neurocognitive sciences In addition to research on the Chinese language and its major dialect groups this handbook covers studies on sign languages and non Chinese languages such as the Austronesian languages spoken in Taiwan
