

SEMANTICS

Semantics is the branch of linguistics that deals with studying meaning in language. It examines the meaning of words, phrases, sentences, and language.

OVERVIEW

Semantics looks at literal and implied meanings, the connotations words may carry, and how these meanings can change across different contexts. It also studies the relationships between words and phrases, like synonymy (words with the same or similar meanings), antonymy (words with opposite meanings), and polysemy (words or phrases with multiple, related meanings).

EXAMPLE

Interpreting Irony: Irony refers to when someone says one thing but means another, often conveying implied criticism or sarcasm. For example, if someone says, "What a great day!" while standing in pouring rain, this would be ironic because it implies disappointment with the current situation despite saying otherwise through their words.

Studies In Comparative Semantics:

Studies in Comparative Semantics Paul Canart, 1979-01-01 The Semantics of Derivational Morphology Sven Kotowski, Ingo Plag, 2023-02-20 This volume brings together cutting edge research on the semantic properties of derived words and the processes by which these words are derived To this day many of these processes remain under researched and the nature of meaning in derivational morphology remains ill understood All eight articles have an empirical focus and rely on carefully collected sets of data At the same time the contributions represent a broad variety of approaches Several contributions deal with specific problems of the pairing of form and meaning such as the rivalry between nominalizing suffixes or the semantic categories encoded by conversion pairs Other articles tackle the more general question of how meaning is organized e g whether there is evidence for the paradigmatic organization of derived words or the reality of the inflection derivation dichotomy The contributions feature innovative methodologies such as representing lexical meaning as word distribution or predicting semantic properties by means of analogical algorithms This volume offers new and highly interesting insights into how complex words mean and offers directions for future research in an oft neglected field

Library of Congress Subject Headings Library of Congress, 2009 Phrasal Constructions and Resultativeness in English Marina Gorlach, 2004 Eat up the apple or Eat the apple up Is there any difference in the messages each of these alternative forms sends If there isn't why bother to keep both On the other hand is there any semantic similarity between eat the apple up and break the glass to pieces This study takes a fresh look at a still controversial issue of phrasal verbs and their alternate word order applying sign oriented theory and methodology Unlike other analyses it asserts that there is a semantic distinction between the two word order variants phrasal verbs may appear in In order to test this distinction the author analyzes a large corpus of data and also uses translation into a language having a clear morphological distinction between resultative non resultative forms Russian As follows from the analysis English has morphological and syntactic tools to express resultative meaning which allows suggesting a new lexico grammatical category resultativeness Library of Congress Subject Headings Library of Congress. Clark, 2019-05-20 No detailed description available for Semantics and Comprehension A French-English Grammar Morris Salkoff, 1999-09-15 In this contrastive French English grammar the comparisons between French structures and their English equivalents are formulated as rules which associate a French schema of a particular

grammatical structure with its translation into an equivalent English schema The grammar contains all the rules giving the English equivalents under translation of the principal grammatical structures of French the verb phrase the noun phrase and the adjuncts modifiers In addition to its intrinsic linguistic interest this comparative grammar has two important applications The translation equivalences it contains can provide a firm foundation for the teaching of the techniques of translation Furthermore such a comparative grammar is a necessary preliminary to any program of machine translation which needs a set of formal rules like those given here for the French to English case for translating into a target language the syntactic structures encountered in the source language

Anthropology of Color Robert E. MacLaury, Galina V. Paramei, Don Dedrick, 2007-11-21 The field of color categorization has always been intrinsically multi and inter disciplinary since its beginnings in the nineteenth century The main contribution of this book is to foster a new level of integration among different approaches to the anthropological study of color The editors have put great effort into bringing together research from anthropology linguistics psychology semiotics and a variety of other fields by promoting the exploration of the different but interacting and complementary ways in which these various perspectives model the domain of color experience By so doing they significantly promote the emergence of a coherent field of the anthropology of color As of February 2018 this e book is freely available thanks to the support of libraries working with Knowledge Unlatched

Challenges at the Syntax-Semantics-Pragmatics Interface Robert D. Van Valin Jr., 2021-05-18 This volume brings together recent scholarship addressing a number of significant issues in linguistic theory and description including verb classification case marking comparative constructions noun phrase structure clause linkage and reference tracking in discourse These topics are discussed with respect to a wide range of languages including Bamunka Bantu Biblical Hebrew Japanese Persian Pitjantjatjara Australia Russian and Taiwan Sign Language The theoretical perspective employed in these analyses is that of Role and Reference Grammar RRG a theory which strives to describe language structure and grammatical phenomena in terms of the interaction of syntax semantics and discourse pragmatics RRG differs from other parallel architecture constructionally oriented theories in important ways particularly with respect to the ability to formulate cross linguistic generalizations The ability of RRG to facilitate the formulation of cross linguistic generalizations is exemplified well in the contributions to this volume As such this text makes important theoretical and descriptive contributions to contemporary linguistic discussions

Metadata and Semantic Research Salvador Sanchez-Alonso, Ioannis N. Athanasiadis, 2010-10-08

Metadata and semantic research is a growing complex ecosystem of conceptual theoretical methodological and technological frameworks offering innovative computational solutions in the design and development of computer based systems Within this perspective researchers working in the area need to further develop and integrate a broad range of methods results and solutions coming from different areas MTSR has been designed as a forum allowing researchers to present and discuss specialized results as general contributions to the field This volume collects the papers selected for presentation at the 4th International Conference on Metadata and Semantic Research MTSR 2010 held in Alcala de Henares a world heritage city and birthplace of Miguel de Cervantes at the University of Alcala October 20 22 2010 The first MTSR conference was held online in 2005 followed by two more editions in Corfu 2007 and in Milan 2009 The experience acquired during the past five years and the warm welcome of MTSR by the research community encouraged us to organize this new edition of the series and turn it into a yearly event According to the number and quality of the contributions submitted for revision our 2010 effort was again a considerable success

Cultural Semantics and Social Cognition Carsten Levisen, 2012-12-06 Presenting original detailed studies of keywords of Danish this book breaks new ground for the study of language and cultural values Based on evidence from the semantic categories of everyday language such as the Danish concept of hygge roughly meaning pleasant togetherness the book provides an integrative socio cognitive framework for studying and understanding language particular universes It is argued that the worlds we live in are not linguistically and conceptually neutral but rather that speakers who live by Danish concepts are likely to pay attention to their world in ways suggested by central Danish keywords and lexical grids By means of a sophisticated semantic methodology the author accounts for the meanings of even highly culture specific and untranslatable linguistic concepts The book offers new tools for comparative research into the diversity of semantic and cultural systems in contemporary Europe Additionally it contributes to the emerging discipline of cultural semantics and to the ongoing debates of linguistic diversity metalanguage and the use of linguistic evidence in studies of culture and social cognition

Lexical Semantics, Syntax, and Event Structure Malka Rappaport Hovav, Edit Doron, Ivy Sichel, 2010-02-25 This book focuses on the linguistic representation of temporality in the verbal domain and its interaction with the syntax and semantics of verbs arguments and modifiers Leading scholars explore the division of labour between syntax compositional semantics and lexical semantics in the encoding of event structure encompassing event participants and the temporal properties associated with events They examine the interface between event structure and the systems with which it interacts including the interface between event structure and the syntactic realization of arguments and modifiers Deploying a variety of frameworks and theoretical perspectives they consider central issues and questions in the field among them whether argument structure is specified in the lexical entries of verbs or syntactically constructed so that syntactic position determines thematic status whether the hierarchical structure evidenced in argument structure find parallels in sign language should the relation between members of an alternation pair such as the causative inchoative alternation be

understood lexically or derivationally and the role of syntactic category in determining the configuration of argument structure

Universality of semantic frames and language specific Bulgarian data Svetla Koeva, 2025-06-20 The book Universality of semantic frames and language specific Bulgarian data is devoted to the principles of data organisation in the Bulgarian FrameNet which has been in development for more than 20 years and has gone through various phases Originally it was developed as an independent resource but for about fifteen years it has been correlated with the Berkeley FrameNet observing the following basic principles The information in the FrameNet that is relevant for the description of Bulgarian is considered language independent e g definition of frames and relations between them definitions of frames and elements and relations between them etc and is automatically transferred into a structure called a superframe For each superframe there may be one or more Bulgarian frames in which the language independent information is restructured if necessary so that it corresponds exactly to the description for the Bulgarian language The Bulgarian verbs of communication change movement contact and emotion are described in more detail their subclasses are delineated and the similarities and differences in the semantic and syntactic description for Bulgarian and English are compared and discussed It is shown how the semantic frames can be used in an experiment to assess children s mastery of semantic conceptualisation and syntactic use of verbs from their basic vocabulary These and a number of other applications automatic assignment of semantic roles automatic recognition of events in news automatic recognition of scenes in images and videos are some of the applications in which the Bulgarian FrameNet can be used In addition the semantic and syntactic information in the Bulgarian FrameNet can be used for theoretical considerations including comparative studies focussing on the modern state of the Bulgarian language and other languages for which a FrameNet has been developed
