Studies In Educational Learning Environments An International Perspective:

Studies in Educational Learning Environments Swee Chiew Goh, Myint Swe Khine, 2002 The study of classroom and school learning environments and their effects on students learning has been going on for more than a century Past efforts in the study of the learning environment and its determinants have indicated that it plays a major role in improving teaching and learning in primary secondary and higher education This book covers various dimensions of the learning environment its underlying theory the impact on learning the curriculum and classroom management It is organized in such a way as to provide a cross national and multi cultural forum for presenting and discussing research findings as well as development and applications of various techniques and instruments in learning environment research **International Perspectives in Educational Effectiveness Research** James Hall, Ariel Lindorff, Pamela Sammons, 2020-08-10 This edited volume explores questions about what works how for whom when and why in education and considers how and to what extent such knowledge can be understood and extended across countries and different educational systems The book starts by presenting an overview of the history of educational effectiveness research and offers examples of current theories of educational effectiveness Next it provides exemplars of effectiveness studies that report on educational systems policies and practices from across six continents These studies vary in their research methods and outcomes illustrating a field of research that is conscious of its origins its agenda and its ambition to understand and improve the functioning of schools networks and education systems around the world The book brings these threads together within the final chapter and uses them to signpost directions for future research International Perspectives in Educational Effectiveness Research is an excellent and timely addition to the educational effectiveness literature It offers a rigorous and insightful range of international perspectives that will be of interest to researchers policy makers and students of the field Professor Christopher Chapman University of Glasgow UK President Elect of the International Congress for School Effectiveness and Improvement This important new volume brings up to date the contributions of educational effectiveness research to the development of policy and practice in the field over the last 50 years Drawing together the ideas of many of the major researchers in the field it provides a comprehensive analysis of these earlier contributions leading to critical commentaries that point to areas for future attention The editors make use of expertise from a range of disciplines to strengthen the themes that are addressed Most importantly the book emphasises the need to pay greater attention to the challenge of equity arguably the most significant challenge facing education systems internationally In this respect a particular strength of the book is the accounts provided from many different parts of the world These underline the importance of context a factor often previously overlooked in this field of research Given all of this I have no doubt that International Perspectives in Educational Effectiveness Research will become a major source for practitioners policy makers and researchers Professor Mel Ainscow Emeritus Professor of Education University of Manchester Professor of Education University of Glasgow UK **Teachers**

Creating Context-Based Learning Environments in Science R. Taconis, den Brok P., 2016-10-26 Context based science education has led to the transformation of science education in countries all over the world with changes also visible in learning environments and how these are being shaped These changes involve authentic problems on research and design new types of interactions within communities of practice new content areas and also new challenges for teachers in teaching motivating scaffolding and assessing their students among other things This book focuses on context based science education and its resulting changes in the perspective of research on learning environments It also focuses on the implications for the teachers and the professional development of their competencies and beliefs The book consists of eleven chapters by experts in various themes surrounding learning environments research and science education preceded by and concluded with a chapter with reflections on context based learning environments in science by the editors of this book The conclusion they draw is that professional development of science teachers may be the most important and the most difficult part of the process of teachers creating context based learning environments in science as is the focus in the title of this book

Outcomes-Focused Learning Environments Jill M. Aldridge, Barry J. Fraser, 2008-01-01 In order to make education more inclusive outcomes focused education is currently being adopted by schools and post school education and training systems in numerous countries around the world Outcomes focused education involves a major shift from what teachers do to an outcomes focus on what students achieve and an emphasis on catering for students individual differences in backgrounds interests and learning styles This book focuses on the successes and challenges of an innovative new post compulsory secondary school in creating an outcomes focused curriculum Major research aims included evaluating the effectiveness of this school s educational programs in promoting outcomes focused learning environments and investigating some of the determinants and effects of outcomes focused learning environments Practically this book suggests implications for educational systems about how effective outcomes focused learning environments can be created to maximise educational outcomes for each individual student Methodologically the book illustrates the productive combination of quantitative and qualitative data collection methods in learning environments research Researchers and practitioners around the world are likely to make use of the widely applicable Technology Rich Outcomes Focused Learning Environment Inventory TROFLEI whose development and validation are reported in detail in this book

International Perspectives on Tele-Education and Virtual Learning Environments Graham Orange, Dave Hobbs, 2018-02-05 This title was first published in 2000 Teaching learning and assessment methods are constantly evolving providing the educator with a range of issues and new challenges This book addresses these challenges through the use of information and communications technologies and presents a vision of how these may be deployed in the educational environments of the future

The International Handbook of Educational Research in the Asia-Pacific Region J.P. Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of

the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region. In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues. Moreover, since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments. The different articles within the Handbook seek to conceptualize the problems in each specific content area under review, provide an integration of the research conducted within that area, the theoretical basis of the research, the practical implications of the research and the contribution of the research towards the resolution of the problems identified. Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based. In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research. Furthermore, it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region.

The Oxford Handbook of School Psychology Melissa A. Bray, Thomas J. Kehle, 2011-02-18 The Oxford Handbook of School Psychology focuses on significant issues, new developments and scientific findings that influence current research and practice in the ever growing field of school psychology. Additional sections discuss building a cumulative knowledge base to better facilitate students' academic, social and personal competencies including the promotion of positive mental health and subjective well-being.

Contemporary Approaches To Research On Learning Environments: Worldviews Darrell Fisher, Myint Swe Khine, 2006-05-25 Learning environment research has undergone considerable growth in the past thirty years and has now reached a stage of notable diversity and internationalization. Earlier studies often used questionnaires to assess learning environments but today both qualitative and quantitative approaches are used. Many contemporary studies are a productive combination of these two approaches. This volume brings together prominent educators and researchers from around the world to share their contemporary research on educational learning environments. The chapters provide information on recent trends and developments and effective applications of different methods to improve teaching and learning. The book will be a critical and specialized source that describes recent advances in learning environment studies across all continents. The contributors come from Australia, Belgium, Cyprus, Finland, India, Indonesia, Israel, Japan, The Netherlands, New Zealand, Singapore, Turkey, Taiwan, Thailand and the USA.

Educational Research and Innovation: Innovative Learning Environments OECD, 2013-09-25 This report presents a wealth of international material and features a new framework for understanding innovative learning environments.

Designs for Learning Environments of the Future Michael Jacobson, Peter

Reimann,2010-03-10 Few things are as certain as societal changes and the pressing need for educators to prepare students with the knowledge and ways of thinking necessary for the challenges in a changing world In the forward thinking pages of *Designs for Learning Environments of the Future* international teams of researchers present emerging developments and findings in learning sciences and technologies at the infrastructure curricular and classroom levels Focusing on ideas about designing innovative environments for learning in areas such as biology engineering genetics mathematics and computer science the book surveys a range of learning technologies being explored around the world a spectrum as diverse as digital media computer modeling and 3D virtual worlds and addresses challenges arising from their design and use The editors holistic perspective frames these innovations as not only discrete technologies but as flexible learning environments that foster student engagement participation and collaboration Contributors describe possibilities for teaching and learning in these and other cutting edge areas Working with hypermodels and model based reasoning Using visual representations in teaching abstract concepts Designing strategies for learning in virtual worlds Supporting net based collaborative teams Integrating innovative learning technologies into schools Developing personal learning communities *Designs for Learning Environments of the Future* will enhance the work of a wide range of professionals including researchers and graduate students in the learning and cognitive sciences and educators in the physical and social sciences *International Perspectives on the Design of Technology-supported Learning Environments* Stella Vosniadou,Erik De Corte,Robert Glaser,Heinz Mandl,2012-10-12 In recent years the use of technology for the purposes of improving and enriching traditional instructional practices has received a great deal of attention However few works have explicitly examined cognitive psychological and educational principles on which technology supported learning environments are based This volume attempts to cover the need for a thorough theoretical analysis and discussion of the principles of system design that underlie the construction of technology enhanced learning environments It presents examples of technology supported learning environments that cover a broad range of content domains from the physical sciences and mathematics to the teaching of language and literacy The emphasis in this book is not on the design of educational software but on the design of learning environments A great deal of research on learning and instruction has recently moved out of the laboratory into the design of applications in instructional settings By designing technology supported learning environments instructional scientists attempt to better understand the theories and principles that are explicit in their theories of learning The contributors to this volume examine how factors such as social interaction the creation of meaningful activities the use of multiple perspectives and the construction of concrete representations influence the acquisition of new information and transfer **Routledge**

International Handbook of Social Psychology of the Classroom Christine M. Rubie-Davies,Jason M. Stephens,Penelope Watson,2015-05-22 The Routledge International Handbook of Social Psychology of the Classroom presents the first comprehensive and integrated compilation of theory and research on topics related to the social cohesion of the classroom

Many of these topics have been studied independently for example motivation self concept class management class climate and teacher expectations are generally studied separately by different groups of researchers This handbook brings the evidence from different fields in social psychological classroom research together in one place for the first time to explore how these topics relate and how each factor influences students and their learning With chapters by established international leaders in their fields as well as emerging new talent this handbook offers cutting edge research and surveys the state of the art in the social psychology of the classroom Major areas covered include Motivation Belief self concept and personality Emotional engagement Teacher student relationships Teacher expectation Classroom management Culture and identity The Routledge International Handbook of Social Psychology of the Classroom provides a review of current theories related to the social psychology of the classroom including how these theories apply to classrooms and learners Current evidence clearly shows that areas explored by social psychology and brought together for the first time in this volume can have a very significant impact on classroom learning and student achievement J Hattie Visible Learning A Synthesis of over 800 Meta Analyses Relating to Achievement Routledge 2009 This handbook is a must for all academics whose research relates to the social psychology of the classroom It is also an invaluable resource for teachers and teacher education students who want to understand why they are effective instructors and yet still encounter students in their classes who are not responding as expected

Exploring Children's Perceptions of Learning Ai-Girl Tan, 2004 We witnessed before the turn of the 21st century that Singapore's education undertook a series of curricular innovation and related infrastructure development The changes included expansion in physical spaces of learning in the classroom installation of information and communication technologies for multimedia based learning large scale recruitment of graduate teachers revision of teacher salaries and promotion opportunities curricular diversity and research on pedagogies and classroom practices All children and teachers of the 21st century regardless of backgrounds are expected not only to acquire but also to create knowledge Such changes may to a certain extent stimulate changes in classroom cultures as well as in children's experiences in learning This book captures some of these changes

Handbook of Research on Educational Communications and Technology J. Michael Spector, M. David Merrill, Jan Elen, M. J. Bishop, 2013-07-03 The 4th edition of the Handbook of Research on Educational Communications and Technology expands upon the previous 3 versions providing a comprehensive update on research pertaining to new and emerging educational technologies Chapters that are no longer pertinent have been eliminated in this edition with most chapters being completely rewritten expanded and updated Additionally new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest Each chapter now contains an extensive literature review documenting and explaining the most recent outstanding research including major findings and methodologies employed The Handbook authors continue to be international leaders in their respective fields the list is cross disciplinary by design and great effort was taken to invite authors outside of the traditional instructional design and

technology community **Handbook of International Research in Mathematics Education** Lyn D. English, David Kirshner, 2010-04-02 The second edition continues the mission of bringing together important new mathematics education research that makes a difference in both theory and practice It updates and extends the Handbook's original key themes and issues for international research in mathematics education for the 21st century namely priorities in international mathematics education research lifelong democratic access to powerful mathematical ideas advances in research methodologies influences of advanced technologies Each of these themes is examined in terms of learners teachers and learning contexts with theory development being an important component of all these aspects This edition also examines other catalysts that have gained increased import in recent years including a stronger focus on the teacher and teacher practice a renewed interest in theory development an increased focus on the mathematics needed in work place settings and a proliferation of research designs and methodologies that have provided unprecedented opportunities for investigating and ultimately improving mathematical teaching and learning This edition includes ten totally new chapters all other chapters are thoroughly revised and updated *Global Perspectives on School Libraries* Luisa Marquardt, Dianne Oberg, 2011 Promoting literacies through the school library Reading opens all door an integrated reading program at Genazano College in Melbourne Australia by Susan La Marca Sandra Hardinge and Lyn Pucius **International Perspectives on Engineering Education** Steen Hyldgaard Christensen, Christelle Didier, Andrew Jamison, Martin Meganck, Carl Mitcham, Byron Newberry, 2015-05-25 This inclusive cross cultural study rethinks the nexus between engineering education and context In so doing the book offers a reflection on contextual boundaries with an overall boundary crossing ambition and juxtaposes important cases of critical participation within engineering education with sophisticated scholarly reflection on both opportunities and discontents Whether and in what way engineering education is or ought to be contextualized or de contextualized is an object of heated debate among engineering educators The uniqueness of this study is that this debate is given comprehensive coverage presenting both instrumentally inclined as well as radical positions on transforming engineering education In contextualizing engineering education this book offers diverse commentary from a range of disciplinary meta and interdisciplinary perspectives on how cultural professional institutional and educational systems contexts shape histories structural dynamics ideologies and challenges as well as new pathways in engineering education Topics addressed include examining engineering education in countries ranging from India to America to racial and gender equity in engineering education and incorporating social awareness into the area Using context as bridge this book confronts engineering education head on Contending engineering ideologies and corresponding views on context are juxtaposed with contending discourses of reform The uniqueness of the book is that it brings together scholars from the humanities the social sciences and engineering from Europe both East and West with the United States China Brazil India and Australia

Handbook of Classroom Management Carolyn M. Evertson, Carol S. Weinstein, 2013-10-31 Classroom management is

a topic of enduring concern for teachers administrators and the public It consistently ranks as the first or second most serious educational problem in the eyes of the general public and beginning teachers consistently rank it as their most pressing concern during their early teaching years Management problems continue to be a major cause of teacher burnout and job dissatisfaction Strangely despite this enduring concern on the part of educators and the public few researchers have chosen to focus on classroom management or to identify themselves with this critical field The Handbook of Classroom Management has four primary goals 1 to clarify the term classroom management 2 to demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers managerial tasks 3 to bring together disparate lines of research and encourage conversations across different areas of inquiry and 4 to promote a vigorous agenda for future research in this area To this end 47 chapters have been organized into 10 sections each chapter written by a recognized expert in that area Cutting across the sections and chapters are the following themes First positive teacher student relationships are seen as the very core of effective classroom management Second classroom management is viewed as a social and moral curriculum Third external reward and punishment strategies are not seen as optimal for promoting academic and social emotional growth and self regulated behavior Fourth to create orderly productive environments teachers must take into account student characteristics such as age developmental level race ethnicity cultural background socioeconomic status and ableness Like other research handbooks the Handbook of Classroom Management provides an indispensable reference volume for scholars teacher educators in service practitioners and the academic libraries serving these audiences It is also appropriate for graduate courses wholly or partly devoted to the study of classroom management

International Perspectives on the Contextualization of Science Education Ingrid Sánchez Tapia, 2020-02-03 This book explores how science learning can be more relevant and interesting for students and teachers by using a contextualized approach to science education The contributors explore the contextualization of science education from multiple angles such as teacher education curriculum design assessment and educational policy and from multiple national perspectives The aim of this exploration is to provide and inspire new practical approaches to bring science education closer to the lives of students to accelerate progress towards global scientific literacy The book presents real life examples of how to make science relevant for children and adolescents of diverse ethnic and language backgrounds socioeconomic status and nationalities providing tools and guidance for teacher educators and researchers to improve the contextualization and cultural relevance of their practice The book includes rigorous studies demonstrating that the contextualization of science learning environments is essential for student engagement in learning science and practitioners reflections on how to apply this knowledge in the classroom and at national scale This approach makes this book valuable for researchers and professors of science education and international education interested in designing teacher education courses that prepare future teachers to contextualize their teaching and in adding a critical dimension to their research agendas
