Studies In Insignificance:

The Kingdom of Insignificance Joanna Nizyńska, 2013-03-31 In one of the first scholarly book in English on Miron Białoszewski 1922-1983 Joanna Nizyńska illuminates the elusive prose of one of the most compelling and challenging postwar Polish writers Nizyńska's study exemplary in its use of theoretical concepts introduces English language readers to a preeminent voice of Polish literature Nizyńska explores how a fusion of seemingly irreconcilable qualities such as the traumatic and the everyday imbues Białoszewski's writing with its idiosyncratic appeal Białoszewski's *A Memoir of the Warsaw Uprising* 1977 revised 1991 describes the Poles' heroic struggle to liberate Warsaw from Nazi occupation in 1944 as harrowing yet ordinary His later prose represents everyday life permeated by traces of the traumatic Nizyńska closely examines the topic of autobiography and homosexuality showing how Białoszewski discloses his homosexuality but paradoxically renders it inconspicuous by hiding it in plain sight

The Experimental Society Marshall S. Shapo, 2017-07-05 This book examines society's responses to many kinds of experimentation focusing on both creation of and assessment of risks As people seek new ways to make their lives safer and happier the widespread process of experimentation claims victims Some of these are people who directly and willingly accept the risks of experiments By comparison some are effectively experimental subjects in the hands of others who often may not even think of themselves as experimenting with the lives of consumers The *Experimental Society* covers a wide spectrum of products and activities including those that radiate into the environment like nuclear power hydrofracking and asbestos The book spotlights prescription drugs and substances used in the most ordinary consumer products such as salt caffeine and BPA in sippy cups It also discusses the testing of new ways of thinking including those related to social organization and processes and even the law itself A particular concern is the case in which the subjects of experiments are unaware that the experiments are taking place This lucidly written volume will be useful to practicing lawyers who specialize in personal injury law and law professors who teach such subjects as torts and products liability medicine and science Physicians and scientists in various branches of medicine will find it provocative as will political scientists economists sociologists anthropologists and philosophers

Corpora in Interpreting Studies Andrew K.F. Cheung, Kanglong Liu, Riccardo Moratto, 2023-12-01 Cheung Liu Moratto and their contributors examine how corpora can be effectively harnessed to benefit interpreting practice and research in East Asian settings In comparison to the achievements made in the field of corpus based translation studies the use of corpora in interpreting is not comparable in terms of scope methods and agenda One of the predicaments that hampers this line of inquiry is the lack of systematic corpora to document spoken language This issue is even more pronounced when dealing with East Asian languages such as Chinese Japanese and Korean which are typologically different from European languages As language plays a pivotal role in interpreting research the use of corpora in interpreting within East Asian contexts has its own distinct characteristics as well as methodological constraints and concerns However it also generates

new insights and findings that can significantly advance this research field A valuable resource for scholars of scholars focusing on corpus interpreting particularly those dealing with East Asian languages

Insignificant Things Matthew Francis Rarey, 2023-04-17 In *Insignificant Things* Matthew Francis Rarey traces the history of the African associated amulets that enslaved and other marginalized people carried as tools of survival in the Black Atlantic world from the seventeenth to the nineteenth centuries Often considered visually benign by white Europeans these amulet pouches commonly known as mandingas were used across Africa Brazil and Portugal and contained myriad objects from herbs and Islamic prayers to shells and coins Drawing on Arabic language narratives from the West African Sahel the archives of the Portuguese Inquisition sixteenth and seventeenth century European travel and merchant accounts of the West African Coast and early nineteenth century Brazilian police records Rarey shows how mandingas functioned as portable archives of their makers experiences of enslavement displacement and diaspora He presents them as examples of the visual culture of enslavement and critical to conceptualizing Black Atlantic art history Ultimately Rarey looks to the archives of transatlantic slavery which were meant to erase Black life for objects like the mandingas that were created to protect it

The Rise and Fall of American Public Schools Robert J. Franciosi, 2004-04-30 This volume provides a comprehensive and balanced survey of the state of American public education It examines the trend in the quality of the public schools over the past 100 years and reviews the possible reasons for a decline in quality The work focuses on the importance of local control in American public education and how it has been steadily eroded Franciosi advocates school choice as a way of restoring greater control by parents over their children s schools This work is distinct among calls of reform in that it takes a skeptical attitude towards the centralized school reform movement

that has culminated in the No Child Left Behind Act It discusses important topics that have been the subject of research including the effect of teachers unions Tiebout competition and local control and school finance reform Franciosi follows the many trajectories taken by America s public schools over the past century It shows that the United States has been a world education leader in both access for all children and resources spent Despite this there are still some worrisome trends While school spending has steadily increased student achievement has fluctuated and remains below that of students in other developed nations Initiatives to close the gap in achievement has fluctuated and remains below that of students in other developed nations Initiatives to close the gap in achievement and resources among students of various socioeconomic racial and ethnic backgrounds have been only partially successful Past efforts to reform public education have led to increasingly centralized control over public schools This piece will be important to those who are active on both sides of the school reform debate It will also be useful to students who are researching education policy the economics of education or public policy

Debating Cancer: The Paradox In Cancer Research Henry H Q Heng,2015-10-08 Cancer research is at a crossroads Traditionally cancer has been thought of as a disease of gene mutation where the stepwise accumulation of cancer gene mutations is the key and the identification of common gene mutations has been considered to be essential for diagnosis and treatment Despite extensive research efforts and accumulated knowledge on cancer genes and pathways the clinical benefits of this traditional approach have been limited Recently cancer genome sequencing has revealed an extensive amount of genetic heterogeneity where the long expected common mutation drivers have been difficult if not impossible to identify These realities ultimately challenge the conceptual framework of current cancer biology This book introduces a new concept of genome theory of cancer evolution in an attempt to unify the field Many important and representative but often confusing questions and paradoxes are critically analyzed By comparing gene and genome based theories the hidden flaws of many popular viewpoints are addressed This discussion is intended to initiate a much needed critical re evaluation of current cancer research

New Perspectives on Foreign Aid and Economic Development B. Mak Arvin,2002-05-30 The success or failure of economic assistance programs is a shared responsibility of recipient countries and donors The negative attitude about aid prevalent today underscores a perception the aid has failed Critics often blame corrupt regimes weak governments or poor economic policies However the poor track record of aid is also due to donors inability to allocate limited funds effectively and poor coordination of their aid efforts Declining aid budgets have led to fundamental questioning of foreign aid s allocation and utility while the apparent ineffectiveness of aid has shrunk aid budgets and turned public opinion against providing it This edited collection containing pieces written by leading development specialists evaluates these emerging questions of allocation and efficiency Development economists policy makers and development specialists will benefit from reading this work Chapters examine the optimal and intertemporal allocation of aid the role and accountability of NGOs in allocation the importance of untying a new perspective on low levels of aid and links between the allocation

pattern of donors Additional chapters deal with the impact of aid on economic growth democracy wage inequality between skilled and unskilled labor and the role of governance and institutional capacity in aid effectiveness An effective balance between theoretical and empirical models is offered to better illustrate the issues involved **The Dublin Review** Nicholas Patrick Wiseman,1882 **Multilevel Analysis** Joop J. Hox,Mirjam Moerbeek,Rens van de Schoot,2010-09-13 This practical introduction helps readers apply multilevel techniques to their research Noted as an accessible introduction the book also includes advanced extensions making it useful as both an introduction and as a reference to students researchers and methodologists Basic models and examples are discussed in non technical terms with an emphasis on understanding the methodological and statistical issues involved in using these models The estimation and interpretation of multilevel models is demonstrated using realistic examples from various disciplines For example readers will find data sets on stress in hospitals GPA scores survey responses street safety epilepsy divorce and sociometric scores to name a few The data sets are available on the website in SPSS HLM MLwiN LISREL and or Mplus files Readers are introduced to both the multilevel regression model and multilevel structural models Highlights of the second edition include Two new chapters one on multilevel models for ordinal and count data Ch 7 and another on multilevel survival analysis Ch 8 Thoroughly updated chapters on multilevel structural equation modeling that reflect the enormous technical progress of the last few years The addition of some simpler examples to help the novice whilst the more complex examples that combine more than one problem have been retained A new section on multivariate meta analysis Ch 11 Expanded discussions of covariance structures across time and analyzing longitudinal data where no trend is expected Expanded chapter on the logistic model for dichotomous data and proportions with new estimation methods An updated website at <http://www.joophox.net> with data sets for all the text examples and up to date screen shots and PowerPoint slides for instructors Ideal for introductory courses on multilevel modeling and or ones that introduce this topic in some detail taught in a variety of disciplines including psychology education sociology the health sciences and business The advanced extensions also make this a favorite resource for researchers and methodologists in these disciplines A basic understanding of ANOVA and multiple regression is assumed The section on multilevel structural equation models assumes a basic understanding of SEM **Handbook of Research on Managing Information Systems in Developing Economies** Boateng, Richard,2020-04-17 Technology provides accessibility otherwise unavailable to the people who can benefit from it the most As new digital tools become less expensive and more widely available research and real world cases that examine the union between emergent countries and information systems are essential in determining the next steps for these nations The Handbook of Research on Managing Information Systems in Developing Economies is a pivotal reference source that explores the effects of technological data handling within developing economies Covering a broad range of topics such as emerging digital technologies socio economic development and technology startups this book is ideally designed for software programmers policymakers practitioners educators academicians students and researchers

Catching Fire Daniel Hahn, 2022-04-05 An energizing real time journey through the translation of Never Did the Fire and the process of literary translation In *Catching Fire* the translation of Diamela Eltit's *Never Did the Fire* unfolds in real time as a conversation between works of art illuminating both in the process The problems and pleasures of conveying literature into another language what happens when you meet a pun a double entendre are met by translator Daniel Hahn's humor deftness and deep appreciation for what sets Eltit's work apart and his evolving understanding of what this particular novel is trying to do *The Mind at Work in Studying, Thinking, and Reading* Rollo La Verne Lyman, 1924 **The World of Science Education**, 2009-01-01 Each volume in the 7 volume series *The World of Science Education* reviews research in a key region of the world These regions include North America South and Latin America Asia Australia and New Zealand Europe and Israel Arab States and Sub Saharan Africa The focus of this Handbook is on science education in Arab states and the scholarship that most closely supports this program The reviews of the research situate what has been accomplished within a given field in an Arab rather than an international context The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of problems and solutions within regional contexts The approach allows readers to review what has been done and accomplished what is missing and what might be done next

Regression Analysis Jeremy Arkes, 2025-09-12 This thoroughly practical and engaging textbook conveys the skills needed to responsibly develop conduct scrutinize and interpret statistical analyses without requiring any high level math *Regression Analysis* details the most common sources of statistical biases including some not covered in other textbooks Rather than focusing on complicated equations the book describes these biases visually and with examples of situations in which they could arise As the author argues just learning how to conduct regressions without learning how to properly assess and interpret regressions can do more harm than good Other unique features include an innovative approach to describing the elusive concept of holding other factors constant and proper interpretations of the strength of evidence in light of the Bayesian critique of hypothesis testing This third edition enhances the emphasis on ethical and responsible research practices and creates more examples demonstrating how the biases and their corrections could affect the regression results This is the textbook the author wishes he had learned from as it would have helped him avoid many research mistakes he made in his career at research organizations and in academia It is ideal for undergraduate and postgraduate students learning quantitative methods in the social sciences business medicine and data analytics It will also appeal to researchers and academics looking to better understand regressions **English Studies** James Darmesteter, 1896 *Economic Studies*, 1897 **History in Times of Unprecedented Change** Zoltán Boldizsár Simon, 2019-06-13 Our understanding of ourselves and the world as historical has drastically changed since the postwar period yet this emerging historical sensibility has not been appropriately explained in a coherent theory of history In this book Zoltán Simon argues that instead of seeing the past

the present and the future together on a temporal continuum as history we now expect unprecedented change to happen in the future in visions of the future of technology ecology and nuclear warfare and we look at the past by assuming that such changes have already happened This radical theory of history challenges narrative conceptualizations of history which assume a past potential of humanity unfolding over time to reach future fulfillment and seeks new ways of conceptualizing the altered socio cultural concerns Western societies are currently facing By creating a novel set of concepts to make sense of our altered historical condition regarding both history understood as the course of human affairs and historical writing *History in Times of Unprecedented Change* offers a highly original and engaging take on the state of history and historical theory in the present and beyond
