The Nigerian Cocoa Industry and the International Economy in the 1930s Olisa Muojama, 2018-07-27 Periodic cycles and waves are characteristics of global capitalism The contraction in world trade during the Great Depression of the 1930s stands out as the strongest adverse shock to international trade in modern history This book uses the Nigerian cocoa industry's encounter with the world economy of the 1930s to knit together a gamut of themes ranging from the social formations of production to the forces of demand and supply and price fluctuations and stabilization as well as the protest movements against monopoly capitalism It examines the Nigerian cocoa industry within the international economy of the inter war years in order to demonstrate how the dynamics of the international capitalism of the 1930s such as the Great Depression and the fluctuations in commodity prices affected the cocoa industry and the peasant cocoa producers in colonial Nigeria It provides an interesting case study of the impact of international capitalism on the periphery economy as well as the consequences of economic dependence on the external market This book will be an indispensable resource for historians economists anthropologists and the general reader with an interest in the areas of international political economy depression economics world commodity trade and agriculture and its related industries

O'Connor, 2014-06-28 This best selling textbook focuses on the changes in geographical patterns that have taken place in recent years i.e. on the geographical pattern of recent and current economic change The area covered includes the countries lying between the limits of the Tropic of Cancer and the Tropic of Capricorn In this second edition substantial changes have been made in every chapter in order to keep up to date in respect of both the geographical pattern of development and prevailing attitudes towards it The discussion is still largely confined to the twenty year period between 1956 and 1976 and to the economic component of development

Beyond Ujamaa in Tanzania Goran Hyden, 2023-11-10 Beyond Ujamaa in Tanzania Underdevelopment and an Uncaptured Peasantry explores the challenges of development and underdevelopment in Africa with a focus on Tanzania's experience during its early socialist years The book critiques the dominant ideologies of development whether capitalist or

socialist as being rooted in Western industrial paradigms that often fail to address the realities of pre capitalist African societies It argues that the underdevelopment in Africa is not solely due to excessive penetration by global capitalism but also to capitalism s inability to dismantle the resilient pre capitalist structures in many rural societies The author highlights the role of the Tanzanian peasantry whose economic and social autonomy often resists the centralizing tendencies of modern development presenting them not as mere appendages to the global economy but as key players with their own modes of production and unique societal structures The book is grounded in over a decade of fieldwork and engagement with rural Tanzanian communities enriched by the author s fluency in Swahili and deep involvement in local life It argues for a more nuanced approach to studying African societies one that goes beyond Western assumptions and models By placing the peasant mode of production at the center of analysis the study challenges conventional wisdom and suggests that the primary development challenge in Africa lies not with multinational corporations but with understanding and working within the dynamics of the smallholder peasant economy The author also reflects on the limitations of conventional social science research and calls for greater involvement in the lived realities of the communities studied emphasizing the need for research methods that are sensitive to local contexts and values The book combines academic critique field observations and a focus on the epistemological biases of Western scholarship to present a compelling argument for rethinking development in Africa This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1980 **Agricultural Commercialization And Government Policy In Africa J.**

The Social Dynamics of Development David C. Pitt,2016-08-01 The Social Dynamics of Development

Africonomics Bronwen Everill,2025-09-09 A bold concise history of Western economic interventions in Africa by the former director of the Centre of African Studies at the University of Cambridge For centuries Westerners have tried to fix African economies From the abolition of slavery onward missionaries philanthropists development economists and NGOs have arrived on the continent full of good intentions and bad ideas Their experiments have invariably gone awry to the great surprise of all involved Historian Bronwen Everill argues that these interventions fail and frequently cause harm because they start from a misguided premise that African economies just need to be more like the West Ignoring Africa's own traditions of economic thought Americans and Europeans assumed a set of universal economic laws that they thought could be applied anywhere They enforced specifically Western ideas about growth wealth debt unemployment inflation women's work and more and used Western metrics to find African countries wanting The West does not know better than African nations how an economy should be run By laying bare the myths and realities of our tangled economic history Africonomics moves from Western ignorance to African knowledge

The Political Economy of Africa Vishnu Padayachee,2010-06-10 The Political Economy of Africa aims to fill a major gap in the existing literature by exploring the economy and economics of Africa The book has a critical approach from the perspective of political economy rather than mainstream economics This book addresses the seemingly intractable economic problems of the African continent and trace their origins but also always to bring out the instances of successful economic change and the possibilities for economic revival and renewal

Africa Assistant Professor Morten Jerven,2015-06-11 A valuable corrective to the fraying narrative of African failure Foreign Affairs Not so long ago Africa was being described as the hopeless continent Recently though talk has turned to Africa rising with enthusiastic voices exclaiming the potential for economic growth across many of its countries What then is the truth behind Africa's growth or lack of it In this provocative book Morten Jerven fundamentally reframes the debate challenging mainstream accounts of African economic history Whilst for the past two decades experts have focused on explaining why there has been a chronic

failure of growth in Africa Jerven shows that most African economies have been growing at a rapid pace since the mid nineties In addition African economies grew rapidly in the fifties the sixties and even into the seventies Thus African states were dismissed as incapable of development based largely on observations made during the 1980s and early 1990s The result has been misguided analysis and few practical lessons learned This is an essential account of the real impact economic growth has had on Africa and what it means for the continent s future

Pastoral Systems Research in Sub-Saharan

Africa ,1983-01-01 **Rural Wage Employment in Developing Countries** Carlos Oya,Nicola Pontara,2015-05-22 There is a striking scarcity of work conducted on rural labour markets in the developing world particularly in Africa This book aims to fill this gap by bringing together a group of contributors who boast substantial field experience researching rural wage employment in various developing countries It provides critical perspectives on mainstream approaches to rural agrarian development and analysis of agrarian change and rural transformations from a long term perspective This book challenges the notion that rural areas in low and middle income countries are dominated by self employment It purports that this conventional view is largely due to the application of conceptual frameworks and statistical conventions that are ill equipped to capture labour market participation The contributions in this book offer a variety of methodological lessons for the study of rural labour markets focusing in particular on the use of mixed methods in micro level field research and more emphasis on capturing occupation multiplicity The emphasis on context history and specific configurations of power relations affecting rural labour market outcomes are key and reoccurring features of this book This analysis will help readers think about policy options to improve the quantity and quality of rural wage employment their impact on the poorest rural people and their political feasibility in each context
