Economy 1870-1939 Derek H. Aldcroft, Harry W. Richardson, 1969-11-01 *Conceiving Companies* Timothy L.

Alborn, 2002-09-26 Questions concerning the relationships and boundaries between private business and public government are of great and perennial concern to economists economic and business historians political scientists and historians *Conceiving Companies* discusses the birth and development of joint stock companies in 19th century England an area of great importance to the history of this subject Alborn takes a new approach to the rise of large scale companies in Victorian England including the Bank of England and East India Company and Victorian railways locating their origins in political and social practice He offers a new perspective on an issue of great significance not only for historians but for political scientists and economists *A New Race of Men* Michael Fry, 2013-10-03 War opened and closed Scotland's greatest century a pitiless

part in the defeat of Napoleon in 1815 a huge blood sacrifice for the sake of victory from 1914 In between came the greatest contributions to the progress and happiness of the rest of mankind that the Scots have ever made in everything from the combine harvester to the mackintosh to anaesthesia It was a supremely successful achieving society yet one not without deep flaws in its urban poverty its destruction of the environment its religious intolerance its moral hypocrisy its crushing of Highland culture Michael Fry shows with an emphasis always on the human story how a succession of deep crises undermined the usually tranquil and prosperous surface of life in Victorian Scotland to leave a legacy of paradox that the modern nation has even today yet to overcome *British Qualifications* Kogan Page, 2006 The field of professional academic and vocational qualifications is ever changing The new edition of this highly successful and practical guide provides thorough information on all developments Fully indexed it includes details on all university awards and over 200 career fields their professional and accrediting bodies levels of membership and qualifications It acts as an one stop guide for careers advisors students and parents and will also enable human resource managers to verify the qualifications of potential employees

Children of the Sea Peter Aitchison, 2001 One hundred and eighty nine men drowned in a single afternoon in Scotland's worst fishing disaster It is a forgotten part of the nation's past yet it happened just a hundred and twenty years ago It decimated the coastal community of Eyemouth where the effects of Black Friday are felt to this day *Children of the Sea* is the remarkable story of a village on the margins of the sea and at the edge of the country It is a tale of survival through the wars of independence and the witch hunts of the seventeenth century of danger and high jinks when Eyemouth was the centre of a massive smuggling ring and above all of the hope and tragedy of fishing and of battles with the minister It is a story of a people who fought to survive and whose voice can now be heard from tales handed down through the generations *The 1772-73 British Credit Crisis* Paul Kosmetatos, 2018-03-21 Nowadays remembered mostly through Adam Smith's references to the short lived Ayr Bank in the *Wealth of Nations* the 1772-3 financial crisis was an important historical episode in its own right taking place during a pivotal period in the development of financial capitalism and coinciding with the start of the traditional industrialisation narrative It was also one of the earliest purely financial crises occurring in peacetime and its

progress showed an impressive geographical reach involving England Scotland the Netherlands and the North American colonies This book uses a variety of previously unpublished archival sources to question the bubble narrative usually associated with this crisis and to identify the mechanisms of financial contagion that allowed the failure of a small private bank in London to cause rapid and severe distress throughout the 18th century financial system It re examines the short and turbulent career of the Ayr Bank and concludes that its failure was the result of cavalier liability management akin to that of Northern Rock in 2007 rather than the poor asset quality alleged in existing literature It furthermore argues that the Bank of England s prompt efforts to contain the crisis are evidence of a Lender of Last Resort in action some thirty years before the classical formulation of the concept by Henry Thornton

To the Ends of the Earth T. M. Devine, 2011-10-25 The Scots are one of the world s greatest nations of emigrants For centuries untold numbers of men women and children have sought their fortunes in every conceivable walk of life and in every imaginable climate All over the British Empire the United States and elsewhere the Scottish contribution to the development of the modern world has been a formidable one from finance to industry philosophy to politics *To the Ends of the Earth* puts this extraordinary epic center stage taking many famous stories from the Highland Clearances and emigration to the Scottish Enlightenment and empire and removing layers of myth and sentiment to reveal the no less startling truth Whether in the creation of great cities or prairie farms the Scottish element always left a distinctive trace and Devine pays particular attention to the exceptional Scottish role as traders missionaries and soldiers This major new book is also a study of the impact of the global world on Scotland itself and the degree to which the Scottish economy was for many years an imperial economy with intimate important links through shipping engineering jute and banking to the most remote of settlements Filled with fascinating stories and an acute awareness of the poverty and social inequality that provoked so much emigration *To the Ends of the Earth* will make its readers think about the world in a quite different way

Routledge Revivals: The Making of Urban Scotland (1978) Ian Adams, 2018-02-01 Originally published in 1978 *The Making of Urban Scotland* traces the evolution of towns from their prehistoric origins to the present day Most of the material is based on research in Scotland s archives housed in the Scottish Record Office Special emphasis is placed on the causes of economic change and its repercussions upon Scottish town life The urban stresses of the nineteenth century are analysed in detail as well as the subsequent emergence of Scotland as Western Europe s pre eminent council house society The unique character of Scotland s housing occupies two chapters and for the first time the whole panoply of the statutory origins of the council house landscape is exposed

Glasgow: 1830 to 1912 Thomas Martin Devine, 1995 Covering the period of political reform at the beginning of the 1830s to the great expansion of the city s boundaries in 1912 it examines the adjustments which had to be made to cope with some of the fastest urban growth in Europe Particular attention is paid to the people institutions and power structures as Glasgow s intricate class profile is unravelled and the pivotal role of politics and government is fully explored

Journal of Economic Studies , 1968 Research notes in each issue

Mammon and the Pursuit of Empire Lance E. Davis, Robert A. Huttenback, 1986 This book presents answers to some of the key questions about the economics of imperialism

Creating Capitalism James Taylor, 2014 The growth of joint stock business in Victorian Britain re evaluated showing in particular the resistance to it Winner of the Economic History Society's Best First Monograph award 2009 The emergence of the joint stock company in nineteenth century Britain was a culture shock for many Victorians Though the home of the industrial revolution the nation's economy was dominated by the private partnership seen as the most efficient as well as the most ethical form of business organisation The large impersonal company and the rampant speculation it was thought to encourage were viewed with suspicion and downright hostility This book argues that the existing historiography understates society's resistance to joint stock enterprise it employs an eclectic range of sources from newspapers and parliamentary papers to cartoons novels and plays to unearth this forgotten economic debate It explores how the legal system was gradually restructured to facilitate joint stock enterprise a process culminating in the limited liability legislation of the mid 1850s This has typically been interpreted as evidence for the emergence of new positive attitudes to speculation and economic growth but the book demonstrates how traditional outlooks continued to influence legislation and the way in which economic reforms were driven by political agendas It shows how debates on the economic culture of nineteenth century Britain are strikingly relevant to current questions over the ethics of multinational corporations James Taylor is Senior Lecturer in British History at Lancaster University
