## Abstract

This article deals with the reception of Rosa Luxemburg's *The Accumulation of Capital: A Contribution to the Economic Explanation of Imperialism* in the Second International before the start of the First World War. Our analysis shows that, if the condemnation of *The Accumulation of Capital* by the political right and centre was almost unanimous, its acceptance by the left was far from universal. In fact, both Lenin and Pannekoek rejected Luxemburg's theory, adopting instead the economic analysis of an important spokesman of the centre, the Austro-Marxist Rudolf Hilferding. Our work concludes by analysing the reasons for those theoretical differences.

## The Second International and the theory of imperialism

Marx also used the term *Imperialismus* to denote the political regime of France in his book, *The Eighteenth Brumaire of Louis Bonaparte* (Marx 1852). Thus,

[The Palgrave Handbook of Global Approaches to Peace](#) Aigul Kulnazarova, Vesselin Popovski, 2018-12-19 With existing literature focusing largely on Western perspectives of peace and their applications a global understanding of peace is much needed Spurred by more recent debates and discourses that criticize the dominant realist and liberal approaches for crises in contemporary state and peace building the contributors to this handbook emphasize not only the need to solve this eternal conundrum of humanity but also demand with the rise of increasingly more violent conflicts in international relations the development of a global interpretive framework for peace and security To this end the present handbook examines conceptual institutional and normative interpretive approaches for making building and

promoting peace in the context of roles played by state and non state actors within local national regional and global units of analysis     **The Labour Monthly** ,1922 Includes section Book reviews     **Critical Theories in International Relations**

Tayyar Ari,2023-04-04 This edited book focuses primarily on contemporary debates and the critical and postmodern theories to be considered a significant contribution to the field This book shows that critical international relations theories which are incomprehensible and challenging are easy and understandable The book analyzes the Frankfurt School constructivism post colonialism feminism critical geopolitics political economy Copenhagen School Aberystwyth School Paris School and Ontological security Critical Theories in International Relations argues that neither identity nor security can be considered a fixed and objective issue can change according to time and space and depend on historical and sociological factors Nothing is given for critical approaches and they are produced and reproduced in ever changing conditions that lead to new truths and meanings These are the results of reflexive and non linear interactions In this context it is made pedagogically

understandable to the readers within this framework     *Feminist Praxis (RLE Feminist Theory)* Liz Stanley,2013-05-20 Feminist social scientists often find that carrying feminism into practice in their research is neither easy nor straightforward Designed precisely with feminist researchers in mind Feminist Praxis gives detailed analytic accounts of particular examples of feminist research showing how feminist epistemology can translate into concrete feminist research practices The contributors all experts in their field give practical examples of feminist research practices covering colonialism child minding gay men feminist social work cancer working with young girls using drama Marilyn Monroe statistics even the writing and reading of research accounts These detailed accounts are located in relation to the position of feminism and of women generally in the academic world and looked at in the light of discussions debates and controversies about feminist methodology across several disciplines Feminist Praxis is unique in combining theoretical discussion of feminist methodology with detailed accounts of practical research processes This blend of the practical and the theoretical will make it an invaluable text for feminists carrying out research at all levels and it will also appeal to those interested in the relationship between theory method and feminist epistemology     Corporate Power and Canadian Capitalism William K.

Carroll,2011-11-01 Challenging standard dependency theory William Carroll argues from empirical evidence that Canada s financial industrial elite have maintained and consolidated their competitive position at the centre of an inter corporate network Corporate Power and Canadian Capitalism thus acknowledges the unusually high degree to which capital is concentrated in a relatively few giant corporations in Canada but it denies that these commercial interests are subordinated to American corporate capital To test the validity of this new perspective on the transformation of indigenous capitalists into a national bourgeoisie Carroll traces the accumulation of capital in the largest Canadian corporations and the institutional relations that have existed among the same firms since World War II Instead of selling out to foreign capital Canadian firms have in fact become increasingly interlocked and Canadian controlled firms have been and continue to be the focus of both

the industrial and financial sectors with foreign controlled companies occupying decidedly peripheral positions From this interpretative position Canada s development is seen as markedly similar to that of other advanced capitalist countries culminating in consolidation of control under an elite accompanied both by penetration of foreign economies by domestic financial capitalists and a concomitant penetration of the domestic economy by foreign capital **Social Analysis** ,1981
