Dennis Wood,2002-09-11 For forty years I have defended the same principle freedom in everything in religion in philosophy in literature in industry in politics and by freedom I mean the triumph of the individual Constant thus summarized his beliefs at the end of his life A political theorist and a passionate defender of individual liberty he was also the author of one of the greatest French novels of psychological insight Adolphe In a major new biography Dennis Wood traces the development of Constant as a writer centrally preoccupied with the problematics of freedom not only in the fields of politics and religious belief but also in his own troubled relationship with several women **Scientific Institutions and Practice in France and Britain, c.1700-c.1870**

Maurice Crosland,2023-05-31 This second collection of studies by Maurice Crosland has as a first theme the differences in the style and organisation of scientific activity in Britain and France in the 18th and early 19th centuries Science was more closely controlled in France notably by the Paris Academy of Sciences and the work of provincial amateurs much less prominent than in Britain The most dramatic change in any branch of science during this period was in chemistry largely through the work of Lavoisier and his colleagues the focus of several articles here and the dominance of this group caused considerable resentment outside France not least by Joseph Priestley The issue of authority in science emerges again within France under the rule of Napoleon in a study of the exceptional power exercised by the great mathematician Laplace both in theoretical science and in academic politics This exploration of organisation and power is complemented by a comparative study of the practice of early physics and chemistry and their different reliance on laboratories This raises the question of whether chemistry provided a model for later experimental work in other sciences both through the construction of pioneering laboratories and in establishing early schools of research Bibliography of the

History of Medicine ,1993 First Letters in the Eighteenth and Nineteenth Centuries Alain Kerhervé,Catherine Thomas-Ripault,2020-07-09 First letters can be understood in various ways as the first letters written by a person such as the letters of children or of drafts which were preserved amended and copied as the first letter of a particular type such as an experienced letter writer s first love letter and as the first letter to a new correspondent among many others The idea of a first letter also suggests a link with the letters that follow what is the connection between the first letter and those which come after it Written by academics specializing in letter writing internationally this volume examines the letters of various authors philosophers and artists including Benjamin Constant Jos Maria de Heredia Voltaire Diderot Coleridge De Quincey and others It is structured in four sections letters from youth first letters in fictional works the writer s persona and first letters within correspondence **Success in Circuit Lies** Rosalina de la Carrera,1991-07-01 As contemporary thinkers continue to explore the intellectual affinities that bind the eighteenth and twentieth centuries their attention has turned with increasing frequency to Diderot Focusing on models of communication this book draws on an interdisciplinary configuration a conjunction of communication theory philosophy of science and literary theory to analyze texts from Diderot s own interdisciplinary corpus Of particular pertinence to the author s argument is Michel Serres s model of dialogue Rejecting the traditional notion of dialogue as a binary exchange Serres defines it instead as the product of the association of two interlocutors who join forces against a third term another interlocutor or background noise that threatens to disrupt the exchange Serres thus substitutes a ternary model of dialogue for the conventional binary one Using Serres s model as a point of departure the author not only identifies specific instances of Diderot s use of a ternary communicational model but more important also demonstrates how Diderot s writings themselves generate a ternary model of communication that is uniquely his She does this by tracing the model through texts drawn from domains as diverse as fiction history and natural philosophy The repeated recurrence of Diderot s ternary model in these different contexts brings into focus an unexpected unity in what at first looks like a disparate corpus As the analysis proceeds furthermore it also becomes clear that Diderot s materialist philosophy dictates a rhetoric aiming at the sensitive body just as much as the reasoning mind Though the astounding diversity of Diderot s writings as encyclopedist novelist playwright philosopher scientific theorist and art critic has most often led critics to avoid the question of what coherences there might be within that diversity in this book the author asks just that question and goes far toward providing a convincing satisfying and stimulating answer The book includes a new translation of the Pr face annexe of *La Religieuse* the integral part of Diderot s novel missing from most readily available English language editions Gender in Transition Ulrike Gleixner,Marion W. Gray,2006 The historical influence of gender on German society and change *Rhetoric and the Novel in Eighteenth-century France* Susan Ellis Rosa,1986 Women, Gender and Enlightenment B. Taylor,S.
