## Study In Grey:

**Grey Prediction Methods and Their Applications** Bo Zeng, Zhuanzhuan Shi, 2024-10-12 This book introduces the grey prediction model methodology and its applications as a professional book. It involves the key concepts, data characteristics of modelling objects and the latest research achievements in grey system. The grey prediction models for homogeneous and non-homogeneous exponential sequences, saturated S-shaped sequences and special sequences have been introduced. This book combines the classical models and the latest models, case studies and model applications, modelling methods and MATLAB programs in grey system. It is a guidebook for both new learners and professionals of grey prediction models. *Black, White and Grey* Franz Krüger, 2004 In South Africa the debate about journalism ethics has taken particular turns in contemporary times. Issues of transformation and race have sparked heated debates in the profession. This book grew out of these discussions. It attempts to measure the traditional standards of journalism against the demands of a changing society.

**Practical Grey-box Process Identification** Torsten P. Bohlin, 2006-09-07 This book reviews the theoretical fundamentals of grey box identification and puts the spotlight on MoCaVa, a MATLAB compatible software tool for facilitating the procedure of effective grey box identification. It demonstrates the application of MoCaVa using two case studies drawn from the paper and steel industries. In addition, the book answers common questions which will help in building accurate models for systems with unknown inputs. *Fifty Shades of Grey: Exploring the Dark Sides of Leadership and Followership* Susanne Braun, Ronit Kark, Barbara Wisse, 2019-01-21 The scientific field of leadership and followership is fast evolving and has seen several interesting developments over recent years. The early heroic views of leadership are slowly turning into more nuanced perspectives including the understanding that leadership and followership are mutually dependent on each other. Likewise, there is a growing awareness that the focus on the positive side of leadership and followership can be fruitfully complemented by a focus on the darker sides of these constructs. According to the latest research, plenty of grey areas exist where further insights into leadership and followership are needed. We seek to emphasize the different shades of dark leadership by taking leaders, followers and their interaction in specific contexts into account. Accordingly, many of the findings presented in this Research Topic align with a deviation away from the idea of the omnipotent leader. Not only leaders' dark traits such as narcissism and psychopathy but also followers' Machiavellianism emerged as hindering factors for positive organizational functioning. Other results presented in this Research Topic will be fruitful to explain what drives leaders towards dark side behaviors, the consequences of dark side leader behaviors, e.g. different types of destructive leadership and how followers respond to them, e.g. follower attributions of perceived abusive supervision. Contributions to this Research Topic are also pushing the boundaries of current theorizing, shedding further light on the shades of grey when it comes to the possibly unintended negative consequences of leadership and followership. In sum, the dark sides of leadership and followership are a natural part of an organizational reality that many employees face day in and day out. The aim of this

Research Topic is to encourage an integrative view of leadership and followership and their dark sides for a better understanding of complex organizational systems and implications for better practice Enabling grey literature discovery to benefit aquatic science, fisheries and aquaculture - 25 September 2019, Terengganu, Malaysia Vicary, T., Kalentsits, M.,2021-09-24 Grey literature which includes policy reports technical guidelines and dissertations and theses is produced by many actors within aquatic sciences fisheries and aquaculture Many hours of research go into producing these documents often with the purpose of solving particular environmental species or socio economic problems Whilst the nature of the problem tackled by much grey literature is focused on a specific problem in a specific area its lessons can often be applied to similar problems or environments around the world What prevents this taking place is that grey literature can be hard to access due to the way it is produced and stored grey literature can often be stored offline or on institutional websites where it is difficult to access using internet search engines or databases **Sustainable Development of Smart Cities**
