Wallis, 2023-03-31 This book explores the political legal medical and social battles that led to the widespread institutionalization of Californians with disabilities from the gold rush to the 1970s By the early twentieth century most American states had specialized facilities dedicated to both the care and the control of individuals with disabilities Institutions reflect the lived historical experience of many Americans with disabilities in this era Yet we know relatively little about how such state institutions fit into specific regional state or local contexts west of the Mississippi River how those contexts shaped how institutions evolved over time or how regional institutions fit into the USA s contentious history of care and control of Americans with mental and developmental disabilities This book examines how medical social and political arguments that individuals with disabilities needed to be institutionalized became enshrined in state law in California through the creation of a bureaucracy of disability Using Los Angeles County as a case study the book also considers how the friction between state and county policy in turn influenced the treatment of individuals within such facilities Furthermore the book tracks how the mission and methods of such institutions evolved over time culminating in the 1960s with the birth of the disability rights movement and the complete rewriting of California s laws on the treatment and rights of Californians with disabilities This book is a must read for those interested in the history of California and the American West and for anyone interested in how the intersections of disability politics and activism shaped our historical understanding of life for Americans with disabilities **Research Grants Index** National Institutes of Health (U.S.).
