

What is **Anthropology**?

Anthropology is a multidisciplinary field of study that explores the origins, development, and diversity of human beings and their societies.

It encompasses various subfields including *cultural anthropology*, which examines the beliefs, practices, and social structures of different cultures; *archaeology*, which investigates past human societies through material remains; and *linguistic anthropology*, which studies the role of language in human societies.

Anthropologists use diverse methods such as ethnography, excavation, and comparative analysis to understand the complexity of human culture and biology.

Ethnography through Thick and Thin George E. Marcus, 2021-06-08 In the 1980s George

Marcus spearheaded a major critique of cultural anthropology expressed most clearly in the landmark book *Writing Culture* which he coedited with James Clifford. *Ethnography through Thick and Thin* updates and advances that critique for the late 1990s. Marcus presents a series of penetrating and provocative essays on the changes that continue to sweep across anthropology. He examines in particular how the discipline's central practice of ethnography has been changed by multi-sited approaches to anthropology and how new research patterns are transforming anthropologists' careers. Marcus rejects the view often expressed that these changes are undermining anthropology. The combination of traditional ethnography with scholarly experimentation, he argues, will only make the discipline more lively and diverse. The book is divided into three main parts. In the first, Marcus shows how ethnographers' tradition of defining fieldwork in terms of peoples and places is now being challenged by the need to study culture by exploring connections, parallels, and contrasts among a variety of often seemingly incommensurate sites. The second part illustrates this emergent multi-sited condition of research by reflecting it in some of Marcus's own past research on Tongan elites and dynastic American fortunes. In the final section, which includes the previously unpublished essay *Sticking with Ethnography through Thick and Thin*, Marcus examines the evolving professional culture of anthropology and the predicaments of its new scholars. He shows how students have increasingly been drawn to the field as much by such powerful interdisciplinary movements as feminism, postcolonial studies, and cultural studies as by anthropology's own traditions. He also considers the impact of demographic changes within the discipline, in particular the fact that anthropologists are no longer almost exclusively Euro-Americans studying non-Euro-Americans. These changes raise new issues about the identities of anthropologists in relation to those they study and indeed about what is to define standards of ethnographic scholarship. Filled with keen and highly illuminating observations, *Ethnography through Thick and Thin* will stimulate fresh debate about the past, present, and future of a discipline undergoing profound transformations.

Anthropologists at Home in North America Donald Alan Messerschmidt, 1981-12-31 A collection of seventeen essays focusing on the issue of practising anthropology in one's own society.

Cultural Anthropology Serena Nanda, Richard L. Warms, 2006-05 Renowned for its outstanding integration of rich ethnographies into the core text, *CULTURAL ANTHROPOLOGY* Ninth Edition continues to bring you excellent coverage of cultures from around the world. The text also continues to emphasize issues of gender, stratification, ethnicity, globalization, and contemporary issues. This revision integrates the most recent research updates as well as high-interest student features such as *Anthropology Makes A Difference* and *Global Connections*, features that capture a key message of the text: that the study of anthropology is important because it builds awareness and helps develop informed citizens of the many similarities as well as differences between cultures around the world. In addition to the text, this new edition offers an innovative student study tool, *Cultural Anthropology NOW*, which allows students to assess their understanding of the material through Pre-Tests, Personalized Study Plans, and Post-Test materials. Study Plans reference specific text material to help the student and incorporate many tools

and video exercises to help students visualize the cultures they are reading about and gain a better understanding of the concepts discussed. The plans can be assigned and progress tracked by instructors. Visit <http://anthropology.wadsworth.com> for a demonstration.

Cultural Anthropology Marvin Harris, 1995. Written by the author of *The Guru of Cultural Materialism*, this revised text unites seemingly unrelated topics. Harris uses everyday applications of anthropological theories and issues in a user-friendly way. Two new chapters: one on race, ethnicity, and racism, and the other on human sexuality, discuss new research and developments in these areas. This text also demonstrates the relevance of cultural anthropology to contemporary social problems. Updated and expanded chapter previews and new cartoons, jokes, and illustrations are featured. Two new full-colour photo essays assist students' visual understanding of cultural diversity.

Islamic Culture Farid Younos, 2013-11-14. *Islamic Culture: A Study of Cultural Anthropology* illustrates Islamic culture from an anthropological point of view. It shows that Islam as a way of life relates to all cultural aspects based upon the tradition of its Prophet Mohammad. For the first time, this study shows that the Prophet of Islam is the founder of Islamic culture and this culture is not an inherited concept but based upon a revelation received from God.
