Studying Interpersonal Communication The Research Experience:

Studying Interpersonal Communication Ruth Anne Clark, 1991-02-01 Judgements inferences and generalizations about interpersonal communication are made by us all However our observations are just the first step in understanding this phenomenon This volume examines the systematic empirical study of interpersonal communication Clark lays the groundwork for understanding systematic procedures with an emphasis on experimental methodology With this introduction to empirical study readers can learn to become critical consumers of empirical research in interpersonal communication

Construction Communication Stephen Emmitt, Christopher A. Gorse, 2009-02-12 Communicating the design intent from initial briefing through the design stage and on to the actual construction is vital to the success of any building project This book looks at communication across physical organisational and cultural barriers with a view to improving the design and construction process The authors investigate communication issues across physical organisational and cultural barriers and present clear guidance and practical advice

Communication in Construction Teams Stephen Emmitt, Christopher Gorse, 2006-09-27 Construction teams are usually complex interdisciplinary and temporary and as such the need for effective communication is crucial However published data regarding the manner in which individuals interact within the temporary project team is scarce with little other than anecdotal evidence available Recognizing this gap Communication in Construction Teams provides a comprehensive overview of the literature on interpersonal communication and delivers a critical review of various research methods previously used in and outside the construction management field Making use of Bales interaction process analysis IPA a tool used successfully in many fields to collect interaction data the text investigates the link between successful projects and the effectiveness of communication finding that participants in the construction process exhibit regular patterns of interaction and most significantly that there are different patterns of interaction associated with successful and unsuccessful projects Putting forward a number of practical suggestions to assist all actors involved in construction projects this insightful publication will be of interest to researchers in the fields of building design and construction management
