## **Studying Those Who Study Us An Anthropologist In The World Of Artificial Intelligence:**

Studying Those Who Study Us Diana Forsythe, 2001 Diana E Forsythe was a leading anthropologist of science technology and work who pioneered the field of the anthropology of artificial intelligence This volume collects her best known essays along with other major works that remained unpublished upon her death in 1997 It is also an exemplar of how reflexive ethnography should be done

*Studying Those Who Study Us* Diana E. Forsythe, 2022 Diana E Forsythe was a leading anthropologist of science technology and work and especially of the field of artificial intelligence This volume collects her best known essays along with other major works that remained unpublished upon her death in 1997 The essays proceed as a series of developing variations on the key questions that still confront science and technology studies today What assumptions do expert systems designers make about users and about knowledge more broadly when they build software How should humans interact with computers and how do they really Why do computing firms hire anthropologists to study human computer interaction and what do anthropologists find once they are hired And how and why are traditional power asymmetries between men and women produced and maintained in engineering firms and laboratories The book is not only a significant anthropological study of artificial intelligence and informatics but is also an exemplar of how reflexive ethnography should be done Among several pioneering strands of thought it investigates the roles of gender and power in computer engineering looking at the cultural mechanisms that support the persistent male domination of engineering and analyzing the laboratory as a fictive kin group that reproduces gender asymmetries

**At the Edge of AI** Libuše Hannah Veprek, 2024-08-02 How are human computation systems developed in the field of citizen science to achieve what neither humans nor computers can do alone Through multiple perspectives and methods Libuše Hannah Veprek examines the imagination of these assemblages their creation and everyday negotiation in the interplay of various actors and play science entanglements at the edge of AI Focusing on their human technology relations this ethnographic study shows how these formations are marked by intraversions as they change with technological advancements and the actors goals motivations and practices This work contributes to the constructive and critical ethnographic engagement with human AI assemblages in the making

### **Studying Virtual Math Teams**

Gerry Stahl, 2010-05-03 Studying Virtual Math Teams centers on detailed empirical studies of how students in small online groups make sense of math issues and how they solve problems by making meaning together These studies are woven together with materials that describe the online environment and pedagogical orientation as well as reflections on the theoretical implications of the findings in the studies The nature of group cognition and shared meaning making in collaborative learning is a foundational research issue in CSCL More generally the theme of sense making is a central topic in information science While many authors allude to these topics few have provided this kind of detailed analysis of the mechanisms of intersubjective meaning making This book presents a coherent research agenda that has been pursued by the author and his research group The book opens with descriptions of the project and its methodology as well as situating this research in the past and present context of the CSCL research field The core research team then presents five concrete analyses of group interactions in different phases of the Virtual Math Teams research project These chapters are followed by several studies by international collaborators discussing the group discourse the software affordances and alternative representations of the interaction all using data from the VMT project The concluding chapters address implications for the theory of group cognition and for the methodology of the learning sciences In addition to substantial introductory and concluding chapters this important new book includes analyses based upon the author's previous research thereby providing smooth continuity and an engaging flow that follows the progression of the research The VMT project has dual goals a to provide a source of experience and data for practical and theoretical explorations of group knowledge building and b to develop an effective online environment and educational service for collaborative learning of mathematics Studying Virtual Math Teams reflects these twin orientations reviewing the intertwined aims and development of a rigorous science of small group cognition and a Web 2.0 educational math service It documents the kinds of interactional methods that small groups use to explore math issues and provides a glimpse into the potential of online interaction to promote productive math discourse

**Technology and Military Power** Jon R. Lindsay, 2020-07-15 Militaries with state of the art information technology sometimes bog down in confusing conflicts To understand why it is important to understand the micro foundations of military power in the information age and this is exactly what Jon R Lindsay s Information Technology and Military Power gives us As Lindsay shows digital systems now mediate almost every effort to gather store display analyze and communicate information in military organizations He highlights how personnel now struggle with their own information systems as much as with the enemy Throughout this foray into networked technology in military operations we see how information practice the ways in which practitioners use technology in actual operations shapes the effectiveness of military performance The quality of information practice depends on the interaction between strategic problems and organizational solutions Information Technology and Military Power explores information practice through a series of detailed historical cases and ethnographic studies of military organizations at war Lindsay explains why the US military despite all its technological advantages has struggled for so long in unconventional conflicts against weaker adversaries This same perspective suggests that the US retains important advantages against advanced competitors like China that are less prepared to cope with the complexity of information systems in wartime Lindsay argues convincingly that a better understanding of how personnel actually use technology can inform the design of command and control improve the net assessment of military power and promote reforms to improve military performance Warfighting problems and technical solutions keep on changing but information practice is always stuck in between
