Denicolo, Michael Kompf, 2005-08-04 The papers from the first two International Study Association on Teachers and Teaching conferences are presented in this title as book chapters Each paper has historical value marking as they do both a change in topic focus and a revolution in research practice They also have a practical value in that they provide a large reference source for and a wide range of examples of both topics and methods of research Value for the future can be found in the texts that note lacunae in research and unresolved issues Further since the chapters derive from research conducted in a variety of national contexts revealing some evidence of common constraints and opportunities impinging on education at the time questions are stimulated about what has changed and what has stayed the same in the interim **Systems of Reason and the Politics of Schooling** Miguel Pereyra, Barry Franklin, 2014-06-27 The 1980s were an important decade for educational inquiry It was the moment of the linguistic turn with its emphasis on the role of language as a constructor of reality a structuring agent for institutions such as schools and a medium for translating knowledge into elements of power for processes of social regulation Drawing on the work and insights of educational researcher Thomas S Popkewitz this book shows how the linguistic turn provided an alternative to both mainline educational research grounded in the ideals of political liberalism and the effort of neo Marxists to challenge liberal thinking in favor of a scholarship based on class conflict and economic determinism *The Contemporary Soviet City* Henry W. Morton, Robert C. Stuart, 2017-07-05 This anthology of short stories reflects the writers shared core experience of Korea s trajectory from an inward looking feudal state through Japanese colony and battle ground for the Korean War to a modernizing society Three stories have been added to the original edition **The Impracticality of Practical Research** Thomas Stanley Popkewitz, 2020-04-16 There is an alluring desire that research should lead us to find the practical knowledge that enables

people to live a good life in a just and equitable society This desire haunted the 19th century emergence of the social sciences as a discipline then became more pronounced in the postwar mobilizations of research Today that desire lives on in the international assessments of national schools and in the structure of professional education both of which influence government modernization of schools and also provide for people s well being American policy thus reflects research in which reforms are verified by scientific empirical evidences about what works in experiments and will work therefore in society The book explores the idea that practical and useful knowledge changes over time and shows how this knowledge has been re visioned in contemporary research on educational reform instructional improvement and professionalization The study of science draws on a range of social and cultural theories and historical studies to understand the politics of science as well as scientific knowledge that is concerned with social and educational change Research hopes to change social conditions to create a better life and to shape people whose conduct embodies these valued characteristics the good citizen parent or worker Yet this hope continually articulates the dangers that threaten this future Thomas Popkewitz explores how the research to correct social wrongs is paradoxically entangled with the inscription of differences that ultimately hamper the efforts to include

Contemporary Perspectives on Social Learning in Early Childhood Education Olivia Saracho, Bernard Spodek, 2007-06-01 Social epistemology is a broad set of approaches to the study of knowledge and to gain information about the social dimensions This intellectual movement of wide cross disciplinary sources reconstructs the problems of epistemology when knowledge is considered to be intrinsically social In the first chapter Social Epistemology and Social Learning Olivia Saracho and Bernard Spodek discuss the social and historical contexts in which different forms of knowledge are formulated based on the perspective of social epistemology They also discuss the emergence of social epistemology which guides researchers to investigate social phenomena in laboratory and field settings Social factors external to the appropriate business of science have a major impact in the social studies researchers historical case studies Thus social studies researchers may be considered social epistemologists because a they focus on knowledge of social influences and b they infer epistemologically significant conclusions from their sociological or anthropological research In addition analyses indicate that studies of scientific paradigms are basically a struggle for political power rather than reflecting reliable epistemic merit Social studies researchers focus on knowledge of social influences on knowledge which is analogous to the knowledge of the social epistemologists They also use their sociological or anthropological research to infer epistemologically significant conclusions

Redesigning Teacher Education Alan R. Tom, 1997-09-25 Alan Tom is among the best at relating important issues in teacher education and a critical reading of the literature with his own professional experience This book is ambitious It lives up to the claim of examining political and institutional problems along with conceptual and intellectual ones This is something few teacher educators attempt and is a critical area to open up for

sustained analysis Drawing upon events from his career as a teacher educator Alan R Tom candidly analyzes the predominant criticisms of teacher education and rejects the common tendency to infer the teacher education curriculum from such ideas as metaphors for teaching or knowledge He proposes eleven design principles to serve as a reform agenda including creating programs capable of self renewal having faculty model the desired image and skills of teaching and rethinking the sequence of practice and theory Each principle identifies a differing dimension for the conceptual and structural redesign of teacher preparation Four specific change strategies are evaluated as well task force top down piloting and family style The low status of teacher educators and the excessive regulation of teacher education are also examined as is the failure to give adequate attention to the administrative organization for teacher education *Critical Moments in the Teaching of Mathematics* Janet Carolyn Shroyer, 1981 Recruiting and Retaining Teachers Anne Cockburn, Terry Haydn, 2004 In times of increasing teacher shortage this excellent guide gives advice on how to recruit and keep good teachers It includes case studies of schools and LEAs that have been particularly successful even in challenging circumstances *Soviet Politics and Education* Frank M. Sorrentino, Frances R. Curcio, 1986 By employing the writings of philosophers political leaders journalists political scientists and educators the two authors explore the interrelationship of politics and education in the Soviet Union and analyze how the educational system and the sociological structure reinforces the political ideologies of the communist system
