Stuffand Nonsense:

Institutions and the Person Howard Saul Becker, Blanche Geer, David Riesman, Robert S. Weiss, 2017-07-12 Everett C Hughes had a great impact on the field of sociology as a whole and on an entire generation of sociologists. Some of Hughes' former students and colleagues honor him in this book. The essays address the main themes in his work over the years and illustrate as well Hughes' impact on the contributors, many of whom are themselves senior figures in the field. The book as a whole provides a distinguished and representative sampling of a major stream of contemporary sociological thought. Each of the five main divisions in the book covers one aspect of Hughes' work. The first deals with the study of occupations and professions, a field in which Hughes was a leader. The second section deals with race relations and other situations in which peoples of differing cultures meet. Beginning with his own work in French Canada many years ago, Hughes' interests spread and the breadth of this interest is seen in chapters on India, Peru, and race relations in the United States. Problems of organizations, how they are put together and how they work, are contained in a third section. A fourth section reflects Hughes' interest in the impact of institutional experience on the people who participate in social institutions and includes chapters on occupational socialization, status passage, and the use of drugs. A final section develops still another of Hughes' interests: social science method. Presenting some of the most important topics of contemporary theory and research, this book remains profitable reading for every member of the discipline.

Henry James Goes to the Movies Susan M. Griffin, During his years as a scientist working for the British government in India, Sir Albert Howard conceived of and refined the principles of organic agriculture. Howard's *The Soil and Health* became a seminal and inspirational text in the organic movement soon after its publication in 1945. *The Soil and Health* argues that industrial agriculture, emergent in Howard's era and dominant today, disrupts the delicate balance of nature and irrevocably robs the soil of its fertility. Howard's classic treatise links the burgeoning health crises facing crops, livestock, and humanity to this radical degradation of the Earth's soil. His message that we must respect and restore the health of the soil for the benefit of future generations still resonates among those who are concerned about the effects of chemically enhanced agriculture.

My Own Four Walls Don Rose, 2018-10-10 Don Rose came to the U.S. from England in 1908 when he was 18, entering through Ellis Island like countless other immigrants. By 1941 he was one of Philadelphia's best known newspaper columnists. That year he published his gentle, funny memoir *My Own Four Walls*, the story of the ramshackle farmhouse he and Marjorie, his wife, bought in 1918 for themselves and their 12 children. One of his grandsons, Neil Genzlinger, himself a journalist at the *New York Times*, here brings that book back to life with the original illustrations a century after his grandfather had signed the deed. Part diary, part DIY manual, Rose's unsung classic is a tale of smoky fireplaces, leaky ceilings, and unruly gardens at a time when refrigerators were newfangled and suburban homes were furnished at country auctions. Most of all, it is a story of how one man with persistence slowly put down roots in his adopted
