The Aryan Myth A History Of Racist And Nationalist Ideas In Europe:

Aryan Myth Léon Poliakov, 1974-08 In Nazi Germany between the years 1940 and 1944 proof of your Aryan or Semitic roots meant the difference between life and death How this inhuman and intrinsically absurd theory of racial superiority originated and how it took hold of the German imagination makes for a fascinating scholarly study Tracing the origins of the Aryan Myth in the West the author shows how in the heyday of nationalism most European people developed legends glorifying their high born ancestry He shows how these legends developed into pseudoscientific theories which treated Europeans as the norm and other peoples as inferior until in 19th century Germany they culminated in the concept of a superior Germanic race in contrast to the inferior Jewish race This cultural study sheds horrifying new light on the philosophy that justified the mass extermination of millions of subhumans during World War II From publisher description

Independent State of Croatia Nevenko Bartulin, 2013-11-14 This book traces the intellectual origins of race theory in the pro Nazi Ustasha Independent State of Croatia 1941-1945. This race theory was not as historians of the Ustasha state have hitherto argued a product of a practical accommodation to the dominant Nazi racial ideology. Contrary to the general historiographical view which has either downplayed or ignored the important place of race not only in Ustasha ideology and politics but more generally in modern Croatian and Yugoslav nationalism, this work stresses the significant role that theories of ethnolinguistic origin and racial anthropology played in defining Croat nationhood from the mid nineteenth to the mid twentieth century. Upon the basis of older ideological and cultural traditions, the Ustasha state constructed an ideal Aryan racial type.

Bordering on the Body Laura Doyle, Laura Anne Doyle, 1994 Argues that many major texts of 20th century literature revolve around the concept of the mother figure. Examining novels of the Harlem Renaissance and Modernism and drawing upon the history of eugenics and anthropology, this study shows how mother figures represent symbols of race and ethnicity.

The Idea of National Superiority in Central Europe, 1880-1918 Marius Turda, 2004 This book focuses on the ways in which biological discourses of race and ethnicity affected and shaped nationalism and the idea of national superiority in Central Europe between 1880 and 1918. Preface In this book Marius Turda shifts a familiar and topical debate on to unfamiliar and neglected ground. Since the shattering events of the 1930s and 1940s much has been written about the genesis of notions of race in Central Europe. The blending of organic and collectivist traditions in German thought with the evolutionary arguments which derived especially from Darwin and with biological ideas about heredity was catalysed from the 1860s onward by increasingly intense nationalist sentiments. None of this led directly to Nazism but it did create a climate in which such racist conceptions might be able to thrive. Their relation to forms of ethnic self assertion was direct and immediate. Here is Turda's starting point. Austria-Hungary in its last decades became notorious for nationality conflicts but hitherto it has been generally held that racial theories played a comparatively minor role there. Austria as a pressure group Their rabid anti-Semitism shaded into a more broadly shared dislike of the salient role of the Jews in the country's public life. Turda expands on the theoretical and quasi-scientific context for this, demonstrating in particular the influence of Houston Stewart Chamberlain who lived for some time in Vienna and of Ludwig Gumplowicz the cult sociologist of his day. But Turda's real novelty is to extend to the other half of the Dual Monarchy his analysis of the growing role of race. Hungary had some essential preconditions for it to infect national ideology. There was acute competition between ethnic groups, mainly a series of bilateral contests between the dominant Magyar interest with its relative majority of the population and the half dozen other significant nationalities. Moreover there was still an inherited discourse of an essentially tribal kind: the Magyars as a pristine blood brotherhood as conquerors and warriors or to their opponents as Asian immigrants and uncultivated barbarians. nineteenth century from vindication of the nobles and their political and social privileges to cover a whole ethnic community bound by fierce adherence to Hungarian integral statehood and to Magyar linguistic culture. Yet the racial

element has usually appeared to be balanced for historians by another long established feature of Magyar hegemony its attractiveness to many born outside the Magyar camp and the concomitant willingness of the latter to accept on equal terms those who assimilated to its values Over the centuries that had been a historical reality as well as equally importantly a perception of Magyar hospitableness magnanimity and adaptability With most of the commentators whom Turda examines it remains a clear principle This is hardly surprising whereas only one of them Zsolt Beothy was the scion of an ancestral noble or gentry family fully half came themselves from a non Magyar background Anti-Semitism in particular was largely absent from the Hungarian debate of his innovative account of racial thinking among influential representatives of the ruling culture of Dualist Hungary He sets it in relief with his concluding portrait of a Romanian Aurel Popovici whose ideas about race likewise drew on a traditional national agenda in this case defensive attitudes specifically resistant to Hungarian assimilatory pressures and stressing purity of descent as distinctive of Romanians ethnic identity Popovici's work was a milestone in the heightened sensitivity to issues of national degeneracy which set in after the turn of the twentieth century and as such anticipated one of the principal obsessions of later fascist ideology In 1908 a wandering Scotsman Scotus Viator nom de plume of the young historian Robert William Seton Watson published a devastating critique of the politics of integration being pursued by Magyars He called it *Racial Problems in Hungary* Thus the most significant work of the leading foreign contributor to the debate on the nationality issue in the Habsburg Monarchy carried the keyword of Turda's investigation in its very title been called peoples and in our day are often known as ethnic groups there is no imputation for this British liberal of blood descent common physical characteristics or claims to inborn superiority Yet the terminology itself could easily become loaded with fresh meanings That would take place dramatically a decade later when the whole Habsburg edifice collapsed and a resultant new structure which Seton Watson had a share in creating unleashed yet more embittered nationalist clashes on the region Marius Turda has been uniquely placed to bring this project to fruition Bringing good knowledge of all the relevant languages including German and Hungarian as well as his native Romanian he has studied and researched in a number of different environments and acquired a notable scholarly detachment for dealing with these highly controversial issues and opens up broad and rich new perspectives on the political thought and intellectual culture of a part of Europe which contributed greatly to the instability of the whole continent in the early twentieth century R J W Evans Regius Professor of History Oxford University

Idea of Race in Science Nancy Stepan, 1982-06-18 *The History of Anti-Semitism: From Voltaire to Wagner* Léon Poliakov, 1965 Ethnicity, Race, Religion Katherine M. Hockey, David G. Horrell, 2018-06-28 This book is open access and available on www.bloomsburycollections.com It is funded by Knowledge Unlatched Religion ethnicity and race are facets of human identity that have become increasingly contested in the study of the Bible largely due to the modern discipline of biblical studies having developed in the context of Western Europe concurrent with the emergence of various racial and imperial ideologies The essays in this volume address Western

domination by focusing on historical facets of ethnicity and race in antiquity the identities of Jews and Christians and the critique of scholarly ideologies and racial assumptions which have shaped this branch of study The contributors critique various Western European and North American contexts and bring fresh perspectives from other global contexts providing insights into how biblical studies can escape its enmeshment in often racist notions of ethnicity race empire nationhood and religion Covering issues ranging from translation and racial stereotyping to analysing the significance of race in Genesis and the problems of an imperialist perspective this volume is vital not only for biblical scholars but those invested in Christian Jewish and Muslim identity The Image of the Turk in Europe from the Declaration of the Republic in 1923 to the 1990s
