An Introduction To Vedic Astrology: Spiritual Science Of The Ancients Howard Beckman, 1999 The book in there sections studies Vedic Astrology in much detailed stance practical applications of Vedic astrology in different area of life characteristics and representations of the planets signs houses and stars and remedial measure to help balance disharmonic influences within the horoscope **Encyclopaedic Dictionary of Vedic Terms** Swami Parmeshwaranand, 2000 **The Great Transformation** Karen Armstrong, 2009-02-24 From one of the world s leading writers on religion and the highly acclaimed author of the bestselling A History of God The Battle for God and The Spiral Staircase comes a major new work a chronicle of one of the most important intellectual revolutions in world history and its relevance to our own time In one astonishing short period the ninth century BCE the peoples of four distinct regions of the civilized world created the religious and philosophical traditions that have continued to nourish humanity into the present day Confucianism and Daoism in China Hinduism and Buddhism in India monotheism in Israel and philosophical rationalism in Greece Historians call this the Axial Age because of its central importance to humanity s spiritual development Now Karen Armstrong traces the rise and development of this transformative moment in history examining the brilliant contributions to these traditions made by such figures as the Buddha Socrates Confucius and Ezekiel Armstrong makes clear that despite some differences of emphasis there was remarkable consensus among these religions and philosophies each insisted on the primacy of compassion over hatred and violence She illuminates what this family resemblance reveals about the religious impulse and quest of humankind And she goes beyond spiritual archaeology delving into the ways in which these Axial Age beliefs can present an instructive and thought provoking challenge to the ways we think about and practice religion today A revelation of humankind s early shared imperatives yearnings and inspired solutions as salutary as it is fascinating Excerpt from The Great Transformation In our global world we can no longer afford a parochial or exclusive vision We must learn to live and behave

as though people in remote parts of the globe were as important as ourselves The sages of the Axial Age did not create their compassionate ethic in idyllic circumstances Each tradition developed in societies like our own that were torn apart by violence and warfare as never before indeed the first catalyst of religious change was usually a visceral rejection of the aggression that the sages witnessed all around them All the great traditions that were created at this time are in agreement about the supreme importance of charity and benevolence and this tells us something important about our humanity
