Mark R. Daniels,2001-02-28 Public opinion polls consistently reveal the lack of confidence disillusionment and mistrust that citizens feel toward government Daniels and his contributors believe that the relationship between citizens and their governments can be changed by facilitating greater citizen collaboration with government particularly through local sustainable programs As the case studies show often sustainable community programs are created through grassroots movements that are initiated and managed by citizens themselves bringing them in contact with their local elected and appointed officials Unlike traditional programs that are administered by local officials on behalf of their citizens once sustainable community programs are created citizens administer their own programs in collaboration with local officials The case studies look at a variety of sustainable programs primarily in the United States that help to deal with issues such as recycling transportation microcredit site redevelopment pollution health care and hunger Creating Sustainable Community Programs is the first book on sustainable programs that is intended for an audience of public administration scholars researchers and students as well as practitioners who are searching for ways to change the relationship between citizens and their governments Games, Sports, and Play Thomas Hurka,2019-09-05 This volume presents new philosophical essays on

a topic that s been neglected in most recent philosophy games sports and play Some contributions address conceptual questions about what games and sports have in common and that distinguishes them from other activities here many take their start from Bernard Suits s celebrated analysis of game playing in his book The Grasshopper and either elaborate it or propose an alternative to it Other essays discuss normative issues that arise within games and sports such as about fairness for example in the treatment of male and female athletes Yet others consider broader evaluative questions about the value of games and sports which some see as enabling the display of distinctive excellences Games Sports and Play includes a posthumous essay by Suits defending his claim in The Grasshopper that life in utopia would consist primarily in playing games The volume s chapters approach the topic of games sports and play from different angles but always in the belief that there is rich terrain here for philosophical investigation **Scorecasting** Tobias Moskowitz,L. Jon Wertheim,2011-01-25 In

Scorecasting University of Chicago behavioral economist Tobias Moskowitz teams up with veteran Sports Illustrated writer L Jon Wertheim to overturn some of the most cherished truisms of sports and reveal the hidden forces that shape how basketball baseball football and hockey games are played won and lost Drawing from Moskowitz s original research as well as studies from fellow economists such as bestselling author Richard Thaler the authors look at the influence home field advantage has on the outcomes of games in all sports and why it exists the surprising truth about the universally accepted axiom that defense wins championships the subtle biases that umpires exhibit in calling balls and strikes in key situations the unintended consequences of referees tendencies in every sport to swallow the whistle and more Among the insights that Scorecasting reveals Why Tiger Woods is prone to the same mistake in high pressure putting situations that you and I are Why professional teams routinely overvalue draft picks The myth of momentum or the hot hand in sports and why so many fans coaches and broadcasters fervently subscribe to it Why NFL coaches rarely go for a first down on fourth down situations even when their reluctance to do so reduces their chances of winning In an engaging narrative that takes us from the putting greens of Augusta to the grid iron of a small parochial high school in Arkansas Scorecasting will forever change how you view the game whatever your favorite sport might be
