A History of World Agriculture Marcel Mazoyer,Laurence Roudart,2006-06 Only once we understand the long history of human efforts to draw sustenance from the land can we grasp the nature of the crisis that faces humankind today as hundreds of millions of people are faced with famine or flight from the land From Neolithic times through the earliest civilizations of the ancient Near East in savannahs river valleys and the terraces created by the Incas in the Andean mountains an increasing range of agricultural techniques have developed in response to very different conditions These developments are recounted in this book with detailed attention to the ways in which plants animals soil climate and society have interacted Mazoyer and Roudart s *A History of World Agriculture* is a path breaking and panoramic work beginning with the emergence of agriculture after thousands of years in which human societies had depended on hunting and gathering showing how agricultural techniques developed in the different regions of the world and how this extraordinary wealth of knowledge tradition and natural variety is endangered today by global capitalism as it forces the unequal agrarian heritages of the world to conform to the norms of profit During the twentieth century mechanization motorization and specialization have brought to a halt the pattern of cultural and environmental responses that characterized the global history of agriculture until then Today a small number of corporations have the capacity to impose the farming methods on the planet that they find most profitable Mazoyer and Roudart propose an alternative global strategy that can safegaurd the economies of the poor countries reinvigorate the global economy and create a livable future for mankind
