THE RESPIRATORY SYSTEM
The respiratory system is responsible for breathing. It includes the lungs, the trachea, and the bronchi. Air enters the body through the nose and mouth, and is then inhaled into the lungs. The oxygen from the air enters the bloodstream, and the carbon dioxide is removed.

THE URINARY SYSTEM
The urinary system is responsible for filtering waste from the blood. It includes the kidneys, the ureters, and the bladder. The kidneys filter the blood, and the waste is then passed to the bladder, where it is stored until it is eliminated from the body.
