The Evolution and Significance of the Powered Bulk Carrier Roy Fenton,2023-04-03 The book is the first to detail the 170 year evolution of the powered bulk carriers which continue to have a major role in the world s trades and economies Their design and technological development is traced from the screw colliers of the 1850s which revolutionised the British coastal coal trade The same engineering principles were applied to produce ocean going steam and later motor tramps By the end of the 19th century the capabilities and economies of these black freighters had captured from the sailing ship much of the world s trade in bulk commodities In the second half of the 20th century the tramps in turn evolved into multi purpose dry bulk carriers These workhorses of the sea transport commodities including metallic ores grain coal timber and other minerals Quantities of up to 400 000 tons are carried in the largest specialised ore carriers In a parallel development applying the same technical principles produced smaller yet efficient steam and later motor coasters which came to dominate short sea shipping The book concludes with a discussion of how the economies of transportation provided by bulk carriers have had profound effects on industrialisation globalisation and the world s economy and discusses the environmental impact of these ships

Port and Harbour Engineering Adrian Jarvis,2016-12-05 During the 19th century the engineering of ports and harbours became a large and specialised branch of the profession This development began in ports in physically difficult locations and may be particularly identified with the growth of the Port of Liverpool Stimulated by the arrival of ever larger steamships and the heavy investment in port facilities that they demanded it spread around much of the world The opening papers give examples of what could be achieved in antiquity the following ones set out the advances in design and technology from 1700 to the start of this century and note some of the failures and recurrent problems They also illustrate the critical importance of political and economic factors in determining what the engineers achieved *The Cambridge Urban History of Britain* Peter Clark,David Michael Palliser,Martin J. Daunton,2000 The process of urbanisation and suburbanisation in Britain from the Victorian period to the twentieth century *New Directions in Mediterranean Maritime History* Gelina Harlaftis,Carmel Vassallo,2017-10-18 This study seeks to correct the underrepresentation of Mediterranean maritime history in academic publications in attempt to understand the multi cultural and multi ethnic environment in which maritime activity

takes place by compiling ten essays from maritime historians concerning Spain France Italy Malta Slovenia Greece Turkey and Israel The aim of the collection is to provide an insight into Mediterranean maritime history to those who could not previously access such information due to language barriers or difficulty securing non English publications some of the essays have translated into English specifically for this publication The majority of the essays concern the Early Modern period and the remainder concern the contemporary
