

The background of the book cover is a photograph of several ancient clay tablets. The tablets are light brown and yellowish, showing signs of age and wear. They are covered in cuneiform script, which is visible as dark, wedge-shaped impressions. The tablets are arranged in a slightly overlapping manner, with some showing more complete lines of text than others. The overall texture is rough and uneven.

of the Just War Rory Cox,2023-10-31 As two of the fundamental social forces that shape human life war posing the greatest existential threat to communities and justice being the principle that makes complex communal life possible in the first place the relationship between war and justice is crucial to understanding the development of Western civilization The central argument of this book is that theories of justified violence were not created ex nihilo as exercises in abstract ethical reasoning but rather emerged as a result of communities responding to the reality of war Communities developed concepts of normative warfare from a desire to legitimate and to control armed conflicts in which they consistently engaged Scholars have repeatedly overlooked the very simple fact that war predates just war doctrine and that early archaeological and textual evidence indicates that ancient societies were more inclined to glorify warfare than to condemn it It is the contention of this study therefore that the presumption of war is the essential characteristic and common denominator of the just war tradition Underscored by this compelling thesis the book will demonstrate that over the course of three millennia Western societies displayed a remarkable degree of affinity in their attitudes to the relationship between war and justice **Historia and**

Fabula Peter G. Bietenholz,1994-09-01 Historical thought whether it is expressed in writing or through works of art inevitably contains elements of fiction Thus in every phase of the development of historical thinking the question arises were these fictional elements recognized and if so how was their function perceived Was any effort made to distinguish between a documented fact and any assumptions or deductions related to it In examining the past was it deemed important to curb the free play of imagination or was it thought that any explanation no matter how fanciful and irrational was better than none This is the question that this book attempts to answer In doing so it examines a rich variety of texts and also some works of

art ranging from the Ancient Near East to the nineteenth century Warfare in the Ancient Near East to 1600 BC William J. Hamblin, 2006-09-27 The only book available that covers this subject Warfare in the Ancient Near East is a groundbreaking and fascinating study of ancient near Eastern military history from the Neolithic era to the middle Bronze Ages Drawing on an extensive range of textual artistic and archaeological data William J Hamblin synthesizes current knowledge and offers a detailed analysis of the military technology ideology and practices of Near Eastern warfare Paying particular attention to the earliest known examples of holy war ideology in Mesopotamia and Egypt Hamblin focuses on recruitment and training of the infantry the logistics and weaponry of warfare the shift from stone to metal weapons the role played by magic narratives of combat and artistic representations of battle the origins and development of the chariot as military transportation fortifications and siegecraft developments in naval warfare Beautifully illustrated including maps of the region this book is essential for experts and non specialists alike **Peoples of the Old Testament World** Alfred J. Hoerth, Gerald L. Mattingly, Edwin M. Yamauchi, 1998-08-01 Detailed historical and archaeological essays give insight into the many people groups who interacted with and influenced ancient Israel *Couched in Death* Elizabeth P. Baughan, 2013 In *Couched in Death* Elizabeth P Baughan offers the first comprehensive look at the earliest funeral couches in the ancient Mediterranean world These sixth and fifth century BCE klinai from Asia Minor were inspired by specialty luxury furnishings developed in Archaic Greece for reclining at elite symposia It was in Anatolia however in the dynastic cultures of Lydia and Phrygia and their neighbors that klinai first gained prominence not as banquet furniture but as burial receptacles For tombs wooden couches were replaced by more permanent media cut from bedrock carved from marble or limestone or even cast in bronze The rich archaeological findings of funerary klinai throughout Asia Minor raise intriguing questions about the social and symbolic meanings of this burial furniture Why did Anatolian elites want to bury their dead on replicas of Greek furniture Do the klinai found in Anatolian tombs represent Persian influence after the conquest of Anatolia as previous scholarship has suggested Bringing a diverse body of understudied and unpublished material together for the first time Baughan investigates the origins and cultural significance of kline burial and charts the stylistic development and distribution of funerary klinai throughout Anatolia She contends that funeral couch burials and banqueter representations in funerary art helped construct hybridized Anatolian Persian identities in Achaemenid Anatolia and she reassesses the origins of the custom of the reclining banquet itself a defining feature of ancient Mediterranean civilizations Baughan explores the relationships of Anatolian funeral couches with similar traditions in Etruria and Macedonia as well as their afterlife in the modern era and her study also includes a comprehensive survey of evidence for ancient klinai in general based on analysis of more than three hundred klinai representations on Greek vases as well as archaeological and textual sources The Rise and Decline of Ancient Civilizations Eka Avaliani, 2025-07-02 This book concerns the formation of ancient civilizations in the Near East and the central Mediterranean world It examines five civilization models Model of Egyptian Civilization Model of Mesopotamian

Civilization Model of Anatolian Civilization Model of Central Mediterranean Aegean Civilization Model of Eastern Mediterranean Culture Phoenicia Syria Palestine and the dynamics of their development Its theoretical part discusses the structure and analysis of civilizations stages of development of civilization the specifics of artistic thinking and touches on topics such as the phenomenon of cultural transformation in space and time The book is intended for readers who are interested in the development of ancient civilizations and the specifics of their artistic thinking In the process of systematizing and classifying these cultures civilizations we specifically highlight three parameters a geographical regional b ethnic and c the individual spiritual phenomenon of the culture In the course of our research it became evident that each model encompassed a specific historical geographical space and at various stages of development was tied to certain historical chronological periods

Essays on Ancient Anatolia in the Second Millennium B.C. Prince Mikasa no Miya Takahito (son of Taishō, Emperor of Japan), 1998

Egypt's Ramesside Pharaohs and the Persians Emmet Sweeney, 2021-10-01 The accepted chronology of ancient Egypt Persia and Babylonia is wrong to a dramatic degree with some major historical events mis dated by several centuries Matching events matching biographies and matching cultural artifacts show that many important people whom we are taught lived in different eras were in fact contemporaries Modern Egyptologists tell us that Seti I and Ramses II reigned 700 years before the rise of the Medes and Persians but Emmet Sweeney marshals archeological and linguistic evidence to show that Ramses II's dynasty was terminated by the Persian Conquest of Egypt 525 BC Seti II hailed by the Egyptians as a warrior and hero turns out to be one and the same as Inaros the Egyptian patriot who waged war against Xerxes and was eventually impaled on the orders of Artaxerxes I Egypt's Ramesside Pharaohs and the Persians represents the final volume in the reconstruction of Near Eastern antiquity bringing us from the start of the 6th century down to the early 3rd The history presented here will appear at the same time both familiar and startlingly new Readers will see how Ramses II normally believed to have reigned during the 14th 13th century BC was actually a contemporary of Cyrus the Great founder of the mighty Persian Empire They shall find how during the latter years of Ramses II Cyrus usurped the Median throne and under the Assyrian title of Tukulti apil esharra Tiglath Pileser conquered Lydia Babylon and all of Palestine as far as the borders of Egypt Names well known from biblical history such as Sargon and Nebuchadnezzar are shown to be identical to characters equally well known from classical history including Darius I Artaxerxes I and others Analyzing events like the Persian War against Greece and Alexander's conquest of Persia Emmet Sweeney goes far beyond studying the monuments of each land He has consulted ancient authors such as Manetho and Herodotus as well as the hieroglyphic documents of Egypt but in addition Sweeney discusses how the design of chariots for example went through a very definite evolution an evolution accurately depicted by the artists of the time Close study of such evidence may help to date the reign of a king with a high degree of accuracy Three dozen illustrations and a variety of timelines help bring the startling picture into sharp focus

The Sculpture and Sculptors of Yaz?!?kaya Robert L.

Alexander,1986 About 100 miles east of the modern Turkish capital Ankara the Hittites created their largest surviving sanctuary within the group of huge outcropping rocks known as Yazilikaya About 90 figures of deities from the sanctuary still survive after some 35 centuries This book is the first to present a stylistic study and establish a relative chronology for all the reliefs of Yazilikaya

The Storm-God in the Ancient Near East Alberto R. W. Green,2003-06-30 In this comprehensive study of a common deity found in the ancient Near East as well as many other cultures Green brings together evidence from the worlds of myth iconography and literature in an attempt to arrive at a new synthesis regarding the place of the Storm god He finds that the Storm god was the force primarily responsible for three major areas of human concern 1 religious power because he was the ever dominant environmental force upon which peoples depended for their very lives 2 centralized political power and 3 continuously evolving sociocultural processes which typically were projected through the Storm god s attendants Green traces these motifs through the Mesopotamian Anatolian Syrian and Levantine regions with regard to the latter he argues that Yahweh of the Bible can be identified as a storm god though certain unique characteristics came to be associated with him he was the Creator of all that is created and the self existing god who needs no other
