The Homunculus:

The German Classics of the 19th and 20th Century (Vol. 1-14) Various, 2023-12-12 The German Classics of the 19th and 20th Century Vol 1 14 is an expansive anthology that encompasses a diverse range of seminal works enriching the reader's insight into the evolution of German literature during this transformative period. Spanning prolific genres such as Romanticism, Realism, and Modernism, this collection features the nuanced prose and innovative poetry of notable figures including Goethe, Schiller, Kafka, and Brecht. The anthology's literary style emphasizes intricate language and thematic depth, reflecting the socio-political upheavals and cultural shifts characteristic of the times through which it spans. The compilation is the result of the collaborative efforts of various editors and scholars deeply invested in German literary heritage. Their collective expertise draws from comprehensive analyses of literary movements and historical contexts, providing a multidimensional lens through which readers can appreciate the intricacies of German thought, aesthetics, and societal reflection as they unfold within these texts. The anthology serves as both homage and critical examination of the narratives that resonate with the German-speaking world. This remarkable collection is highly recommended for both scholars and general readers seeking to immerse themselves in the rich tapestry of German literature. With its careful curation and accessible presentation, it invites exploration and appreciation of classic texts that not only shaped their era but continue to resonate with contemporary themes, making these volumes indispensable for anyone passionate about world literature.

Volatile Bodies Elizabeth Grosz, 1994-06-22 *Volatile Bodies* demonstrates that the sexually specific body is socially

constructed biology or nature is inherently social and has no pure or natural origin outside culture Being the raw material of social and cultural organization it is subject to the endless rewriting and inscription that constitute all sign systems Grosz demonstrates that the theories of among others Freud and Lacan theorize a male body She then turns to corporeal experiences unique to women menstruation pregnancy childbirth lactation menopause to lay the groundwork for new theories of sexed corporeality Back cover

Promethean Ambitions William R. Newman, 2005-10-01 In an age when the nature of reality is complicated daily by advances in bioengineering cloning and artificial intelligence it is easy to forget that the ever evolving boundary between nature and technology has long been a source of ethical and scientific concern modern anxieties about the possibility of artificial life and the dangers of tinkering with nature more generally were shared by opponents of alchemy long before genetic science delivered us a cloned sheep named Dolly In *Promethean Ambitions* William R Newman ambitiously uses alchemy to investigate the thinning boundary between the natural and the artificial Focusing primarily on the period between 1200 and 1700 Newman examines the labors of pioneering alchemists and the impassioned and often negative responses to their efforts By the thirteenth century Newman argues alchemy had become a benchmark for determining the abilities of both men and demons representing the epitome of creative power in the natural world Newman frames the art nature debate by contrasting the supposed transmutational power of alchemy with the merely representational abilities of the pictorial and plastic arts a dispute which found artists such as Leonardo da Vinci and Bernard Palissy attacking alchemy as an irreligious fraud The later assertion by the Paracelsian school that one could make an artificial human being the homunculus led to further disparagement of alchemy but as Newman shows the immense power over nature promised by the field contributed directly to the technological apologetics of Francis Bacon and his followers By the mid seventeenth century the famous father of modern chemistry Robert Boyle was employing the arguments of medieval alchemists to support the identity of naturally occurring substances with those manufactured by chymical means In using history to highlight the art nature debate Newman here shows that alchemy was not an unformed and capricious precursor to chemistry it was an art founded on coherent philosophical and empirical principles with vocal supporters and even louder critics that attracted individuals of first rate intellect The historical relationship that Newman charts between human creation and nature has innumerable implications today and he ably links contemporary issues to alchemical debates on the natural versus the artificial

The Heredity Hoax Richard M. Lerner, Gary Greenberg, 2025-01-30 This innovative and thought provoking book integrates both new authored material and reprints of existing literature that together provide a compelling narrative that reveals the fatally flawed science associated with genetic reductionist accounts of human behavior and development Through an interdisciplinary lens it illuminates the dynamic nature of human development empowering readers to question established notions and embrace the complexity of our potential Across the book the work of top tier scientists from developmental comparative educational and biological science illuminates theory and research converging on

the conclusion that the multiple egregiously flawed work of genetic reductionists should be expunged from research pertinent to human development The book challenges the prevailing reductionist narratives and their application to social policies programs and uses in media Theoretically based and empirically rigorous this multidisciplinary approach to human development will shine a light on the inequities in individuals or groups that suggest that specific genes do not enable them to succeed in life The Heredity Hoax invites graduate programs and advanced undergraduate courses on human development human potential epigenetics and more to delve into the intricate interplay between genes environment and personal growth This will also serve as an unimpeachable source of evidence for researchers educators and social policymakers *The Body Within* Renée van de Vall, Robert Zwijnenberg, 2009 The central question of this interdisciplinary volume is whether present day medical visualisation techniques like ultrasound endoscopy CT MRI and PET scans mark a significant shift in the historical and cultural construction and experience of bodily interiority *Eta Carinae and the Supernova Impostors* Kris Davidson, Roberta M. Humphreys, 2012-03-15 In 1965 Fritz Zwicky proposed a class of supernovae that he called Type V described as excessively faint at maximum There were only two members SN1961v and Eta Carinae We now know that Eta Carinae was not a true supernova but if it were observed today in a distant galaxy we would call it a supernova impostor 170 years ago it experienced a great eruption lasting 20 years expelling 10 solar masses or more and survived Eta Carinae is now acknowledged as the most massive most luminous star in our region of the Galaxy and it may be our only example of a very massive star in a pre supernova state In this book the editors and contributing authors review its remarkable history physical state of the star and its ejecta and its continuing instability Chapters also include its relation to other massive unstable stars the massive star progenitors of supernovae and the first stars in the Universe *Anna Zieglerin and the Lion's Blood* Tara Nummedal, 2019-04-19 In 1573 the alchemist Anna Zieglerin gave her patron the Duke of Braunschweig Wolfenb ttel the recipe for an extraordinary substance she called the lion s blood She claimed that this golden oil could stimulate the growth of plants create gemstones transform lead into the coveted philosophers stone and would serve a critical role in preparing for the Last Days Boldly envisioning herself as a Protestant Virgin Mary Anna proposed that the lion s blood paired with her own body could even generate life repopulating and redeeming the corrupt world in its final moments In *Anna Zieglerin and the Lion s Blood* Tara Nummedal reconstructs the extraordinary career and historical afterlife of alchemist courtier and prophet Anna Zieglerin She situates Anna s story within the wider frameworks of Reformation Germany s religious political and military battles the rising influence of alchemy the role of apocalyptic eschatology and the position of women within these contexts Together with her husband the jester Heinrich Schombach and their companion and fellow alchemist Philipp Sommering Anna promised her patrons at the court of Wolfenb ttel spiritual salvation and material profit But her compelling vision brought with it another darker possibility rather than granting her patrons wealth or redemption Anna s alchemical gifts might instead lead to war disgrace and destruction By 1575 three years after Anna s arrival at court her enemies had

succeeded in turning her from holy alchemist into poisoner and sorceress culminating in Anna's arrest torture and public execution In her own life Anna was a master of self fashioning in the centuries since her death her story has been continually refashioned making her a fitting emblem for each new age Interweaving the history of science gender religion and politics Nummedal recounts how one resourceful woman's alchemical schemes touched some of the most consequential matters in Reformation Germany

The Chosen Ricardo Pinto,2010-09-30 Carnelian is of the Masters cruel beings who rule their kingdom from an earthly paradise hidden in a crater that is the navel of the world Soon after he is born Carnelian s father takes him across the sea to an island in the colourless north Far from the Crater s rituals and pomp their household is allowed to become a family to the boy and the world of the Masters fades to alluring fairy tale In deepest winter years later a ship comes riding before the gales three Masters her only cargo As these giants remove their masks of gold Carnelian is awed by the light that seems to radiate from their skin In formal conclave they ask Carnelian s father to end his exile and return with them to oversee the election of a new God Emporer His father s agreement feeds Carnelian s longing for the world beyond the sea but as the days pass Carnelian watches with growing horror as the ship s needs devour his home The Masters are indifferent imperious concerned only with their blood politics their majesty As his father becomes strangely powerless Carnelian strives to save his people but when the ship turns her pro towards the stormy sea he knows that he is abandoning them to famine among the ruins of his former home This is the beginning of Carnelian s journey The terror of the tempest yields to the weary grind along the road the climb up the forbidding cliff wall to the Guarded Land and then the frantic rush into the deep south Carnelian s education which began with the starving of his people proceeds with bitter lessons in bloodshed intrigue and betrayal When they finally reach the Canyon of the Three Gates which leads into the Crater Carnelian finds both love and treachery but it is here within the Heaven Wall that he will set in motion the concluding events in a story already ten thousand years old

The Third God Ricardo Pinto,2010-07-31 Amidst the massacre he himself helped bring about Carnelian is now desperate to find a way to avoid more carnage But it is too late for that His spurned lover Osidian

seeking revenge and determined to win back his stolen throne has deliberately stoked the wrath of the Masters who rule the world from its centre Osrakum Osidian's actions have stirred into motion political events in Osrakum which threaten to overturn the millennial repressive order of the Commonwealth Carnelian learns that he and those he loves are now inextricably enmeshed in the terrible power game of the Masters If he and they are to survive he has no choice but to play that game himself though he does not know how He has no choice but to stand with Osidian in defiance of the invincible power of the Masters No choice but to take his loved ones deeper into peril In his struggle he will find unlooked for allies and guidance with dreadful motives of its own And ultimately he will unleash apocalyptic forces which will bring him and his world to a reckoning none could have foreseen though it has been simmering for four thousand years *Performing Science and the Virtual* Sue-Ellen Case, 2007-01-24 This impressive new book from Sue Ellen Case looks at how science has been performed throughout history tracing a line from nineteenth century alchemy to the twenty first century virtual avatar In this bold and wide ranging book that is written using a crossbreed of styles we encounter a glance of Edison in his laboratory enter the soundscape of John Cage and raid tombs with Lara Croft Case looks at the intersection of science and performance the academic treatment of classical plays and internet like bytes on contemporary issues and experiments where the array of performances include electronic music Sun Ra the jazz musician the recursive play of tape from Samuel Beckett to Pauline Oliveros *Performing Science and the Virtual* reviews how well these performances borrow from spiritualist notions of transcendence as well as the social codes of race gender and economic exchange This book will appeal to academics and graduates studying theatre and performance studies cultural studies and philosophy **The Joy of Being Eaten** Lawrence Vandervert, 2014-11-19 *The Joy of Being Eaten* offers new themes of science and science fiction that will be wholly new to people around the world While people all over the world have similar interests and tastes in science and science fiction the different themes running through *The Joy of Being Eaten* will have slightly different meanings and levels of appeal in different historical and cultural contexts For this reason the title of this book can be changed by the reader to emphasize the overall theme they feel is best for their reading experience *Encyclopedia of Early Modern Philosophy and the Sciences* Dana Jalobeanu, Charles T. Wolfe, 2022-08-27 This Encyclopedia offers a fresh integrated and creative perspective on the formation and foundations of philosophy and science in European modernity Combining careful contextual reconstruction with arguments from traditional philosophy the book examines methodological dimensions breaks down traditional oppositions such as rationalism vs empiricism calls attention to gender issues to insiders and outsiders minor figures in philosophy and underground movements among many other topics In addition and in line with important recent transformations in the fields of history of science and early modern philosophy the volume recognizes the specificity and significance of early modern science and discusses important developments including issues of historiography such as historical epistemology the interplay between the material culture and modes of knowledge expert knowledge and craft

knowledge This book stands at the crossroads of different disciplines and combines their approaches particularly the history of science the history of philosophy contemporary philosophy of science and intellectual and cultural history It brings together over 100 philosophers historians of science historians of mathematics and medicine offering a comprehensive view of early modern philosophy and the sciences It combines and discusses recent results from two very active fields early modern philosophy and the history of early modern science Editorial Board EDITORS IN CHIEF Dana Jalobeanu University of Bucharest Romania Charles T Wolfe Ghent University Belgium ASSOCIATE EDITORS Delphine Bellis University Nijmegen The Netherlands Zvi Biener University of Cincinnati OH USA Angus Gowland University College London UK Ruth Hagengruber University of Paderborn Germany Hiro Hirai Radboud University Nijmegen The Netherlands Martin Lenz University of Groningen The Netherlands Gideon Manning CalTech Pasadena CA USA Silvia Manzo University of La Plata Argentina Enrico Pasini University of Turin Italy Cesare Pastorino TU Berlin Germany Lucian Petrescu Universit Libre de Bruxelles Belgium Justin E H Smith University de Paris Diderot France Marius Stan Boston College Chestnut Hill MA USA Koen Vermeir CNRS SPHERE Universit de Paris France Kirsten Walsh University of Calgary Alberta Canada

The Legacy of Heroes: A Fantasy Role-Playing Game; Game Master's Guide Vincent Venturella, Phantom Pain Richard A. Sherman, 1996-11-30 Phantom pain is an intriguing mystery that has captured the imagination of health care providers and the public alike How is it possible to feel pain in a limb or some other body part that has been surgically removed Phantom pain develops among people who have lost a limb or a breast or have had internal organs removed It also occurs in people with totally transected spinal cords Unfortunately phantom pain is a medical night mare Many of the people reporting phantom pain make disproportionately heavy use of the medical system because their severe pains are usually not treated successfully The effect on quality of life can be devastating Phantom pain has been reported at least since 1545 Weir Mitchell as related by Nathanson 1988 and or experienced by such diverse people as Admiral Lord Nelson and Ambroise Pare Melzack Davis 1993 The folklore surrounding phantom pain is fascinating and mirrors the concepts about how our bodies work that are in vogue at any particular time Most of the stories relate to phantom limbs and date from the mid 1800s The typical story goes like this A man who had his leg amputated complained about terrible crawling twitching feelings in his leg His friends found out where the leg was buried dug it up and found maggots eating it They burned it and the pain stopped Another man complained of a swollen feeling with frequent stinging or biting pains *The Search for Certainty* W.W. Spradlin, P.B. Porterfield, 2012-12-06 Who are we What are we How do we fit into the world Or into the universe These and other questions pertaining to ourselves and our environment are as compelling to us today as they were to our primitive ancestors Throughout our history we have developed paradigms of thought that have attempted to answer these questions each conceptual framework being particularly relevant to its age We are in the twentieth century witnessing a complete reorganization of our thinking We are now with the aid of technology able to bring together both ancient and new patterns

of thought and to observe the emergence of a kaleidoscopic world view that is uniting the once dissonant theories of philosophy religion and science This book sketches an historical picture of three world views that have shaped our ideas about ourselves These conceptual formats that have so influenced us are not mutually exclusive and are present in all of us simultaneously although to varying degrees depending upon our individual biases
