**Rachel Carson** Linda Lear,1998-09-15 A biography of the environmentalist chronicles her development from biologist and nature writer to muckraker and champion of ecological causes      A Natural History of Nature Writing Frank

Stewart,2012-07-11 A Natural History of Nature Writing is a penetrating overview of the origins and development of a uniquely American literature Essayist and poet Frank Stewart describes in rich and compelling prose the lives and works of the most prominent American nature writers of the 19th and 20th centuries including Henry D Thoreau the father of American nature writing John Burroughs a schoolteacher and failed businessman who found his calling as a writer and elevated the nature essay to a loved and respected literary form John Muir founder of Sierra Club who celebrated the wilderness of the Far West as few before him had Aldo Leopold a Forest Service employee and scholar who extended our moral responsibility to include all animals and plants Rachel Carson a scientist who raised the consciousness of the nation by revealing the catastrophic effects of human intervention on the Earth's living systems Edward Abbey an outspoken activist who charted the boundaries of ecological responsibility and pushed these boundaries to political extremes Stewart highlights the controversies ignited by the powerful and eloquent prose of these and other writers with their expansive and often strongly political points of view Combining a deeply felt sense of wonder at the beauty surrounding us with a rare ability to capture and explain the meaning of that beauty nature writers have had a profound effect on American culture and politics A Natural History of Nature Writing is an insightful examination of an important body of American literature      **American**

**Sea Literature: Seascapes, Beach Narratives, and Underwater Explorations** S. Yamashiro,2014-07-31 Implementing a never before seen approach to sea literature American Sea Literature Seascapes Beach Narratives and Underwater Explorations explores the role of American maritime activities and their cultural representations in literature Differentiating between the terrestrial and oceanic as concepts Shin Yamashiro divides sea literature into three categories literature on the sea by the sea and beneath the sea Discussing both canonical works and new books on scuba diving deep sea explorations and surfing this fascinating study recognizes sea literature's unique influence on American history      Saving the Best of Texas Richard C. Bartlett,2010-06-28 With a deep belief in partnerships for conservation Richard C Bartlett Chairman of The Nature Conservancy of Texas explores the past and ongoing efforts of individuals and groups private public federal and state to save the best of Texas natural landscapes and the myriad species of plants and animals they support Drawing on some 100 000 miles of backroads travel Bartlett vividly describes many of the areas that through a commitment to partnerships have already been preserved in their natural state Fine color photographs by Leroy Williamson provide a striking visual counterpoint to the text These words and images give well deserved credit to the people responsible for saving some of the best of Texas They also highlight the need to continue to join together to preserve our natural environment so that the beauty

and diversity we enjoy today will be available for future generations It is the author s hope that Saving the Best of Texas will be a catalyst in that process      **Books and Reading in the Lives of Notable Americans** John McCrossan,2000-03-30 Books and reading have contributed to the success of generations of Americans many of whom have had distinguished careers and have left their mark on history While the accomplishments of these notable Americans are well known their adventures with books and reading are less familiar Some have struggled to gain access to books while others were fortunate enough to be exposed to literature at an early age This reference surveys the role books and reading have played in the lives of notable Americans from colonial times to the present Included are alphabetically arranged entries for 50 notable Americans from a range of historical periods professions and racial and ethnic backgrounds Many are featured prominently in school and college texts while others are a significant part of popular culture Such diverse figures as Benjamin Franklin Helen Keller Willa Cather Kareem Abdul Jabbar Mark Twain Oprah Winfrey and Ronald Reagan are covered Each entry includes a discussion of books and reading in the person s life a chronology and a brief bibliography      **Be Very Afraid** Robert Wuthnow,2010-04-07 Robert Wuthnow has been praised as one of the country s best social scientists by columnist David Brooks who hails his writing as tremendously valuable The New York Times calls him temperate balanced compassionate adding one can t but admire Mr Wuthnow s views A leading authority on religion he now addresses one of the most profound subjects the end of the world In Be Very Afraid Wuthnow examines the human response to existential threats once a matter for theology but now looming before us in multiple forms Nuclear weapons pandemics global warming each threatens to destroy the planet or at least to annihilate our species Freud he notes famously taught that the standard psychological response to an overwhelming danger is denial In fact Wuthnow writes the opposite is true we seek ways of positively meeting the threat of doing something anything even if it s wasteful and time consuming The atomic era that began with the bombing of Hiroshima sparked a flurry of activity ranging from duck and cover drills basement bomb shelters and marches for a nuclear freeze All were arguably ineffectual yet each sprang from an innate desire to take action It would be one thing if our responses were merely pointless Wuthnow observes but they can actually be harmful Both the public and policymakers tend to model reactions to grave threats on how we met previous ones The response to the terrorist attacks of 9 11 for example echoed the Cold War citizens went out to buy duct tape mimicking 1950s era civil defense measures and the administration launched two costly conflicts overseas Offering insight into our responses to everything from An Inconvenient Truth to the bird and swine flu epidemics Robert Wuthnow provides a profound new understanding of the human reaction to existential vulnerability      **A to Z of Women in Science and Math** Lisa Yount,2007 From ancient times to the present day scientifically inclined women in many cultures have had to battle against the traditional belief that men are more cognitively adept than women At times throughout history women were persecuted for their attempts to break down traditional gender barriers Today women scientists and mathematicians must continue to defend the quality of their work and demand the

respect they deserve in the mathematical and scientific communities A to Z of Women in Science and Math Revised Edition profiles 195 women who fought against these stereotypes throughout history and all over the world to forge new discoveries and theories that would eventually change the way we view science This thoroughly revised book updates the story of each individual to the present day and features 38 new profiles Among the profiles included are those of chemists astronomers geologists environmental scientists and a range of other professions and careers In addition new photographs have been added and the bibliography has been updated Subject indexes allow the reader to search by such professions as microbiology and paleontology Additional subject indexes organize individuals by country of birth country of major scientific activity and year of birth **A to Z of American Women Writers** Carol Kort,2014-05-14 Presents a biographical dictionary profiling important women authors including birth and death dates accomplishments and bibliography of each author s work

**Interconnections Between Human and Ecosystem Health** R.T. Di Giulio,E. Monosson,2012-12-06 Ecotoxicology is a relatively new scientific discipline Indeed it might be argued that it is only during the last 5 10 years that it has come to merit being regarded as a true science rather than a collection of procedures for protecting the environment through management and monitoring of pollutant discharges into the environment The term ecotoxicology was first coined in the late sixties by Prof Truhaut a toxicologist who had the vision to recognize the importance of investigating the fate and effects of chemicals in ecosystems At that time ecotoxicology was considered a sub discipline of medical toxicology Subsequently several attempts have been made to portray ecotoxicology in a more realistic light Notably both Moriarty 1988 and F Ramade 1987 emphasized in their books the broad basis of ecotoxicology encompassing chemical and radiation effects on all components of ecosystems In doing so they and others have shifted concern from direct chemical toxicity to humans to the far more subtle effects that pollutant chemicals exert on natural biota Such effects potentially threaten the existence of all life on earth Although I have identified the sixties as the era when ecotoxicology was first conceived as a coherent subject area it is important to acknowledge that studies that would now be regarded as ecotoxicological are much older **The Faith of Scientists** Nancy K. Frankenberry,2008-08-11 The Faith of Scientists is an anthology of writings by twenty one legendary scientists from the dawn of the Scientific Revolution to the frontiers of science today about their faith their views about God and the place religion holds or doesn t in their lives in light of their commitment to science This is the first book to bring together so many world renowned figures of Western science and present them in their own words offering an intimate window into their private and public reflections on science and faith Leading religion scholar Nancy Frankenberry draws from diaries personal letters speeches essays and interviews and reveals that the faith of scientists can take many different forms whether religious or secular supernatural or naturalistic conventional or unorthodox These eloquent writings reflect a spectrum of views from diverse areas of scientific inquiry Represented here are some of the most influential and colossal personalities in the history of science from the founders of science such as Galileo Johannes Kepler Francis Bacon Isaac

Newton Charles Darwin and Albert Einstein to modern day scientists like Carl Sagan Stephen Jay Gould Jane Goodall Freeman Dyson Stephen Hawking Edward O Wilson and Ursula Goodenough Frankenberg provides a general introduction as well as concise introductions to each chapter that place these writings in context and suggest further reading from the latest scholarship As surprising as it is illuminating and inspiring The Faith of Scientists is indispensable for students scholars and anyone seeking to immerse themselves in important questions about God the universe and science Forest and Garden Melanie Louise Simo, 2003 How wild and managed or artificially arranged environments coexist has long been a matter of intense debate among foresters and landscape professionals Women of Vision Eileen Gavin, Aphrodite Clamar, Mary Anne Siderits, 2007-03-20 From the reviews Women of Vision blends biographical narrative with psychological perspectives on human development resulting in a moving and passionate book that is suitable for both academic and nonacademic readers It is a useful tool for teaching purposes or for simple enjoyable and informative reading Psychology of Women Quarterly a fascinating look of preservation and perceptiveness that is differentiated from its predecessors in its range of disciplines and emphasis This new life course approach to understanding female leaders gives valuable insight into the lives of these imminent women furnishing insights into how the social economic political milieu and the attitudes and values of the time played a significant role in the lives of these women but also in all our lives Women of Vision will serve as a springboard for exploration of how the psychologies of individual human lives affect their life course and as a galvanizing step for many more future women of vision and leadership The accounts in the book should be of substantial significance for readers interested in gender issues However the book will appeal to an even wider audience Persons hoping to move in new directions in their own lives e g women looking wistfully at new academic and occupational paths after years in stereotypic niches can surely also find inspiration in the various accounts SirReadALot org We all know of women of great vision women whose efforts and accomplishments have had a major impact on the arts politics women s rights sports or science But often we may not understand how they became such powerful agents of change and what sorts of questions we should ask of their pasts to understand how the trajectories of their lives were formed In this extraordinary textbook leading experts cast new light on the role of circumstance accomplishments and personality in the development of various twentieth century women of vision This is a brand new life course approach to understanding female leaders and gives valuable insight into the lives of such eminent women as Rachel Carson Evelyn Gentry Hooker Georgia O Keeffe Eleanor Roosevelt Babe Didrikson Zaharias Ella Fitzgerald Alice Paul Lucille Ball and many others Study questions and exercises at the end of each chapter further enhance the text Women of Vision will serve as the springboard for exploration of how the psychologies of individual human lives affect their life course and as a galvanizing step for many more future women of vision and leadership One Art Elizabeth Bishop, 1995-09-30 A collection of over five hundred letters written by twentieth century American poet Elizabeth Bishop over the course of fifty years from 1928 to 1979 in which she shares the details of her life and art **A More Perfect**

**Union** Linda Sargent Wood, 2012-10-18 This book uncovers a holistic sensibility in post World War II American culture that challenged Cold War logic and fed some of the century's most powerful social movements This impulse is illustrated by focusing on Rachel Carson Buckminster Fuller Martin Luther King Jr Abraham Maslow Pierre Teilhard de Chardin and the Esalen Institute

*Seeing Nature Through Gender* Virginia Scharff, 2003 Environmental history has traditionally told the story of Man and Nature Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender Seeing Nature through Gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women's actions desires and choices have shaped the world and seeing men as gendered actors as well In thirteen essays that show how gendered ideas have shaped the ways in which people have represented experienced and consumed their world Virginia Scharff and her coauthors explore interactions between gender and environment in history Ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical representations of humans and nature on questions about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly often with dire consequences for other people and organisms Here are considerations of the ways we study sexuality among birds of William Byrd's masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has reshaped firefighters own gendered identities Some are playful as in a piece on the evolution of snow bunnies to shred betties Others are dead serious as in a chilling portrait of how endocrine disrupters are reinventing humans animals and water systems from the cellular level out Aiding and adding significantly to the enterprise of environmental history Seeing Nature through Gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we've engraved on ourselves and on the planet
