Religion & the Order of Nature Seyyed Hossein Nasr, 1996 The current ecological crisis is a matter of urgent global concern with solutions being sought on many fronts In this book Seyyed Hossein Nasr argues that the devastation of our world has been exacerbated if not actually caused by the reductionist view of nature that has been advanced by modern secular science What is needed he believes is the recovery of the truth to which the great enduring religions all attest namely that nature is sacred Nasr traces the historical process through which Western civilization moved away from the idea of nature as sacred and embraced a world view which sees humans as alienated from nature and nature itself as a machine to be dominated and manipulated by humans His goal is to negate the totalitarian claims of modern science and to re-open the way to the religious view of the order of nature developed over centuries in the cosmologies and sacred sciences of the great traditions Each tradition Nasr shows has a wealth of knowledge and experience concerning the order of nature The resuscitation of this knowledge he argues would allow religions all over the globe to enrich each other and cooperate to heal the wounds inflicted upon the Earth

The Nature of Home Lisa Knopp, 2004-05-01 For Lisa Knopp homesickness is a literal sickness During a lengthy sojourn away from the Nebraska prairie she fell ill and only when she decided to return home did she recover Homesickness is the triggering event for this collection of essays concerned with nothing less than what it means to feel at home Knopp writes masterfully about ecology place and the values and beliefs that sustain the individual within an impersonal world She is passionate about her subject whether it be an endangered beetle in the salt marshes near Lincoln Nebraska a forgotten Nebraska inventor a museum muralist a paleontologist or Arbor Day as the misguided attempt of Eastern settlers to correct a perceived deficiency in the Great Plains landscape Here is a writer who has read widely and judiciously and for whom everything resonates within the intricately structured definition of home

The Future of the Body Michael Murphy, 1993-04-21 In the oral and written histories of every culture there are countless records of men and women who have displayed extraordinary physical mental and spiritual capacities In modern times those records have been supplemented by scientific studies of exceptional functioning Are the limits of human growth fixed Are extraordinary abilities latent within everyone Is there evidence that humanity has unrealized capacities for self transcendence Are there specific practices through which ordinary people can develop these abilities Michael Murphy has studied these questions for over thirty years In *The Future of the Body* he presents evidence for metanormal perception

cognition movement vitality and spiritual development from more than 3 000 sources Surveying ancient and modern records in medical science sports anthropology the arts psychical research comparative religious studies and dozens of other disciplines Murphy has created an encyclopedia of exceptional functioning of body mind and spirit He paints a broad and convincing picture of the possibilities of further evolutionary development of human attributes By studying metanormal abilities under a wide range of conditions Murphy suggests that we can identify those activities that typically evoke these capacities and assemble them into a coherent program of transformative practice A few of Murphy s central observations and proposal include The observation that cultural conditioning powerfully shapes or extinguishes metanormal capacities The proposition that we cannot comprehend our potentials for extraordinary life without an empirical approach that involves many fields of inquiry and different kinds of knowing The notion that a widespread realization of extraordinary capacities would constitute an evolutionary transcendence analogous to the rise of humankind from its primal ancestry The proposal that all or most instances of significant human development are produced by a limited number of identifiable activities such as disciplined self observation visualization of desired capacities and caring for others The idea that a balanced development of our various capacities is possible through integrated practices In *The Future Of The Body* Murphy states that such practices can carry forward Earth s evolutionary adventure and lead humanity to the next step in its development
