The Human Imperative Alexander Alland,1972 *The Human Imperative* Alexander Alland (jr.),1972 *The Human Imperative* ,1974 *The Human Imperative* Mary L. Baetz,1985 *Do Big Things* Craig Ross,Angela V. Paccione,Victoria L. Roberts,2017-08-16 An inspiring practical and progress oriented blueprint for energetic achievement Amid constant swirl uncertainty and complexity is your team capable of doing big things Too often people are pulled together labeled a team given a directive and expected to deliver results quickly Soon however due to lack of focus increasing pressures and competing priorities the team suffers from DSD distracted hopelessly stressed and disconnected from one another Predictably the team flatlines and the energy needed to succeed is lost Based upon research of what successful teams do to overcome severe odds *Do Big Things* presents an intuitive seven step process that equips teams with how to quickly and consistently operate in a manner necessary for success Team members develop the self awareness and ability to Bring their best to every situation Bring out the best in others in every interaction Partner across the business to deliver common objectives Filled with practical tools and engaging stories of teams today *Do Big Things* equips leaders with the how to quickly identify and activate the behaviors needed to achieve more than you or your team ever thought possible Idea and information exchanges interlock the hand head and heart of each team member to get everyone moving toward a common goal Increasingly individually and collectively the team becomes emotionally stronger and more productive as they do their work *Do Big Things* provides your team with the common language necessary to be authentic empathetic and transparent so that potential barriers to success come to light faster This empowers the team to be more accountable with an enterprise mindset because they can have the profound discussions needed to adapt quicker to unforeseen challenges and demonstrate an innovative reflex By applying the concepts in this book the team s daily interactions are transformed focus is sustained and energetic progress toward your goals is triggered Every member of your team wants to succeed *Do Big Things* provides a straightforward method to bring greater meaning to the work everyone does so the team delivers extraordinary performance together You know what your team can achieve now use the proven method to enable them to do it *The Human Exploration of Space* National Research Council,Division on Engineering and Physical Sciences,Space Studies Board,Commission on Physical Sciences, Mathematics, and Applications,Committee on Human Exploration,1998-01-30 During 1988 the National Research Council s Space Science Board reorganized itself to more effectively address NASA s advisory needs The Board s scope was broadened it was renamed the Space Studies Board and among other new initiatives the Committee on Human Exploration was created The new committee was intended to focus on the scientific aspects of human exploration programs rather than engineering issues Their research led to three reports *Scientific Prerequisites for the Human Exploration of Space* published in 1993 *Scientific Opportunities in the Human Exploration of Space* published in 1994 and *Science Management in the Human Exploration of Space* published in 1997 These three reports are collected and

reprinted in this volume in their entirety as originally published *The Human Imperative* Paul Nemitz, 2023-11-25 This important new book is about power in the age of Artificial Intelligence It looks at what the new technical powers that have accrued over the last decades mean for the freedom of people and for our democracies AI must not be considered in isolation but rather in a very specific context the concentration of economic and digital technological power that we see today Analysis of the effects of AI requires that we take a holistic view of the business models of digital technologies and of the power they exercise Technology economic power and political power are entering into ever closer symbiosis Digital technologies and their corporate masters now know more than people know about themselves or governments know about the world These technologies accumulate more and more decision making powers Taken together this leads to a massive asymmetry of knowledge and power in the relationship between man and machine The classical models of action and decision making in democratic societies are being gradually undermined by such developments In a new way the question of the control of technical power arises This is the first book to look in detail in a holistic way at the challenges of digital power and Artificial Intelligence to Democracy and Liberties and to set out what can and needs to be done about these challenges in terms of engineering ethics and democratic action of policy making and legislation Key audiences are scholars in media sciences political sciences computer sciences and engineering law and philosophy as well as policy makers corporate and civil society leaders and the educated public Adapted and updated from the original German language book *Prinzip Mensch Macht Freiheit und Demokratie im Zeitalter der Künstlichen Intelligenz* published 2020 by Verlag J H W Dietz Nachf GmbH

Freedom of the Human Person Zbigniew Josef Waleszczuk, 2017-01-16 Freedom is the key issue for both Karol Wojtyła and Immanuel Kant that connects the Polish with the German philosopher This analysis aims to show the importance of Kant's ethics in the work of Karol Wojtyła Kant's paradigm shift in the anthropological thought was revolutionary The categorical imperative obliges each person to act morally and thus elevates them It is the foundation of human dignity not only for Kant but also for Wojtyła Who is man Is man free Or is materialistic man determined and arrested in immanence What should man do Man is gifted with freedom He is a person because he has the capacity to act Wojtyła and Kant put special emphasis on a person's power of self-determination that reveals itself through the experience as a freely acting person The realisation of the personal norm the categorical imperative was defined by both thinkers as a fulfilment of freedom Freedom shall be fulfilled in the responsible act which reveals the person's power of love

Spaceflight in the Shuttle Era and Beyond Valerie Neal,2017-06-27 An exploration of the changing conceptions of the Space Shuttle program and a call for a new vision of spaceflight The thirty years of Space Shuttle flights saw contrary changes in American visions of space Valerie Neal who has spent much of her career examining the Space Shuttle program uses this iconic vehicle to question over four decades worth of thinking about and struggling with the meaning of human spaceflight She examines the ideas images and icons that emerged as NASA Congress journalists and others sought to communicate rationales for or critiques of the Space Shuttle missions At times concurrently the Space Shuttle was billed as delivery truck and orbiting science lab near Earth station and space explorer costly disaster and pinnacle of engineering success The book s multidisciplinary approach reveals these competing depictions to examine the meaning of the spaceflight enterprise Given the end of the Space Shuttle flights in 2011 Neal makes an appeal to reframe spaceflight once again to propel humanity forward Neal may be the one person who knows the space shuttle program better than the astronauts who flew this iconic vehicle Her book casts new light on the program exploring its cultural significance through a thoughtful analysis As one who lived this history I gained much from her broader perspective and deep insights Kathryn D Sullivan retired NASA astronaut and former Administrator of the National Oceanic and Atmospheric Administration A much needed look at how to create a cultural narrative for human spaceflight that resonates with millennials rather than the Apollo generation Quite valuable Marcia Smith Editor SpacePolicyOnline com

A New Approach to Kant Zehou Li,2018-05-21 Originally written during the Cultural Revolution this book introduces and interprets Kant s critical philosophy through the lens of its author Li Zehou s own philosophical approach anthropological historical ontology Li argues that the process of human development begins with and is shaped by the practical material activities associated with making and using tools in primitive societies Over millions of years these ever evolving practices accumulate and become sedimented into archetypical forms that shape history social relationships and human psychology Li s views draw upon Marx s theory of practice and as those familiar with his work will recognize his reinterpretation of Confucian thought with its emphasis on material life and worldly existence Beginning with the assumption that the question at heart of Kant s philosophy is What is the human being Li offers a highly original answer by arguing that the root of Kant s transcendental knowledge universal forms moral autonomy and aesthetics can be found in the practical and social activities associated with tool making Li offers a new reading not only of Kant but of modern European philosophy including Hegel and Marx that forces us to rethink our understanding of the relation between individuals and communities and challenges us to ask ourselves how we can best achieve both harmony and freedom in our shared human future
