Machiavelli Mark Hulliung, 2017-07-05 Machiavelli has been viewed as the forerunner of the humanists of our day liberals and socialists who have discovered that moral ends sometimes require immoral means Against this interpretation Mark Hulliung argues that Machiavelli's humanism was rooted in classical notions of grandeur and greatness and that his prime reason for admiring the ancient Roman republic was that it conquered the world In short Machiavelli was at his most Machiavellian precisely when he voiced his civic humanism Hulliung argues that Machiavelli's embrace of fraud and violence cannot be justified by patriotism or a professed concern with the common good He indicts Machiavelli's use and abuse of history in the service of his cynical agenda the quest for power Hulliung sees Machiavelli as a republican imperialist embracing the heroic pagan virtues and consciously subverting the humanistic tradition of Cicero and the religious morality of Christianity with an intentionally skewed interpretation of republican Rome By inverting the Stoical and Christian elements of the classics Machiavelli made the humanistic tradition give birth to Machiavellism its terrible child Hulliung's thesis is convincing and his book is a valuable contribution to the debate on Machiavellian thought Studies in the History

of Educational Theory Vol 1 (RLE Edu H) G Bantock, 2012-05-16 This book examines key theorists in depth in order to give some insight into cultural change as reflected in their curricular recommendations and in the interplay they reveal between the two fundamental educational concepts of artifice and nature The essays on the various theorists Erasmus Vives Castiglione Elyot Montaigne Bacon Comenius Locke and Rousseau can be read separately but the book also forms an integrated whole with a continuity of themes explored from theorist to theorist The book not only charts a historical development but also reveals much that may deepen our understanding of contemporary educational dilemmas Classics

in the Modern World Lorna Hardwick, Stephen Harrison, 2013-10 Classics in the Modern World explores the features and implications of a democratic turn in modern perceptions of the ancient world Exploring the relationship between Greek and Roman ways of thinking and modern definitions of democratic practices and approaches it enables a wider re-evaluation of the role of classics in the modern world *The Humanist as Citizen* Margery Ann Ganz, 1979 **The Human-Animal**

Relationship as a Subject of Citizenship Education Jennifer Bloise, 2025-09-26 The aim of this book is to explore the human-animal relationship as a new subject of political education and to make it accessible for critical reflection A guiding thesis is that society's relationship with animals is both political and problematic as it is shaped by power structures and

rarely recognized as an issue due to its status as an unexamined norm To explore this topic the model of didactic reconstruction is employed A problem centered interview study is used to reconstruct students everyday conceptions of animals humans and their political relationship These conceptions are then compared with academic perspectives particularly from Human Animal Studies in order to uncover contradictions and taken for granted assumptions and to identify exemplary didactically fruitful approaches to the subject The author concludes that future engagement with the human animal relationship in the context of political education should be critically oriented toward power structures This would enable reflective and multi perspective political judgment on the human animal relationship making the invisible visible

The Crisis of the Early Italian Renaissance Hans Baron, 1966-03-21 Hans Baron was one of the many great German migr scholars whose work Princeton brought into the Anglo American world His *Crisis of the Early Italian Renaissance* has provoked more discussion and inspired more research than any other twentieth century study of the Italian Renaissance Baron s book was the first historical synthesis of politics and humanism at that momentous critical juncture when Italy passed from medievalism to the thought of the Renaissance Baron unlike his peers married culture and politics he contended that to truly understand the Renaissance one must understand the rise of humanism within the political context of the day This marked a significant departure for the field and one that changed the direction of Renaissance studies Moreover Baron s book was one of the first major attempts of any sort to ground intellectual history in a fully realized historical context and thus stands at the very origins of the interdisciplinary approach that is now the core of Renaissance studies Baron s analysis of the forces that changed life and thought in fifteenth century Italy was widely reviewed domestically and internationally and scholars quickly noted that the book will henceforth be the starting point for any general discussion of the early Renaissance The Times Literary Supplement called it a model of the kind of intensive study on which all understanding of cultural process must rest First published in 1955 in two volumes the work was reissued in a one volume Princeton edition in 1966

Studies in the History of Educational Theory Geoffrey Herman Bantock, 2012

The Blueprint for 2 Americas Linda Nelson, 2021-09-20 What VEHICLE did we climb aboard that carried us so far from our cultural roots How did the vast changes to society our social framework and our relationships come about Most importantly we must ask ourselves How could we become so divided Or are we The answers we hear in the public discourse are wholly inadequate to address the scope of the changes Could anyone in 1990 expected that ABC NBC or CBN would identify 53 Genders or that public policy law and educational principles would be altered to grant special rights to these created genders Could we have envisioned cities and businesses being destroyed by people claiming to be supportive of the people affected Many feel the world has been turned upside down the law is silent with regard to some egregious acts while being openly hostile to seemingly innocent citizens expressing their right of free speech We have heard over and over these six powerful words How did our nation get here This book is designed to explain EXACTLY how we got here You will become thoroughly aware of the plan that was set in motion who designed it when it began and the mechanisms used to move us to their desired end and finally where it will take us You will discover that the separation of Americans by race or wealth or gender is a myth and meet the groups responsible for those myths After reading *The Blueprint for Two Americas* every news report school board issue or city council agenda will be viewed with the perspective of the Humanist Manifestos in mind You will be

awakened to the destruction that this plan has wrought Just as a building has a set of blueprints that direct each specialty worker to their part in bringing about the finished product this social re engineering has a set of blueprints and the new society it envisions is nearly complete This book reveals THE BLUEPRINT FOR THE TWO AMERICAS **Global Citizenship and Social Movements** Janet McIntyre,2003-09-02 In this book Janet McIntyre addresses the need for transcultural thinking tools to not only mend problems in the global environment but also to understand the essential nature of the problems Thinking tools comprise the analytical concepts which organise disorganise pattern and question thoughts about the social and natural world Specifically the concepts introduced in this book are global citizenship human rights responsibility social movements and transcultural webs of meaning *Christian Citizens and the Moral Regeneration of the African State* Barbara Bompani,Caroline Valois,2017-10-23 In recent years the rapid growth of Christian charismatic movements throughout sub Saharan Africa has drastically reconfigured the region s religious landscape As a result charismatic factions play an increasingly public role throughout Africa far beyond the religious sphere This book uses a multi disciplinary approach to consider the complex relationship between Pentecostal charismatic Christianity and the socio political transformation taking place throughout this region Each of this text s three main sections helps in understanding how discourses of moral regeneration emanating from these diverse Christian communities largely charismatic extend beyond religious bounds Part 1 covers politics political elites and elections Part 2 explores society economies and the public sphere and Part 3 discusses values public beliefs and morality These sections also highlight how these discourses contribute to the transformation of three specific social milieus to reinforce visions of the Christian citizen Examining contemporary examples with high quality scholarly insight this book is vital reading for academics and students with an interest in the relationship between religion politics and development in Africa Looking Within: Finding an Environmental Justice and Global Citizenship Lens Karen Druffel,2019-01-04 This volume was first published by Inter Disciplinary Press in 2013 Can we adopt human rights concepts long used to frame problems of social justice to define environmental justice Can existing social institutions provide models and tools for achieving environmental justice This volume views old models of agency through new lenses and examines how several social institutions such as law education and health care address specific environmental problems The volume presents arguments for human obligations towards the environment and future generations Scholars assess the limitations of existing models and others point to recent failures in protecting the interests of indigenous groups or species And on a hopeful note examples are given of institutions that promise some success in effecting environmental goals As this discussion of citizenship suggests much like environmental justice a global context both in definition and application is required **Schooling and the Making of Citizens in the Long Nineteenth Century** Daniel Tröhler,Thomas S. Popkewitz,David F. Labaree,2011-05-09 This book is a comparative history that explores the social cultural and political formation of the modern nation through the construction of public schooling It asks how modern school

systems arose in a variety of different republics and non republics across four continents during the period from the late eighteenth century to the early twentieth century The authors begin with the republican preoccupation with civic virtue the need to overcome self interest in order to take up the common interest which requires a form of education that can produce individuals who are capable of self guided rational action for the public good They then ask how these educational preoccupations led to the emergence of modern school systems in a disparate array of national contexts even those that were not republican By examining historical changes in republicanism across time and space the authors explore central epistemologies that connect the modern individual to community and citizenship through the medium of schooling Ideas of the individual were reformulated in the nineteenth century in reaction to new ideas about justice social order and progress and the organization and pedagogy of the school turned these changes into a way to transform the self into the citizen

Christian Humanism and the Puritan Social Order Margo Todd, 2002-11-07 The author contends that the traditional views of puritan social thought have done a great injustice to the intellectual history of the 16th century Margo Todd reveals the puritans to be the heirs to a complex intellectual legacy

Citizenship in the Western Tradition Peter Riesenber, 2000-11-09 Intended for both general readers and students Peter Riesenber s instructive book surveys Western ideas of citizenship from Greek antiquity to the French Revolution It is striking to observe the persistence of important civic ideals and institutions over a period of 2 500 years and to learn how those ideals and institutions traveled over space and time from the ancient Mediterranean to early modern France England and America
