Sir Hans Sloane The Great Collector:

Sir Hans Sloane. The Great Collector and His Circle. [With Plates, Including a Portrait.]. Eric Saint John BROOKS, Sir Hans SLOANE, 1954 **Sloane 250** Natural History Museum (London, England), 2003 **Sir Hans Sloane** Eric St. John Brooks, 1954 **Doctors of Another Calling** David K. C. Cooper, 2013-11-26 The medical profession is rich in those who have made names for themselves outside of medicine The fields of literature exploration business sport entertainment and beyond abound with doctors whose interests lie outside medicine This book largely written by members of the medical profession examines the efforts of doctors in non medical fields The doctors discussed here are those who are or were well known to the public for their contributions to their non medical fields of choice In many cases the public may have been unaware that a subject was medically qualified This book provides wide ranging and comprehensive biographical sketches of forty two doctors who are best known to the public for their contributions to fields outside of medicine **Healers and Achievers** Raphael S. Bloch, M.D., 2012-05-31 Summary of Healers and Achievers ID No 110473 by Raphael S Bloch M D It is not widely known that throughout history physicians have contributed more than just medical care to civilization Healers and Achievers is a series of biographies of doctors from ancient Egypt to the twenty first century who distinguished themselves with lasting non medical accomplishments They include the architect of the first Egyptian pyramid a pope the Fathers of astronomy geology magnetism and taxonomy American Founding Fathers French Revolutionaries a buccaneer world class athletes a spy and an astronaut Their life stories are told in the context of the eras in which they lived and their fields of medical and non medical expertise are explained in terms comprehensible to both laymen and physicians *Poetic Exhibitions* Eric Gidal, 2001 In the process of tracing poetic and critical responses to the museum and its collections Poem Exhibitions simultaneously demonstrates the impact of nationalist ideologies and scientific discourse on formal and thematic developments in Romantic poetry and aesthetics Museum Storage and Meaning Mirjam Brusius, Kavita Singh, 2017-09-07 Beyond their often beautiful exhibition halls many museums contain vast hidden spaces in which objects may be stored conserved or processed Museums can also include unseen archives study rooms and libraries which are inaccessible to the public This collection of essays focuses on this domain an area that has hitherto received little attention Divided into four sections the book critically examines the physical space of museum storage areas the fluctuating historical fortunes of exhibits the growing phenomenon of publicly visible storage and the politics of objects deemed worthy of collection but unsuitable for display In doing so it explores issues including the relationship between storage and canonization the politics of collecting the use of museum storage as a form of censorship the architectural character of storage space and the economic and epistemic value of museum objects Essay contributions come from a broad combination of museum directors curators archaeologists historians and other academics **The Great Naturalists** Robert Huxley, 2019-09-24 The story of natural history as seen through the lives observations and discoveries of the world s greatest naturalists We owe a debt of

gratitude to the naturalists who described experimented collected and gave us the means to understand the natural world They came from all over the globe from classical times to the end of the nineteenth century when natural history changed from a mainly amateur pursuit to today s specialized scientific profession Braving dangers including storms pirates and disease in pursuit of cataloging the natural world pioneers such as Alexander von Humboldt and Charles Darwin changed the course of science with their groundbreaking theories This book includes many naturalists who are well known such as the earliest great natural historian Aristotle Carl Linnaeus the man who brought order to nature the ornithologist and painter John James Audubon and Georges Cuvier who established the concept of extinction Others are now given their rightful place Antony van Leeuwenhoek who made his own microscopes and discovered bacteria and Mary Anning the princess of paleontology who had an amazing self taught talent for finding fossils Many of these people were great artists as well as scientists and The Great Naturalists is illustrated with a selection of beautiful and precise paintings and drawings of birds animals fossils fish shells and rocks from the unparalleled collections of the Natural History Museum London

Medical Education: Past, Present and Future Kenneth Calman,2006-12-12 Highly Commended BMA Awards 2007 I would certainly recommend this book to all in Medical Education Medical education both for undergraduate and postgraduate students and for those training in their chosen specialty is currently undergoing great change In Medical Education Past Present and Future Handling on Learning Sir Kenneth Calman puts this change in its proper historical context and also examines the current upheavals and their implications for the future An ambitious but timely project made readable and specific by the use of a case based approach a book of this range and type has not been attempted since the early 20th century Written by a known expert in the field and therefore individualistic but with a real insider s attributes of being able to discriminate between what does and does not matter the insider viewpoint especially of someone so recently involved at the centre of political and educational debate The overall theme of regulation covers not just the professionals viewpoint but also the public s and therefore covers political influences on the educational and regulatory process

Museum Masters Edward P. Alexander,1995 Alexander brings to life the stories of twelve ambitious leaders from the United States and Europe who helped shape the future of the museum world

Managing Natural Science Collections Robert Huxley,Christiane Quaiser,Carol R Butler,René WRJ Dekker,2020-07-15 Managing Natural Science Collections demonstrates the need for consistency and evidence based decision making in the management of natural science collections which are becoming increasingly valuable when it comes to addressing societal challenges Drawing upon the experience of four experts who have managed some of the largest and most diverse collections in the world the book aims to assist in the making of strategic and

operational decisions regarding care development access and resource management Encouraging the reader to consider how collection strategies can be aligned with the mission of their institution and contribute to its vision the authors also examine ways to deliver a consistent approach that will secure the present and future availability and relevance of collections Principles of good practice and resource optimisation in an ethical and legal context are provided throughout the book as well as case studies sample documents and templates all of which will be useful for discussion and teaching Managing Natural Science Collections encourages each reader to consider the different options available to them As such it should be essential reading for museum practitioners and other professionals around the world who are involved with any strategic aspect of managing natural science collections Students of museum studies will also find much to interest them within the pages of this book

The Penny Cyclopaedia of the Society for the Diffusion of Useful Knowledge, 1836 **Let This Voice Be Heard** Maurice Jackson, 2010-11-24 Anthony Benezet 1713 84 universally recognized by the leaders of the eighteenth century antislavery movement as its founder was born to a Huguenot family in Saint Quentin France As a boy Benezet moved to Holland England and in 1731 Philadelphia where he rose to prominence in the Quaker antislavery community In transforming Quaker antislavery sentiment into a broad based transatlantic movement Benezet translated ideas from diverse sources Enlightenment philosophy African travel narratives Quakerism practical life and the Bible into concrete action He founded the African Free School in Philadelphia and such

future abolitionist leaders as Absalom Jones and James Forten studied at Benezet's school and spread his ideas to broad social groups. At the same time Benezet's correspondents including Benjamin Franklin, Benjamin Rush, Abbé Raynal, Granville Sharp, and John Wesley gave his ideas an audience in the highest intellectual and political circles. In this wide-ranging intellectual biography, Maurice Jackson demonstrates how Benezet mediated Enlightenment political and social thought, narratives of African life written by slave traders themselves, and the ideas and experiences of ordinary people to create a new antislavery critique. Benezet's use of travel narratives challenged proslavery arguments about an undifferentiated primitive African society. Benezet's empirical evidence laid on the intellectual scaffolding provided by the writings of Hutcheson, Wallace, and Montesquieu had a profound influence from the high culture writings of the Marquis de Condorcet to the opinions of ordinary citizens. When the great antislavery spokesmen Jacques Pierre Brissot in France and William Wilberforce in England rose to demand abolition of the slave trade, they read into the record of the French National Assembly and the British Parliament extensive unattributed quotations from Benezet's writings, a fitting tribute to the influence of his work.
