Exploring the Role of Visualization in Climate Change Communication - an Audience Perspective

Anne Gammelgaard Ballantyne, 2018-05-08 Climate change communication is a topical and relevant issue and it is widely acknowledged that public communication about causes impacts and action alternatives is integral to addressing the challenges of the changing climate Climate visualization concerns the communication of climate information and data through the use of different information technologies and different modes of visual representation In the context of climate change communication climate visualization is highlighted as a potential way of increasing public engagement with climate

change In particular developments within information technology have provided significant advancements that are claimed to be transformative in engaging lay audiences with issues relating to the mitigation of and adaptation to climate change Nevertheless there is a lack of research exploring climate visualization from an audience perspective This thesis addresses this gap The overarching aim is thus to explore the role of climate visualization in climate change communication from an audience perspective focusing specifically on how lay audiences make meaning of climate change as represented in two examples of climate visualization In addition the thesis discusses the potential contributions and or limitations of climate visualization from a communication perspective Based on a social semiotic theoretical framework this thesis employs focus group interviews to study participants meaning making related to two cases of climate visualization a dome theatre movie developed for Swedish high school students with the aim of encouraging reflection on climate change causes impacts and mitigation alternatives and a web based tool for climate change adaptation developed to assist Nordic homeowners in adapting to the local impacts of climate change The results of this thesis show that climate visualization can help audiences concretize otherwise abstract aspects of climate change and that the localized focus can make climate change appear more personally relevant and interesting for targeted audiences Nevertheless despite these communicative qualities the analyses also show that participants interpretations are shaped by their preconceptions of climate change as a global and distant issue to be solved by other actors such as national governments or through international policy negotiations Although climate visualization can enhance a sense of proximity with climate change the localization of climate risk can also lead to participants downplaying the significance of climate impacts In addition despite the intentions of inducing a sense of agency in both cases of climate visualization participants critically negotiated messages concerning their roles as individuals in mitigating or adapting to climate change and assigned this responsibility onto other actors These findings show that although climate visualization presents certain communicative qualities it is not a panacea for engaging lay audiences with climate change This also underlines the importance of considering cultural and social aspects of the communicative event when studying and developing climate visualization tools as a means of communication

Kommunikation kring klimat förändringar är ett aktuellt och relevant mne och många bedömare anser att kommunikation kring orsaker effekter och möjliga alternativ är en viktig del i arbetet med att mota klimatutmaningarna Klimatvisualisering är en process för att skildra klimatinformation och klimatdata med hjälp av olika tekniker och metoder för visuell framställning I forskningslitteraturen om klimatkommunikation lyfts visualisering fram som ett möjligt sätt att öka allmänhetens engagemang i klimatfrågan I synnerhet har utvecklingen inom informationsteknik lett till betydande framsteg som kan ses som omvälvande när det gäller att engagera lekman i frågor som rör utsläppsminskningar och klimatanpassning Det råder dock brist på forskning om klimatvisualisering ur ett mottagarperspektiv Denna avhandling adresserar denna kunskapslucka Det övergripande syftet är således att utforska visualiseringens roller i klimatkommunikation ur ett mottagarperspektiv med särskilt fokus på hur lekman tolkar innebörden av klimatförändringar såsom

de representeras i tv exempel p klimatvisualisering Avhandlingen behandlar ven klimatvisualiseringens m jliga bidrag och eller begr nsningar ur ett kommunikationsperspektiv Med utg ngspunkt i ett teoretiskt ramverk som inspirerats av socialsemiotiska teorier genomf rdes fokusgruppsstudier f r att studera deltagarnas meningsskapande i relation till tv exempel p klimatvisualisering en film som visas i en domteater framtagen f r svenska gymnasieelever med m ls ttningen att uppmuntra till reflektion kring klimatf r ndringarnas orsaker effekter och alternativ f r utsl ppsminskning samt ett webbaserat verktyg f r klimatanpassning som utvecklats f r att st dja hus gare i Norden att anpassa sig till klimatf r ndringarnas lokala effekter Resultaten av denna avhandling visar att klimatvisualisering kan st dja mottagarna att konkretisera annars abstrakta aspekter av klimatf r ndringar och att ett lokalt fokus kan f klimatf r ndringarna att framst som mer personligt relevanta och intressanta f r m lgruppen Dock visar analyserna ven trots dessa kommunikativa kvaliteter att deltagarnas tolkningar formas av deras f rf rst else om klimatf r ndringar som ett globalt och avl gset problem som ska l sas av andra akt rer s som nationella regeringar eller genom internationella politiska f rhandlingar ven om klimatvisualisering kan f rst rka k nslan av n rhet till klimatf r ndringar kan lokaliseringen av klimatriskerna ven leda till att deltagare tonar ned de lokala klimatriskernas betydelse Dessutom trots att b da fallen av klimatvisualisering avs g att skapa en k nsla av att kunna p verka blev ansvaret f r klimat tg rder f rem l f r kritisk f rhandling fr n deltagarnas sida de f rlade ansvaret f r att hantera klimatutmaningarna till andra akt rer Dessa resultat visar att klimatvisualisering visserligen har vissa kommunikativa kvaliteter men inte r n gon patentl sning f r klimatkommunikation Detta understryker ven vikten av att ta h nsyn till kulturella och sociala aspekter av den kommunikativa h ndelsen n r man studerar och utvecklar verktyg f r klimatvisualisering

The new media environment has challenged the role of professional journalists as the primary source of politically relevant information *After Broadcast News* puts this challenge into historical context arguing that it is the latest of several critical moments driven by economic political cultural and technological changes in which the relationship among citizens political elites and the media has been contested Out of these past moments distinct media regimes eventually emerged each with its own seemingly natural rules and norms and each the result of political struggle with clear winners and losers The media regime in place for the latter half of the twentieth century has been dismantled but a new regime has yet to emerge Assuring this regime is a democratic one requires serious consideration of what was most beneficial and most problematic about past regimes and what is potentially most beneficial and most problematic about today s new information environment
