every contributor for his comments The author could then reply by means of a concluding remark So in many instances very valuable ideas concerning the topics of the several papers could be gathered and it is to be hoped that this procedure has conferred upon this volume a certain uniqueness Of course I had to observe the agreement with Springer Verlag not to exceed the extent of the volume allotted to us Evolutionary Programming - Proceedings Of The 3rd Annual Conference L J Fogel,Anthony V Sebald,1994-07-26 The main topics covered at this conference include evolutionary programming evolution strategies and genetic algorithms Specific research articles investigate applications in control image processing neural networks artificial life and theoretical properties of optimization algorithms based on inspirations from biology This volume provides researchers and graduate students with an update of developments in the field The Evolution of Pronunciation Teaching and Research John M.
