Situational Analysis:

Situational Analysis Adele E. Clarke, 2005-03-23 This book provides a detailed and comprehensive introduction to situational analysis of qualitative data Adele E Clarke personally created the situational analysis approach no other book currently deals with it She carefully situates herself and the situational analysis approach vis vis other current approaches to grounded theory specifically and to qualitative data analysis more generally Situational analysis is unique in that it both uses and extends grounded theory it employs established coding and memoing strategies while extending the method to include three new kinds of maps and analyses of the situation focused upon in one's research This is also the first publication about using grounded theory with historical visual and discursive materials

Situational Analysis Adele E. Clarke, Carrie Friese, Rachel S. Washburn, 2017-07-20 The Second Edition offers an innovative extension of grounded theory useful in qualitative research projects that draws on interviews observations and visual narrative and historical discourse materials To engage the dense complexities of real world situations Situational Analysis SA braids together Strauss's ecological social worlds arenas theory Foucault's discourse analysis and Deleuze and Guattari's rhizomes and assemblages The book will serve as an invaluable resource for advanced undergraduate and graduate level students as well as professional researchers and consultants from diverse backgrounds pursuing qualitative projects

Quantitative Situational Analysis Heather Johnston Nicholson, 1979 *Karl Popper and Situational Analysis* Alfonso

Palacio-Vera,2024-08-02 Situational Analysis represents Karl Popper s methodological proposal for the social sciences Although it has been widely studied and interpreted this book argues that Situational Analysis remains underestimated and undeveloped and if properly reformulated could yet become a broad methodological framework that encompasses both the historical social sciences and a large section of the theoretical social sciences The first part of this book develops this idea by returning to Popper s texts This book calls for both a reformulation of Situational Analysis and a clarification of the status and role of Popper s Rationality Principle This book also develops Situational Analysis by addressing two aspects of the Problem Situation facing individual actors that are only sketched out in Popper s work institutions and expectations The second part of this book utilizes the reformulated version of Situational Analysis to shed light on the core methodological differences across some of the most widespread approaches in contemporary economics and sociology In particular by showing that many of these approaches are variants of the reformulated version of Situational Analysis presented in the first part of this book this book argues that apparent methodological differences across these approaches may be reinterpreted as differences in the way social scientists reconstruct the Problem Situation facing individual actors This book will be vital reading for academic economists sociologists philosophers of science and other social scientists interested in methodology

Aquaculture sector situational analysis of Uzbekistan Diffey, S., Kurbanov, A.,2022-07-07 Uzbekistan has abundant inland water resources namely rivers and lakes which are suitable for freshwater aquaculture However the production of fish is generally low compared to the resource potential due to the collapse of collectivized farms a lack of interest in commercial operations and producer associations by local farmers and the limited capacity of government extension and research facilities to promote fish production Growing interest by the Government in fish production has led to an increase in investment in the aquaculture sector This has resulted in significant gains in fish production in recent years Government land distribution schemes for smallholder fish farmers to establish individual fishponds to produce carp are a major contributing factor to these gains There is no existing national fisheries or aquaculture sector specific development policy or plan and reference to government policy towards the sector are through a number of existing presidential decrees Given that the sector has witnessed a significant increase in fish production over recent years addressing this issue using other country fisheries policy and legislation as a potential model was seen as an important first step for any coherent strategic plan for the sector The report was compiled in 2020 as one of the outcomes of the TCP UZB 3703 project focusing on national review and strategy for aquaculture sector and fish value chain in Uzbekistan Due to the COVID 19 pandemic this report was based solely on data sourced from the internet academic papers and field data provided by the national consultant including aquaculture value chain mapping and analysis of the project The report includes a description of the Uzbekistan aquaculture sector analyses its problems and opportunities and presents options for its development **A Situational Analysis of**

Hoover, 2016 Situational analysis also known as situational logic was popularized by Karl Popper as an appropriate method for the interpretation of history and as a basis for a scientific social science It seeks an objective positive explanation of behavior through imputing a dominant goal or motive to individuals and then identifying the action that would be objectively appropriate to the situation as the action actually taken Popper regarded situational analysis as a generalization to all of social science of the prototypical reasoning of economics Applied to history situational analysis is largely an interpretive strategy used to understand individual behavior In social sciences however it is applied many to types of behavior or to group behavior e g to markets as is used to generate

testable hypothesis Popper's account of situational analysis and some criticisms that have been levied against it are reviewed. The charge that situational analysis contradicts Popper's view that falsification is the hallmark of sciences is examined and rejected. Situational analysis is precisely how Popper believes social sciences are able to generate falsifiable and therefore scientific hypotheses. Still, situational analysis is in tension with another of Popper's central ideas: situational analysis as a method for generating testable conjectures amounts to a logic of scientific discovery something that Popper argued elsewhere was not possible. *California.
