Bryan Gabbard, 2008-02-27 This report assesses intelligence analysis across the main U S intelligence agencies and makes a number of recommendations some of which parallel initiatives that have begun in the wake of the December 2004 legislation for instance create a Deputy Director of National Intelligence as a focal point for analysis establish a National Intelligence University build a Long Term Analysis Unit at the National Intelligence Council and form an Open Source Center for making more creative use of open source materials

Evolution of Scenario Planning George Burt, 2023-10-24 Scenario planning is a long and well established approach to help leaders create novel insights and challenge what they know of the world to influence future action But as the world becomes increasingly unpredictable leaders must question the traditional mode of analysing the contextual environment and adopt new capabilities to embrace change while they redefine and reframe their organisation for the future The Evolution of Scenario Planning explores the pervasive nature of change It provides a contemporary approach to using scenarios as strategic conversation to embrace experiences past and present to create novel understanding and insights The book uses case studies and practical examples to guide facilitators in applying the scenario process in their organisation Leaders senior managers consultants and academics will learn how to engage with scenarios as a central element of strategy and better understand their role in strategic leadership They will also gain insight into the skills and capabilities revealed during the process of strategic conversation where ambiguity and equivocality is a natural feature of such conversation The Evolution of Scenario Planning makes a compelling case for using scenarios to enable leaders to

develop foresight and attunement to grasp the ongoing dynamic of their uncertain and ambiguous world **Electronic Government** Roland Traunmüller,2012-02-02 The EGOV Conference Series intends to assess the state of the art in e Government and to provide guidance for research and development in this fast moving field The annual conferences bring together leading research experts and professionals from all over the globe Thus EGOV 2003 in Prague built on the achievements of the 1st EGOV Conference Aix en Provence 2002 which provided an illustrative overview of e Government activities This year the interest even increased nearly 100 contributions and authors coming from 34 countries In this way EGOV Conference 2003 was a reunion for professionals from all over the globe EGOV 2003 brought some changes in the outline and structure of the conference In line with the broadening of the field and a growing number of missions it became necessary to decentralize the reviewing process So reviewing was done via stream chairs who deserve high praise for their dedicated work In addition a workshop part was included to cover some subjects of emerging significance such as dissemination networking and regional developments Further a subtitle of the conference was chosen that would mirror the expansion of e Government to e Governance Consequently in this year's conference governance democratic deliberation and legal issues occupied a growing share Last but not least GIS was incorporated as a topic due to the increasing importance of geographical information systems for planning and operations **The Routledge Handbook of Business Events** Charles Arcodia,2022-09-08 A

Scenario Thinking R. Bradley MacKay, Peter McKiernan, 2018-10-04 This Element infuses established scenario planning routines with an exploration of cognitive reasoning by contextualising scenario thinking within the wider human endeavour of grappling with future uncertainties A study of ancient civilisations shows that scenario thinking is not new but has evolved significantly since ancient times By decoupling scenario thinking from scenario planning it is elevated as the essential ingredient in managerial foresight projects The historical theme continues focussing on the evolution of modern scenario planning by way of the French and Anglo American schools of thought using the intuitive logics methodology Archival research has discovered early contributions in the UK around the development and use of scenario thinking in public policy which has been overlooked in many received histories Finally the usefulness of scenario thinking for strategic management is challenged here and the argument that it is a heuristic device for overcoming cognitive biases and making better strategic decisions is refined

Managing Information Services Jo Bryson, 2006 This new edition of Managing

Information Services has been significantly revised and restructured to reflect the need for libraries and information services to manage the transformation necessary to become more relevant to the knowledge age's dynamic customer centred environment. It reflects the move from managing physical assets to exploiting knowledge technology and innovation, new models of learning, global mobile communication and new delivery mechanisms with a focus on relationships. Introductory sections on management and strategic influences emphasise the importance of knowledge management skills, teamworking, corporate responsibility and customer satisfaction as a driver for change. A new section on corporate governance has been added that includes managing different forms of capital and there is expanded coverage of investment security risk management and business continuity. Maintaining a competitive advantage through service quality and multiple delivery channels is another theme found throughout the book. Comprehensive and yet sufficiently detailed reference on the key management subjects for information service managers.

Safeguards in a World of Ambient Intelligence David Wright, Serge Gutwirth, Michael Friedewald, Elena Vildjiounaite, Yves Punie, 2008-01-08. Copy the following link for free access to the first chapter of this title: <http://www.springerlink.com/content/j23468h304310755/fulltext.pdf>. This book is a warning. It aims to warn policy makers, industry, academia, civil society, organisations, the media and the public about the threats and vulnerabilities facing our privacy, identity, trust, security and inclusion in the rapidly approaching world of ambient intelligence (AmI). In the near future, every manufactured product, our clothes, money, appliances, the paint on our walls, the carpets on our floors, our cars, everything will be embedded with intelligence networks of tiny sensors and actuators which some have termed smart dust. The AmI world is not far off. We already have surveillance systems, biometrics, personal communicators, machine learning and more. AmI will provide personalised services and know more about us on a scale dwarfing anything hitherto available. In the AmI vision, ubiquitous computing, communications and interfaces converge and adapt to the user. AmI promises greater user-friendliness in an environment capable of recognising and responding to the presence of different individuals in a seamless, unobtrusive and often invisible way. While most stakeholders paint the promise of AmI in sunny colours, there is a dark side to AmI. This book aims to illustrate the threats and vulnerabilities by means of four dark scenarios. The authors set out a structured methodology for analysing the four scenarios and then identify safeguards to counter the foreseen threats and vulnerabilities. They make recommendations to policy makers and other stakeholders about what they can do to maximise the benefits from ambient intelligence and minimise the negative consequences.
